Jana Růžičková has created **Pebbles** to contemplate the relationship between the natural world and human perception. From the Sun, Moon, and planets, to the eyes that give us sight, we find the shape of the circle everywhere in the natural world. **Pebbles** suggest that human communication relies on certain archetypal shapes which serve as one universal language for all of humankind.
If we surrendered to earth's intelligence we could rise up rooted, like trees.

The perception of shapes is deeply ingrained in our psyche, influencing our aesthetic preferences, emotions, and behavior. At the heart of *Pebbles* is the circle, a shape that is ubiquitous in the natural world. Jana Růžičková chose the graceful curves and organic shapes of pebbles and translated them into a design language that captures the essence of nature and infuses it into contemporary design.

The design concept comprises of hand-blown glass pebbles, suspended at varying distances. Each element is unique in shape and internally coated in liquid metal, thereby referencing water formations and creating a reflective, mirror-like effect.
Some spaces are different and more demanding than others. For these unique spaces, Lasvit has curated a selection of their most definitive art pieces which re-imagine them as versatile lighting design systems that can uniquely fit even the most demanding of spaces.

Lasvit Icons are imagined with a range of spaces in mind. From residences and hotels to restaurants and offices, our Lasvit designers re-think and re-purpose our most iconic sculptures to create sublime artistic experiences, tailored to taste and purpose.
Versatile lighting design systems. Each with its unique character and story.
