Beauty has not been here for a mere ten years. It's been here since time immemorial, long before we began to worship it. It emerges, nurtures, fades. The motion power of the universe, of the planet, of the people. Of you and of me, of all life in all its forms.

Sparks in the eyes, inner flame, flames of passion, jealousy, eruptions on the Sun, invisible signals, floods of emotions. Not belonging to anyone, including us – the handful of devotees spreading the message in its name.

Just what is the Czech Republic and the few worldwide branches? These few hundred years of glassmaking tradition, those masters of the craft, this Leon Jakimič? What is design, or art? Who has the right to take themselves so seriously, to place their ego above nature, and impose their judgement on beauty? On the way it's supposed to look, and on the way it's supposed to be viewed. No, no one, not even you.

Mere mastering the change of state – it's only sand, and then glass. Arts, procedures, nonsense about energy, wasting it or saving it. Market manipulations and light-speed races in disciplines that do not nor ever did exist.

Let it be, it's already set. Try to be free. Let live coincidences, moods, feelings, and emotions. Smiles and astonishment. Eyes narrowed or wide open. All the rays, flashes – data, if you will. Stories. Hearts aflame, even if uncomfortable. Yes, even laughter, tears, and magic.

It's not about us, we're only trying for the light beaming somewhere to make an imprint. In the right moment – for ever, perhaps – in glass and in such a manner to make you gasp for air and blind with astonishment:
“What beauty!”

For this, we love glass, for it we do this.
Try to understand, and who knows – maybe you'll join in.

LASVIT

LASVIT is a Czech-based designer and manufacturer of bespoke lighting and glass installations and objects. Since its foundation in 2007, our mission has been to inspire the world with the beauty of Bohemian glass. LASVIT glass installations decorate more than 2000 hotels, private residences, commercial buildings and others all over the world. Our creative style is set by designer Maxim Velčovský. Our design approach won LASVIT the Milano Design Award, known as the "design Oscar," at Salone del Mobile 2018.

#LasvitDesign #LasvitCollections

CRAFTSMANSHIP

Heritage matters

Glassmaking has been in the Northern Bohemia for six hundred years. The tradition of this craft has been handed down through the generations. These centuries of practice have taught us how to refine rough mass into a material brighter than diamond that can light up any space.

Tradition is a leader not a dogma

We have great respect for this tradition, but never let it bind us. Experience and know-how gave us the freedom to experiment on the cutting edge, play with designs and propose innovations.

The magic of glass

All the special techniques, tricks and practices are handed down from the masters, together with the local identity. To get the magic just right, you need to grow up with it and practice your entire life. In the end, you become the magic itself.

INNOVATION

Beyond Glassmaking

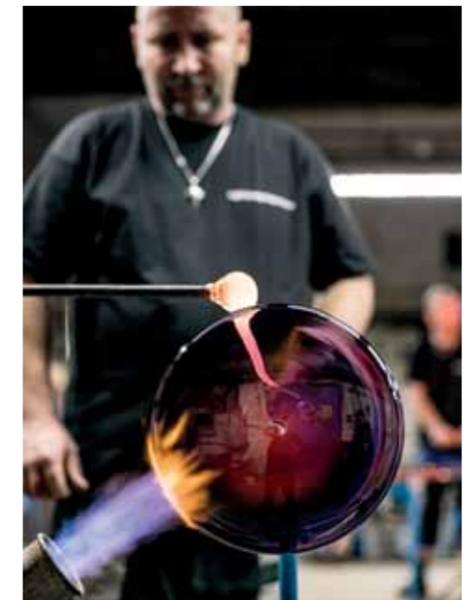

With craftsmanship and know-how as our tiller, we have the power to set course for innovation and explore possibilities beyond hand-blown glass. Colours aren't a limit for us, nor are the patterns. Bubbles, prints, engraving or metal coating we are obsessed with glass and new ideas are just challenges to overcome.

Dynamic Lighting

We have developed innovations that do almost magical effects with light. Our innovative designs can let the light dance to the sound of music or play in a myriad shades and colors.

Interactive Installations

Glass may have a power to shape light, but we provide our clients the power to shape lighting. We say that design is a game and our lightings are means to enjoy it. Side to side or upside down. We present designs which can be controlled through an app on mobile devices.

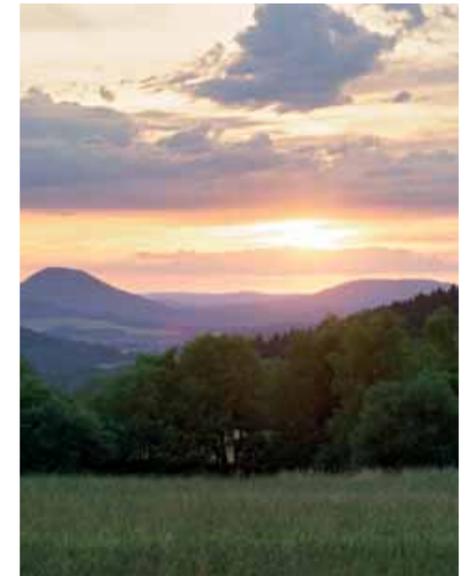

DESIGN

Storytelling Design

We make cutting-edge designs sharp enough to draw blood. Our pieces are specific by their customized design. LASVIT glass installations are tailor-made for the place and client, entangled with the genius loci of each specific site. They provide not only light, but also emotions, atmosphere and stories.

Variety of designs for a variety of tastes
We work with our pool of talented up-and-coming in-house designers who are ready to make your dreams a reality. On our way to inspire the world, we have created ornate, voluminous, and opulent designs as well as minimalistic and humble pieces. In this catalogue we present just an amuse bouche of them.

FROM A TO Z

From the design outline to the final touch on the installed glass art piece, it is in our hands. Clients can dream about the design and we take care and worry about the rest. From the experts in design and engineer teams to the dedicated professionals for on-site fitting, we have it covered. Hundreds of people work together towards one goal — to illumine the client's place with the beauty of glass and thus make the world a bit more beautiful.

Born in Northern Bohemia

We illumine the world, yet the source of our inspiration comes straight from the homeland. LASVIT headquarters are in Nový Bor, in the heart of Northern Bohemia. A glass house is also part of the complex — the metaphorical “lighthouse of glassmaking,” illuminating the whole region and beyond.

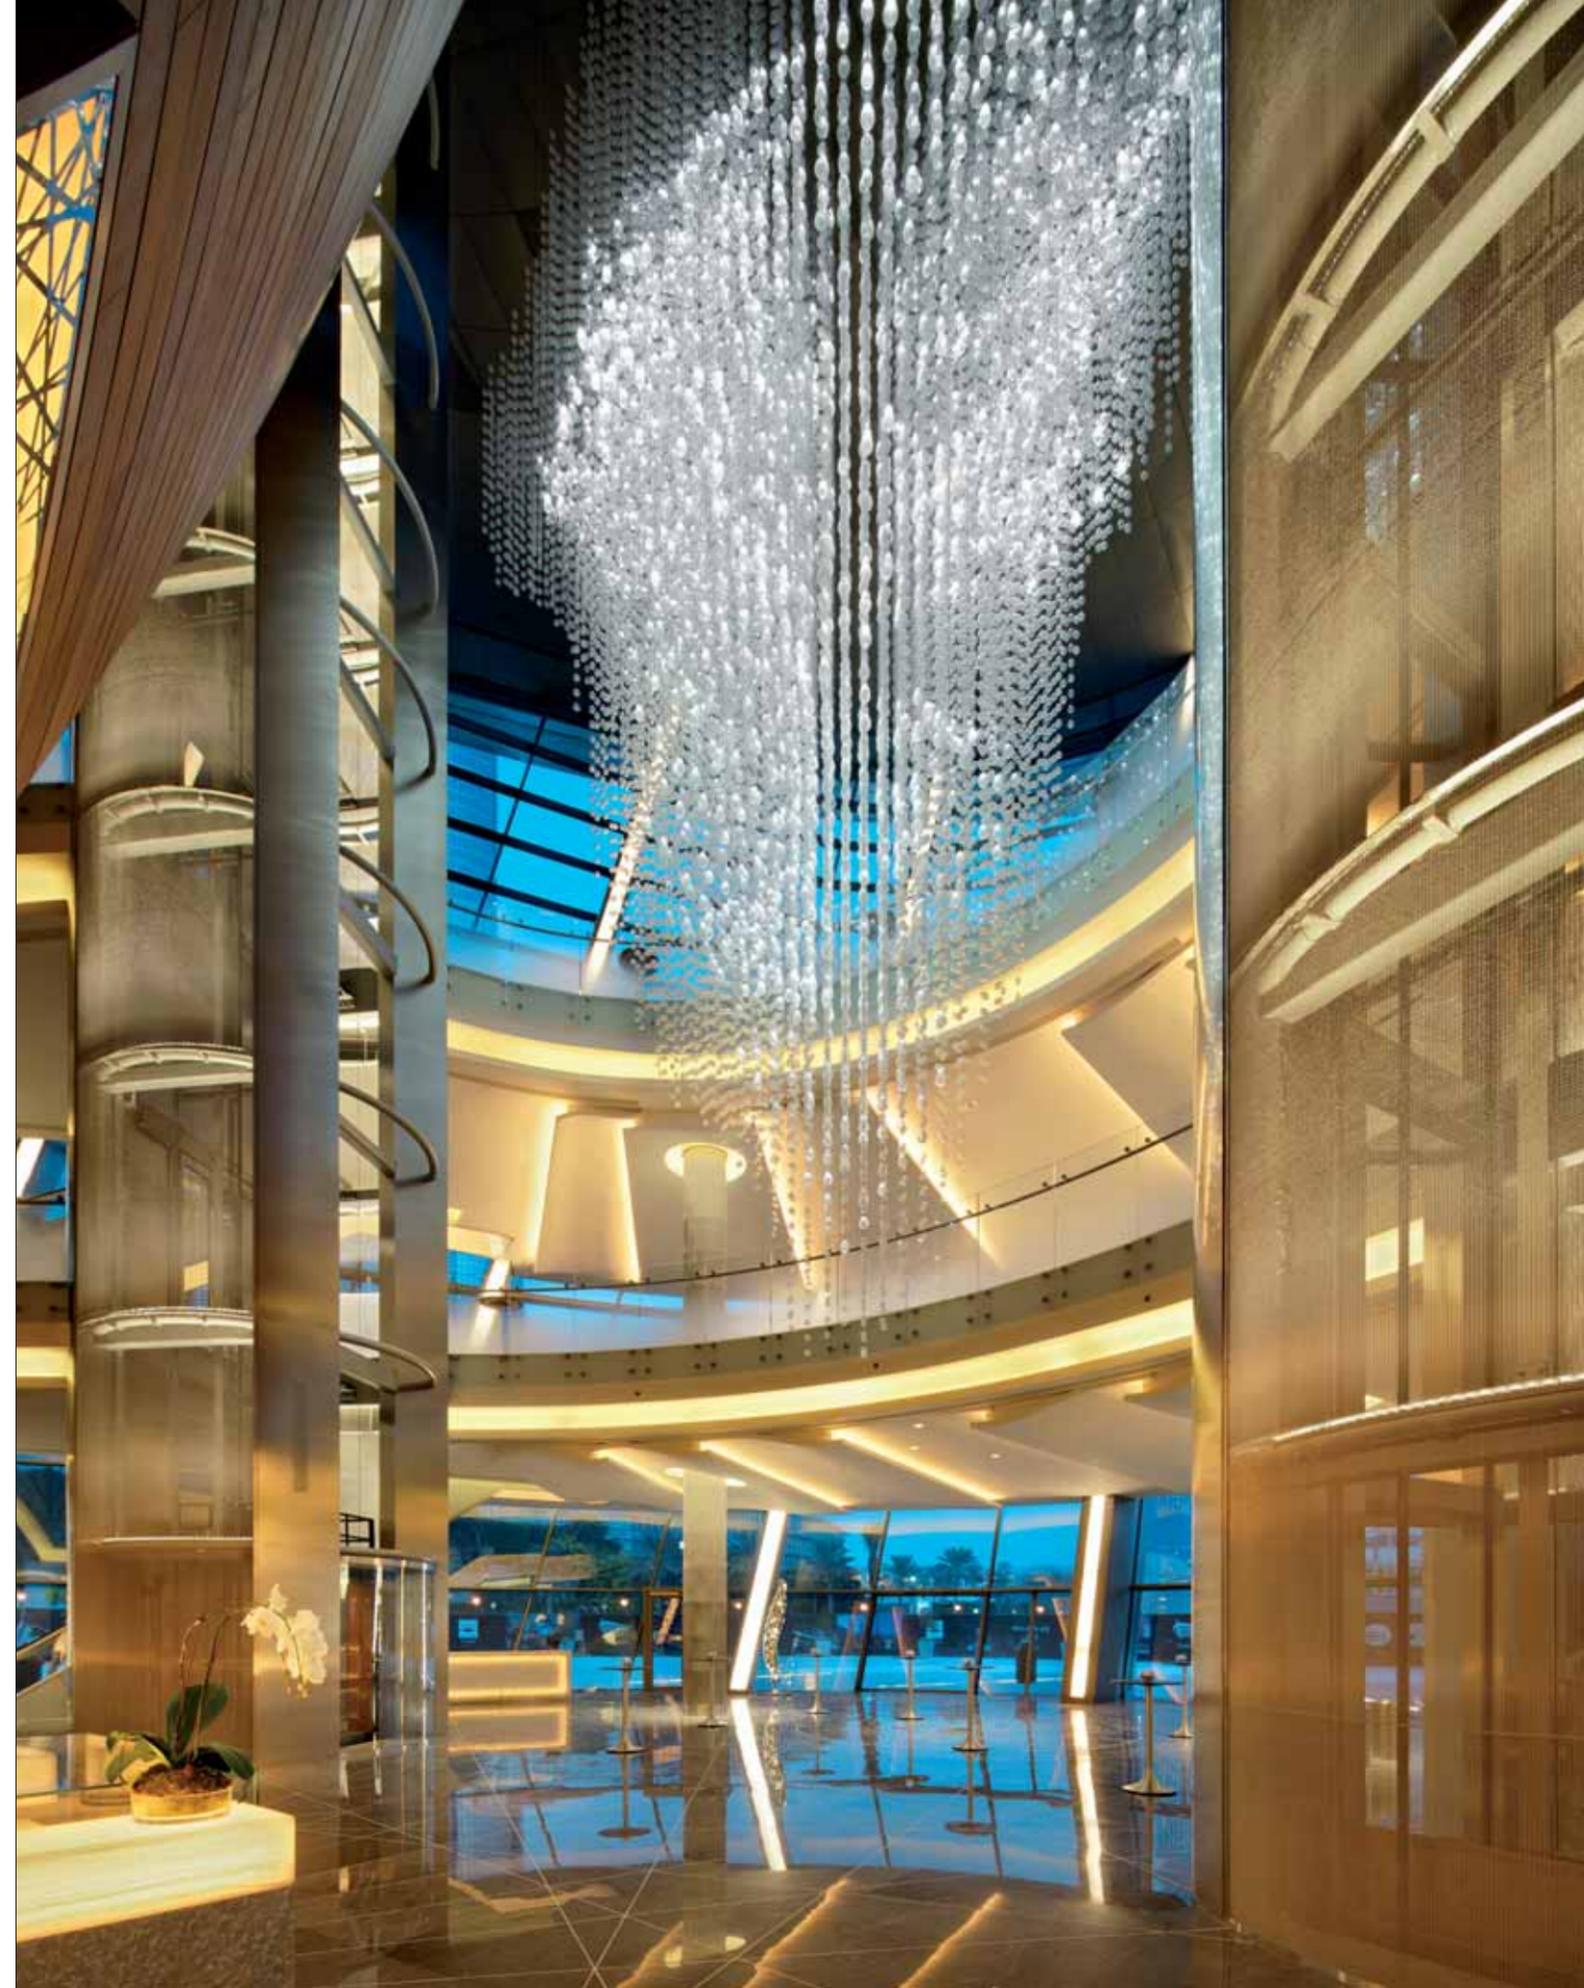

And this is just the beginning. We keep pushing the boundaries of what is possible to do with a glass piece of art.

The dynamically-lit glass sculpture titled Symphony spans three floors of the Dubai Opera's main foyer. Much like the entire building, designed by Janus Rostock of Atkins and resembling a traditional dhow boat, the sculpture was inspired by Dubai's rich maritime past. It is composed of thousands of individually-crafted glass pearls and its shape resembles that of fishing nets rising through the depths of the sea in a vortex of swirling bubbles.

PRINCE MAHIDOL HALL

The Prince Mahidol Hall is a world-class facility with a 2,000-seat theater designed specifically for opera and symphony orchestras. The architects referenced organic structures and the 'pitch' roof often found in traditional Thai architecture. LASVIT created the Neurons lighting sculpture which responds to music played in the concert hall with various colors and light sequences, turning rhythms and melodies into unique visual experiences.

Lasvit Projects

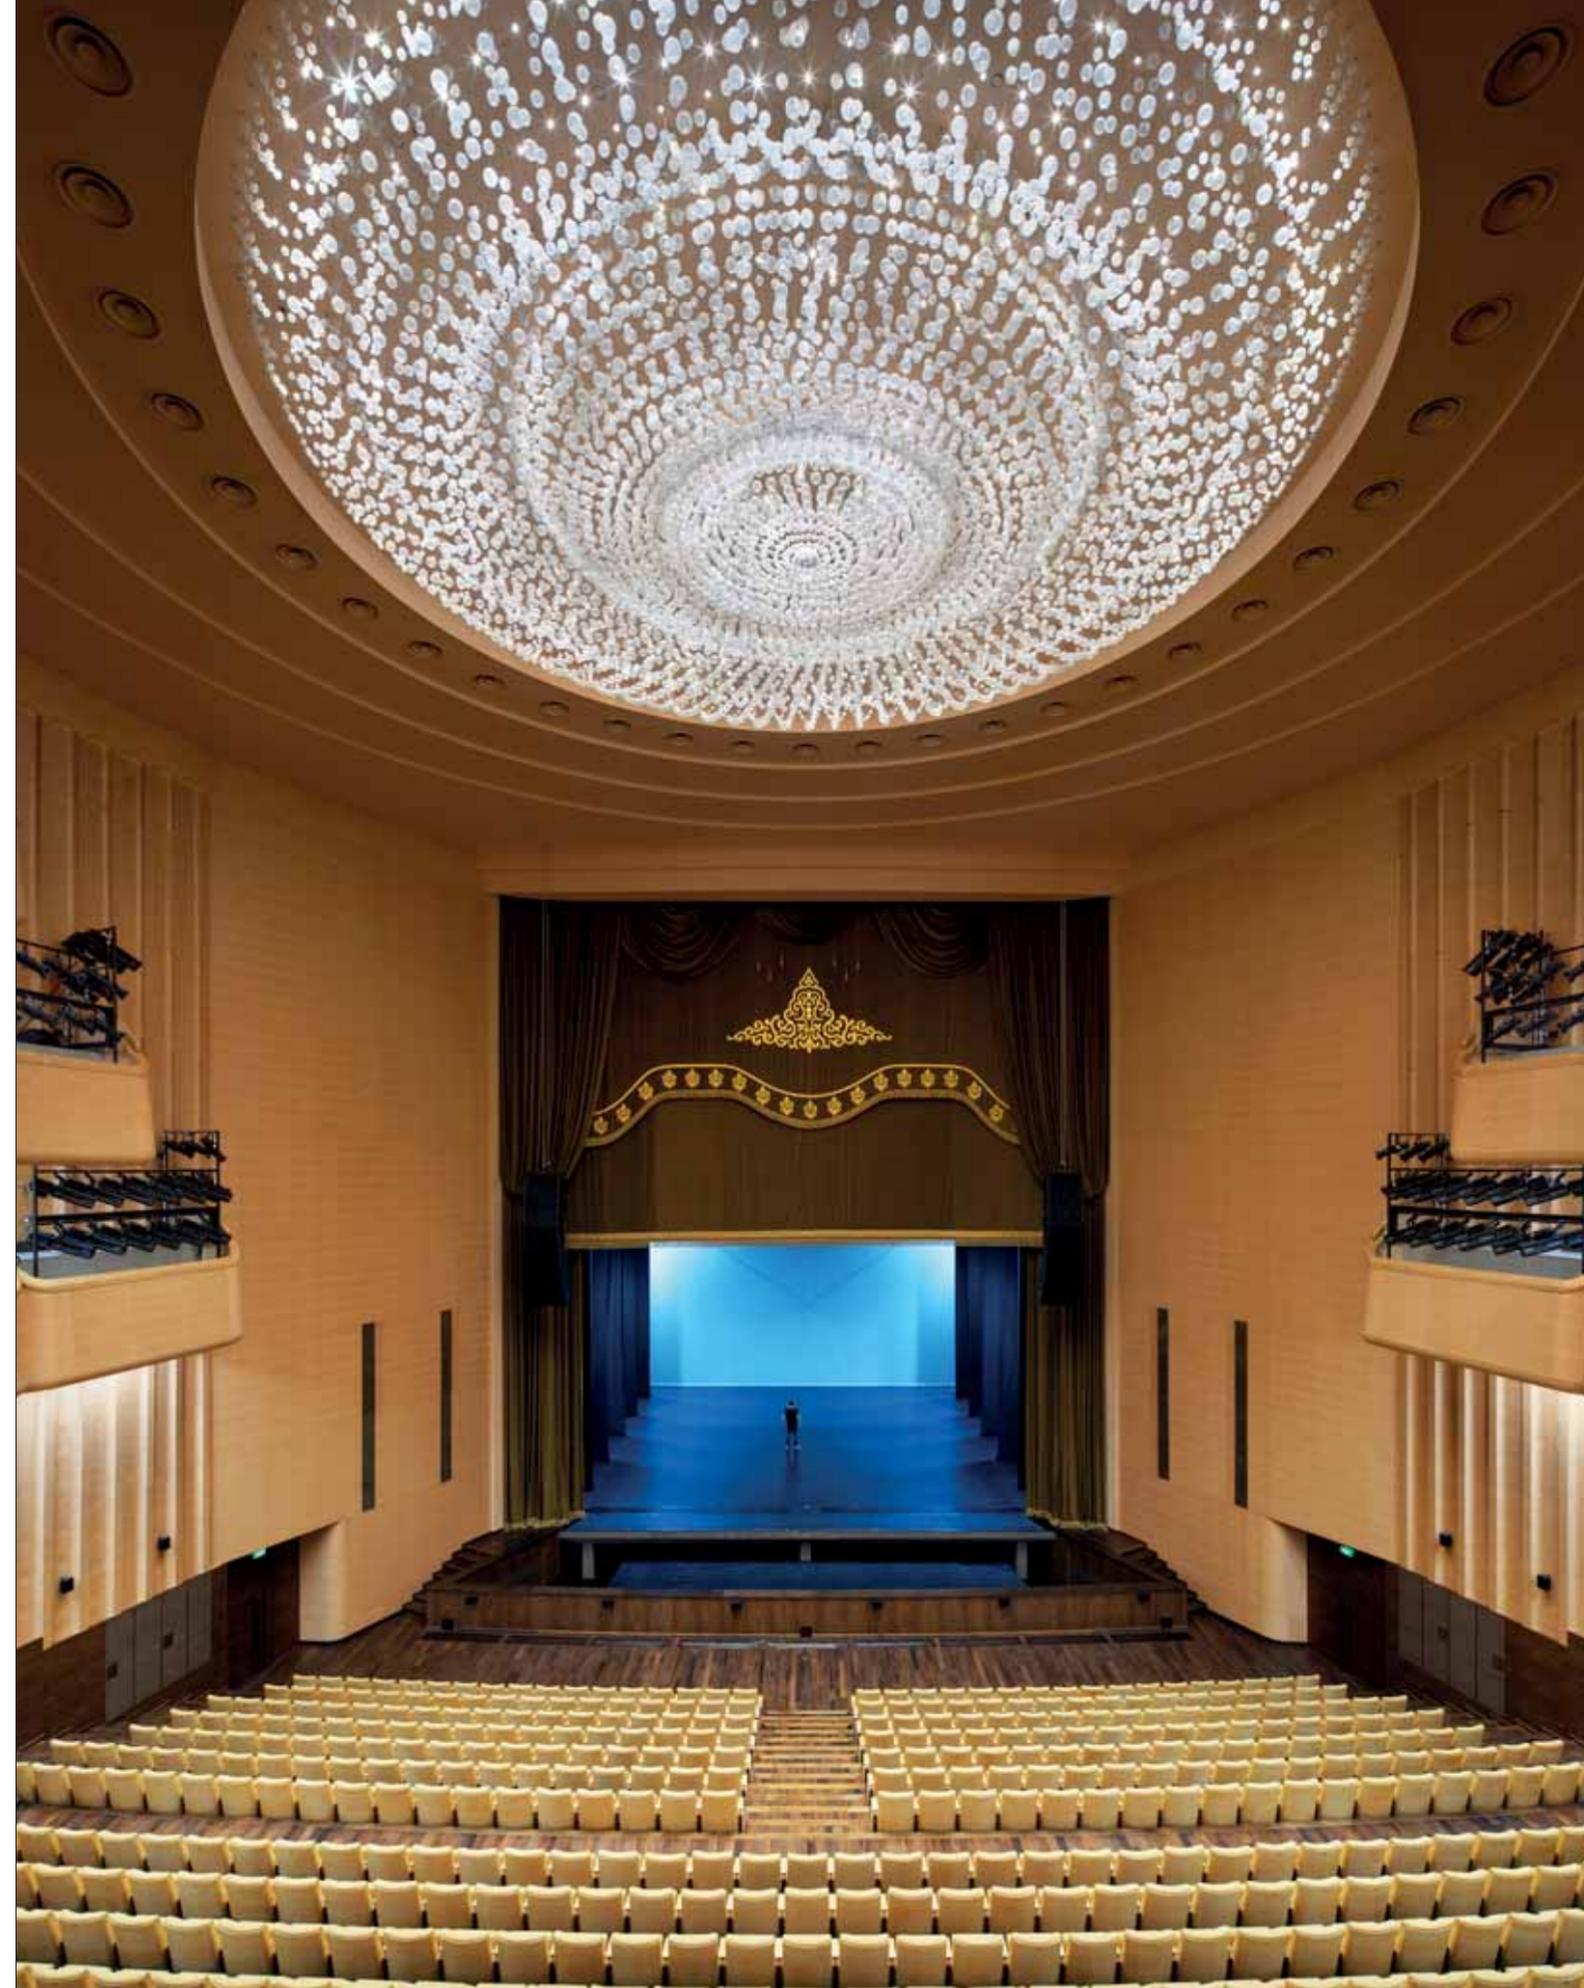

ASTANA BALLET

In this theatre built for young dancers, the beauty is not just on the stage but also above it. Over the spectators' heads hangs a chandelier which drew inspiration from Bohemian lace, a fabric that is an integral part of dance costume design. As the reflection of the ballet dancer's fluttering petticoat, the chandelier imitates the gentle movements of their costume and captures them in the beautiful art performed both in and above the limelight.

Lasvit Projects

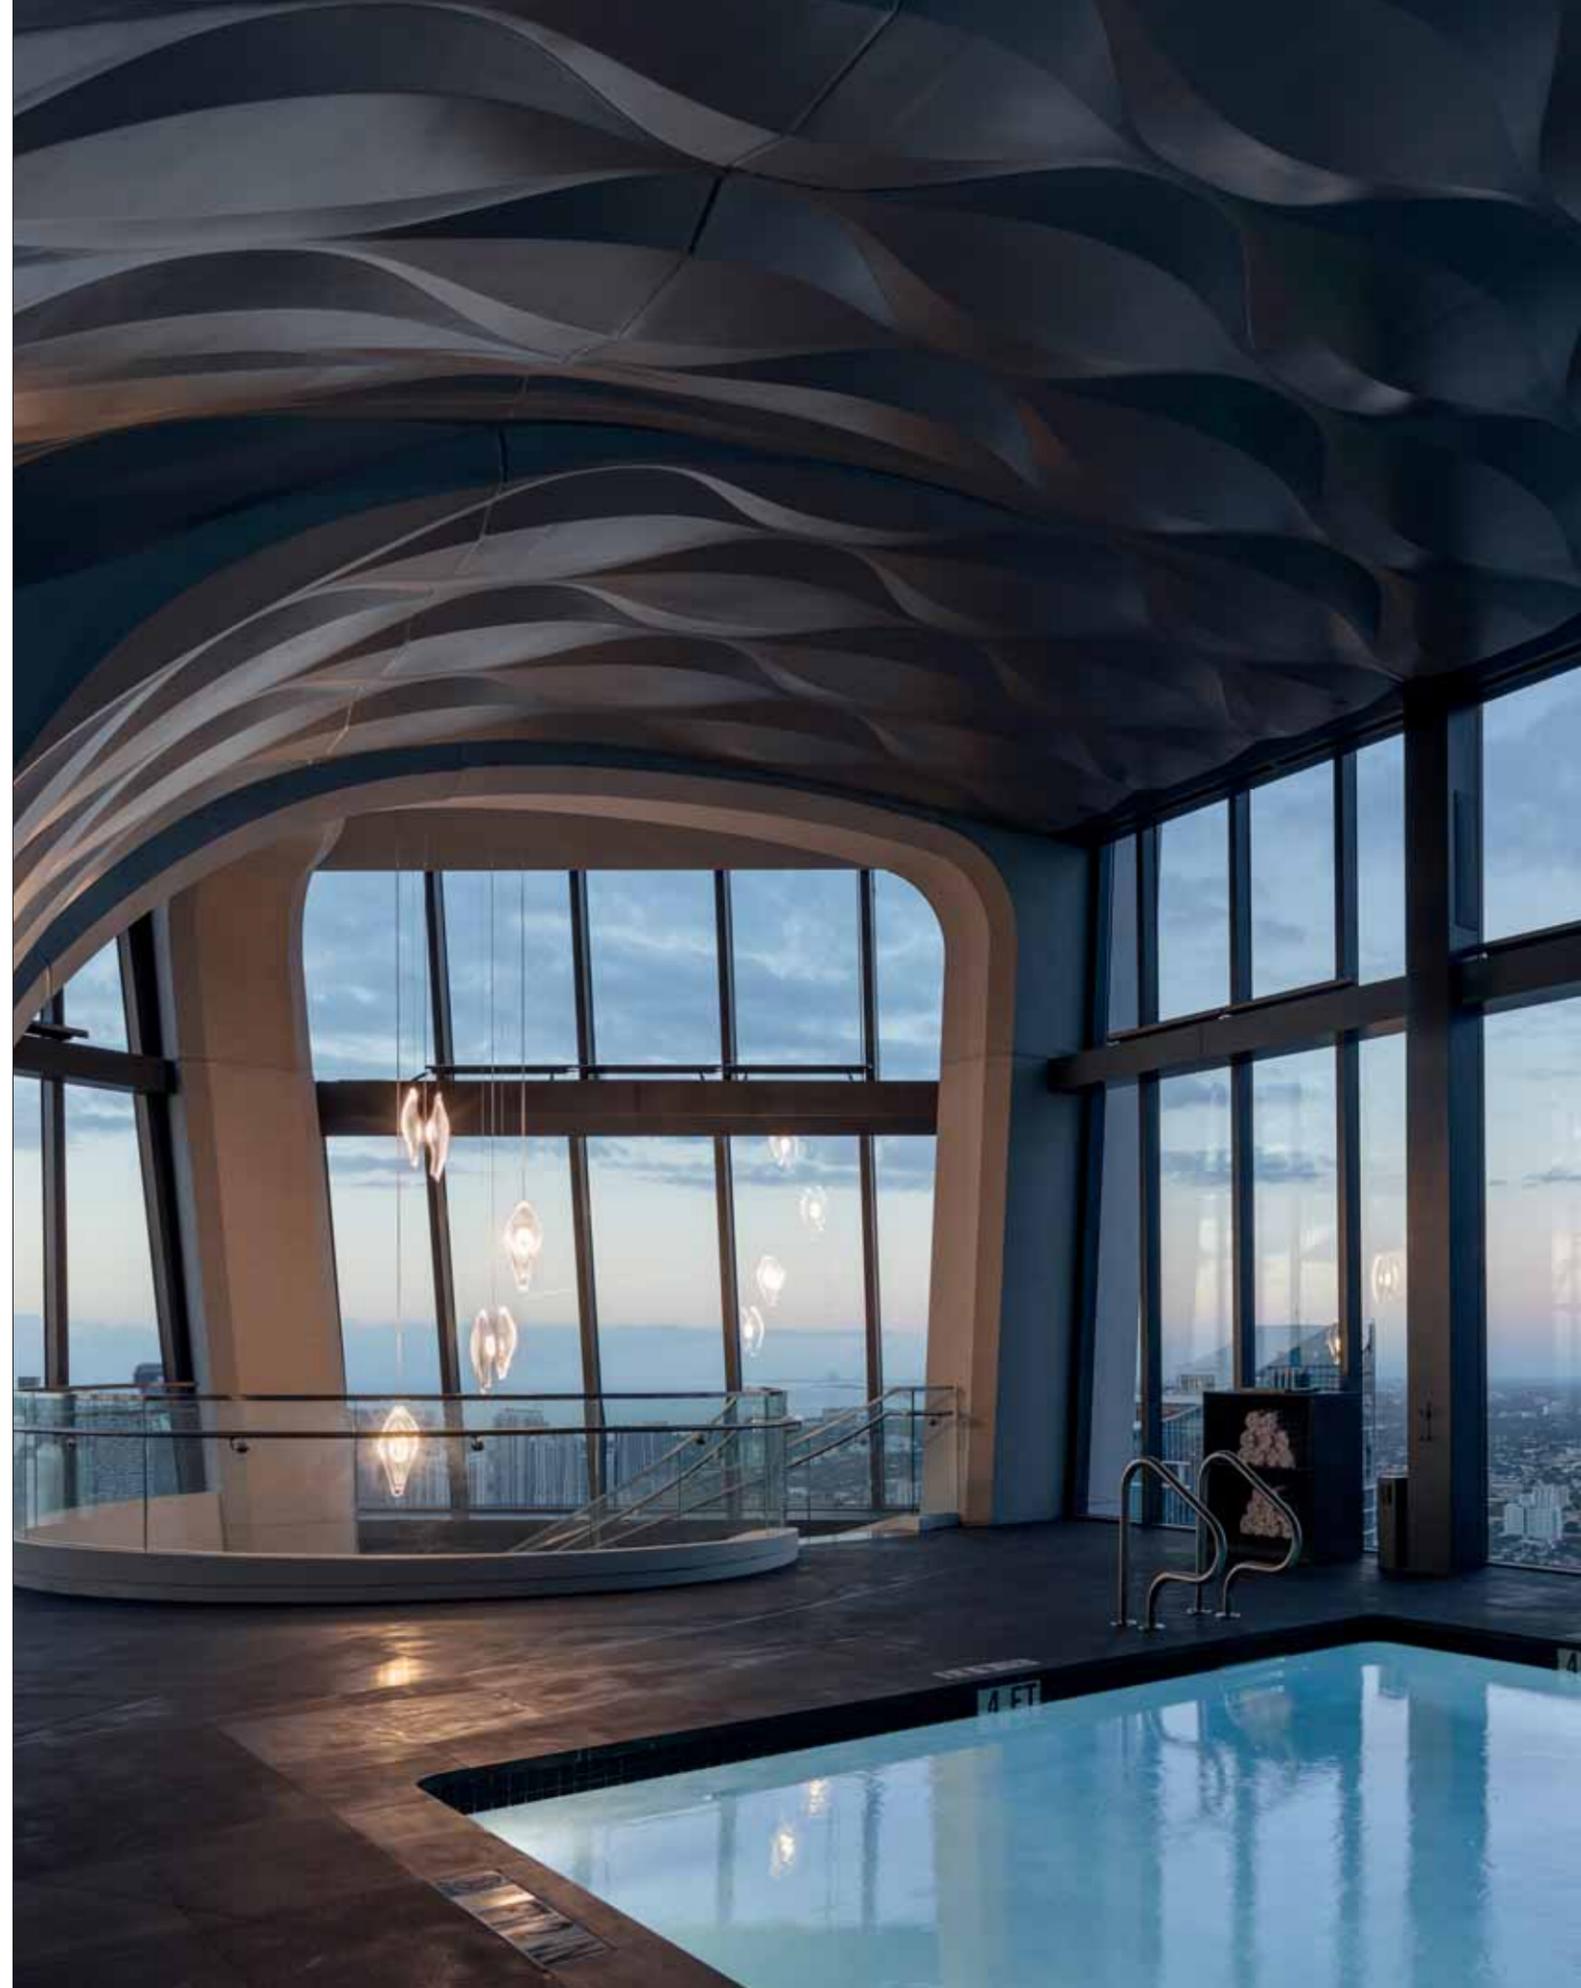

ONE THOUSAND MUSEUM

One of the most luxurious condos in Miami Beach grabs attention from the podium to the crown. The visually striking building is a legacy of the well-renowned architect Zaha Hadid and LASVIT complemented it with lighting developed in collaboration with the famous architect in the past. Both Eve and Dune were created in Hadid's specific design language — the lighting collections are fluid and organic while accentuating the beauty of glass itself.

BELLAGIO

Harkening back to the golden age of Shanghai, the so-called 'Paris of the East', the Bellagio hotel is the perfect place for a fusion of the new with the old, of the traditional with the cutting-edge. The hotel's streamlined art-deco interiors host four LASVIT installations by four top-notch designers, among them the world-renown haute couture mastermind Maurizio Galante, whose installation Plisse transforms flowing fabric into glass.

Suning Real Estate Group

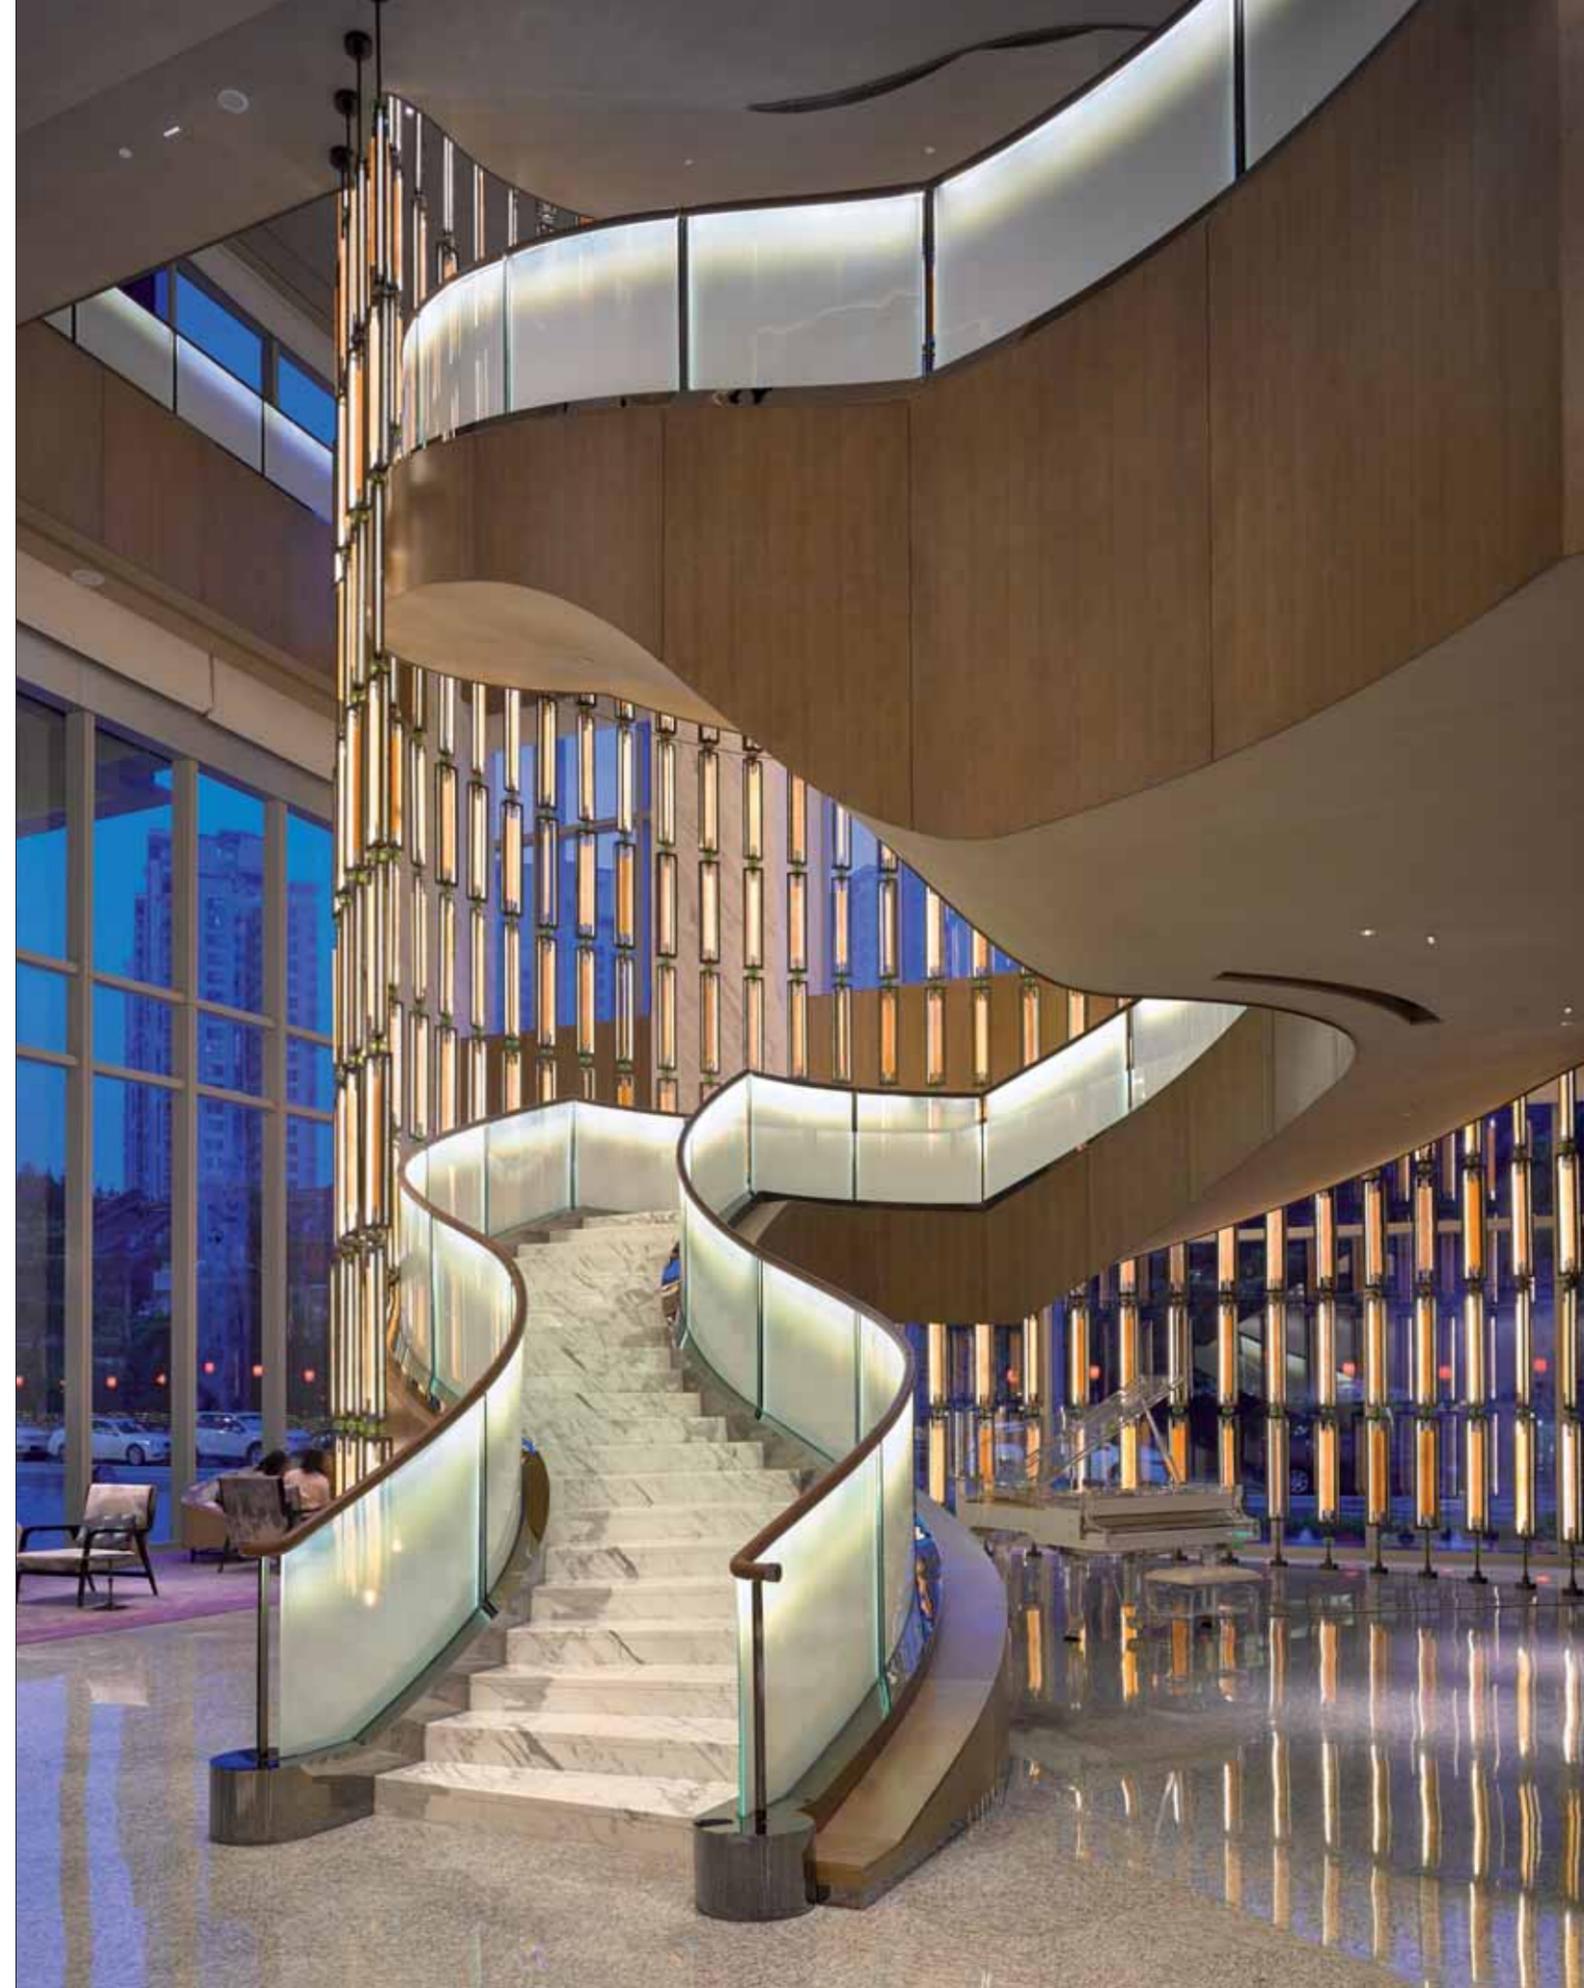

Straddling the banks of the Pearl River, the metropolis of Guangzhou is one of the busiest, most energized and fast-paced places on the planet. That is why LASVIT's staircase installation uses earthen yellow as its main color scheme, which signifies calm neutrality and brings good luck. The plates are made of fuse-glass which not only capture sunlight, but also help disperse the light from the LEDs integrated in its gold-plated metal frame.

FAIRMONT EMPRESS

The luxury Fairmont Empress hotel in Victoria, British Columbia offers 464 beautiful guest rooms and suites, and grandiose meeting and wedding spaces. LASVIT designer Táňa Dvořáková created two unique lighting sculptures using the original 'Twill' technique which connects glass beads into fabric-like textures. The two crystal sculptures, named Twill Flowers, were inspired by rose petals and were designed specifically for the Fairmont Empress.

Lasvit Projects

FOUR SEASONS

The Four Seasons Hotel Kuwait is located in Burj Alshaya, a 205-meter skyscraper in Kuwait City. LASVIT collaborated with international design studio Yabu Pushelberg to create two exceptional lighting sculptures for its lobby. The Diamond is a large crystal weighing 900 kg and featuring 150 prismatic components, and there is also a smaller one weighing 350 kg. Their avant-garde shape provides the perfect backdrop for both business and leisure.

JUMEIRAH AT ETIHAD TOWERS

Etihad Towers in Abu Dhabi combines smart architecture with innovative style and design perfectly suited for such a bustling city. LASVIT's crystal and glass art lighting installations adorn the Ballroom, Grand Lobby, and Pre-Function area. The centerpiece is certainly Oculus — an architectural lighting sculpture weighing 12 tons and consisting of more than 250 000 crystal and 12 800 hand-blown glass components. Its diameter is a full **16 meters!**

SSPD

MANDARIN ORIENTAL

While the Mandarin Oriental brings its Eastern flare and signature wellness treatments, the design of the facilities resonates with local Turkish style in a bold contemporary approach. The innovative installation of the Weave sculptures makes use of LASVIT's occasionally overlooked craft — metalwork. Following the spirit of traditional Turkish lanterns, the sculptures create an intriguing filigree of shadow patterns in the hotel lobby's interior.

PALAZZO VERSACE

A mere 15-minute drive from the Dubai airport brings you to a luxury hotel reminiscent of a 16th-century Italian Palace — Palazzo Versace Dubai. The tiles, lights, fabrics, tableware — everything is designed and tailor-made by the eponymous House of Versace. LASVIT's installation Golden Breeze is prominent above the mosaic on the main floor. Its classic Versace floral pattern brings delicacy to a formidable 3000 kg work of hand-blown glass.

Lasvit Projects

THE LANGHAM

LASVIT's in-house designers Jana Růžičková and Tomáš Hovorka, in collaboration with London's Richmond International, have developed two elegant and expansive glass art installations for the Langham Hotel in Chicago. The installation Pebble Stones comprises of hand-blown glass pebbles suspended at varying distances and lit from above with LEDs. As the guests move through the hotel, the pebbles shine in subdued blue, silver, bronze and copper hues.

THE PENINSULA

At 19 Avenue Kléber, just steps away from the Arc de Triomphe, The Peninsula hotel is in the very heart of Paris. In its classical lobby there is a gust of wind, scattering a drove of leaves which the approaching winter froze in their place, forever suspended in the chilly Parisian air. LASVIT's Dancing Leaves consists of hundreds of glass originals frozen in time and space, giving an earthy vibe to the hotel's otherwise chic urban interior.

ALAIN DUCASSE AT MORPHEUS HOTEL

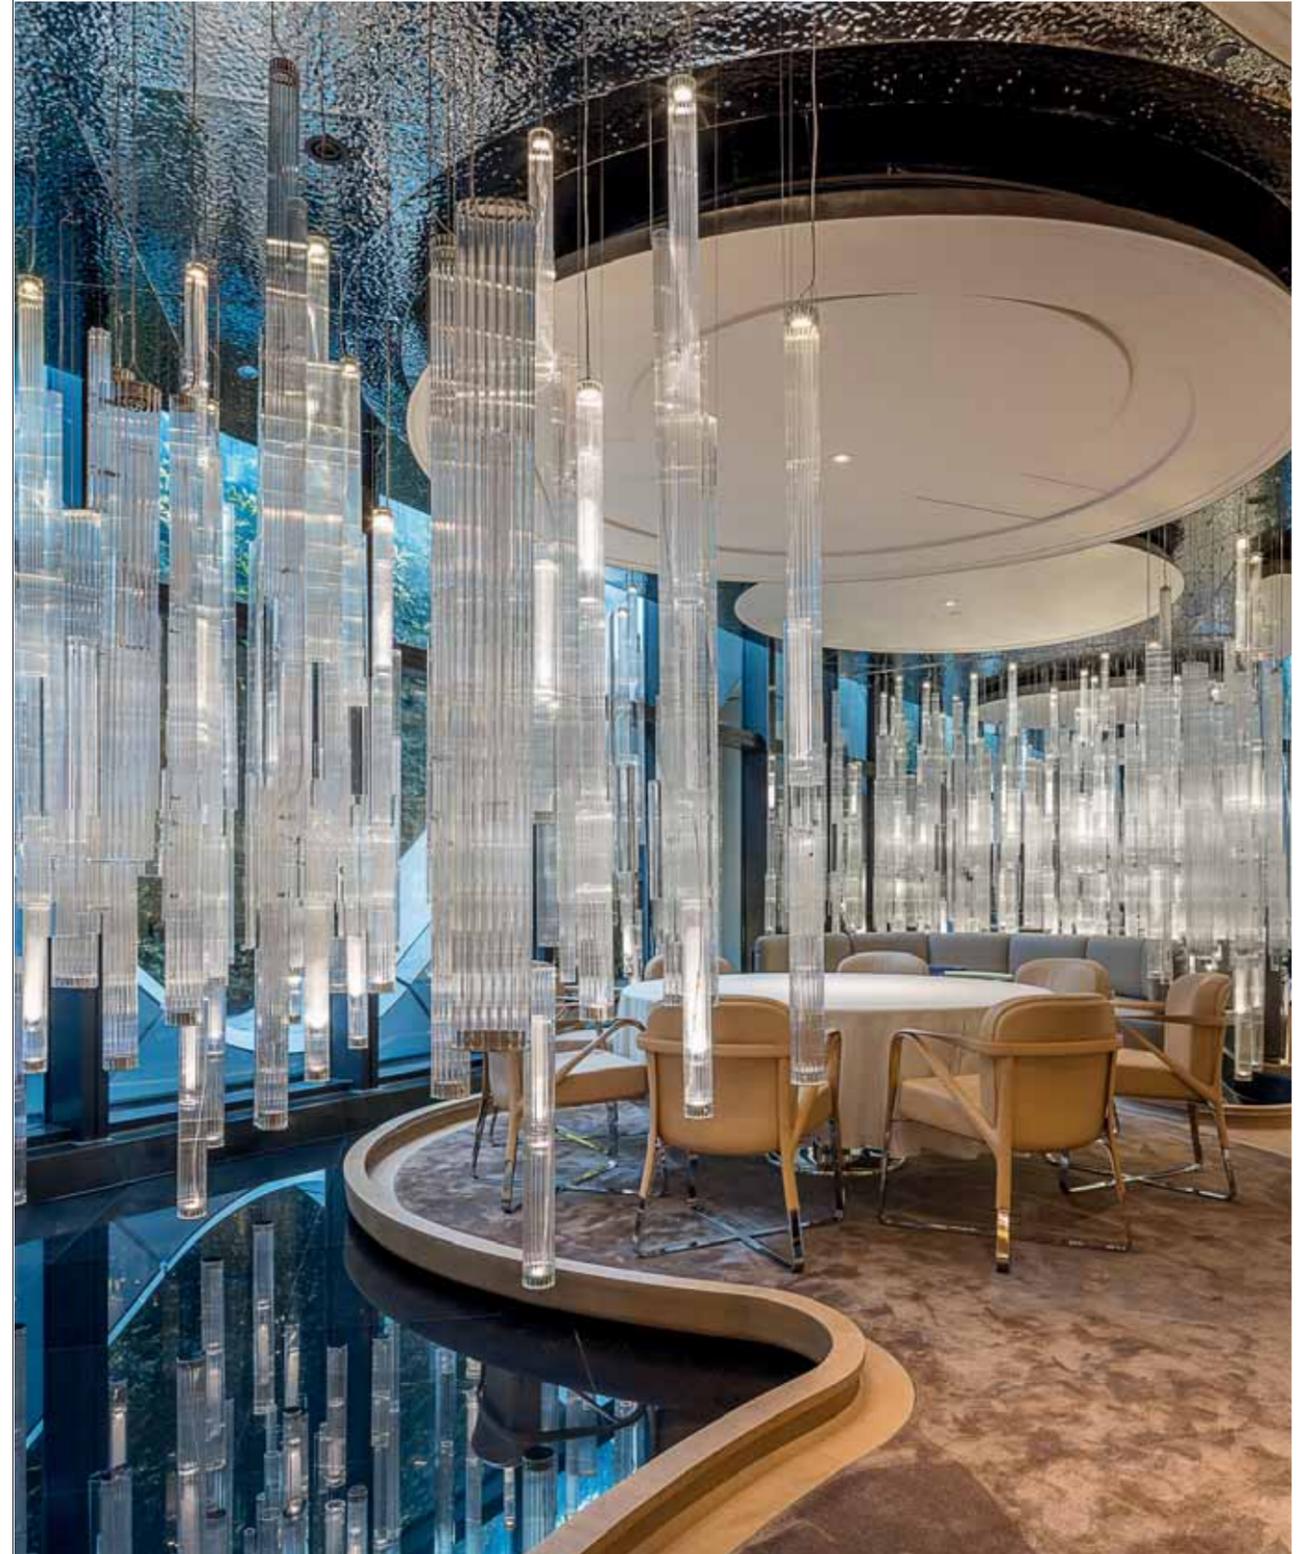

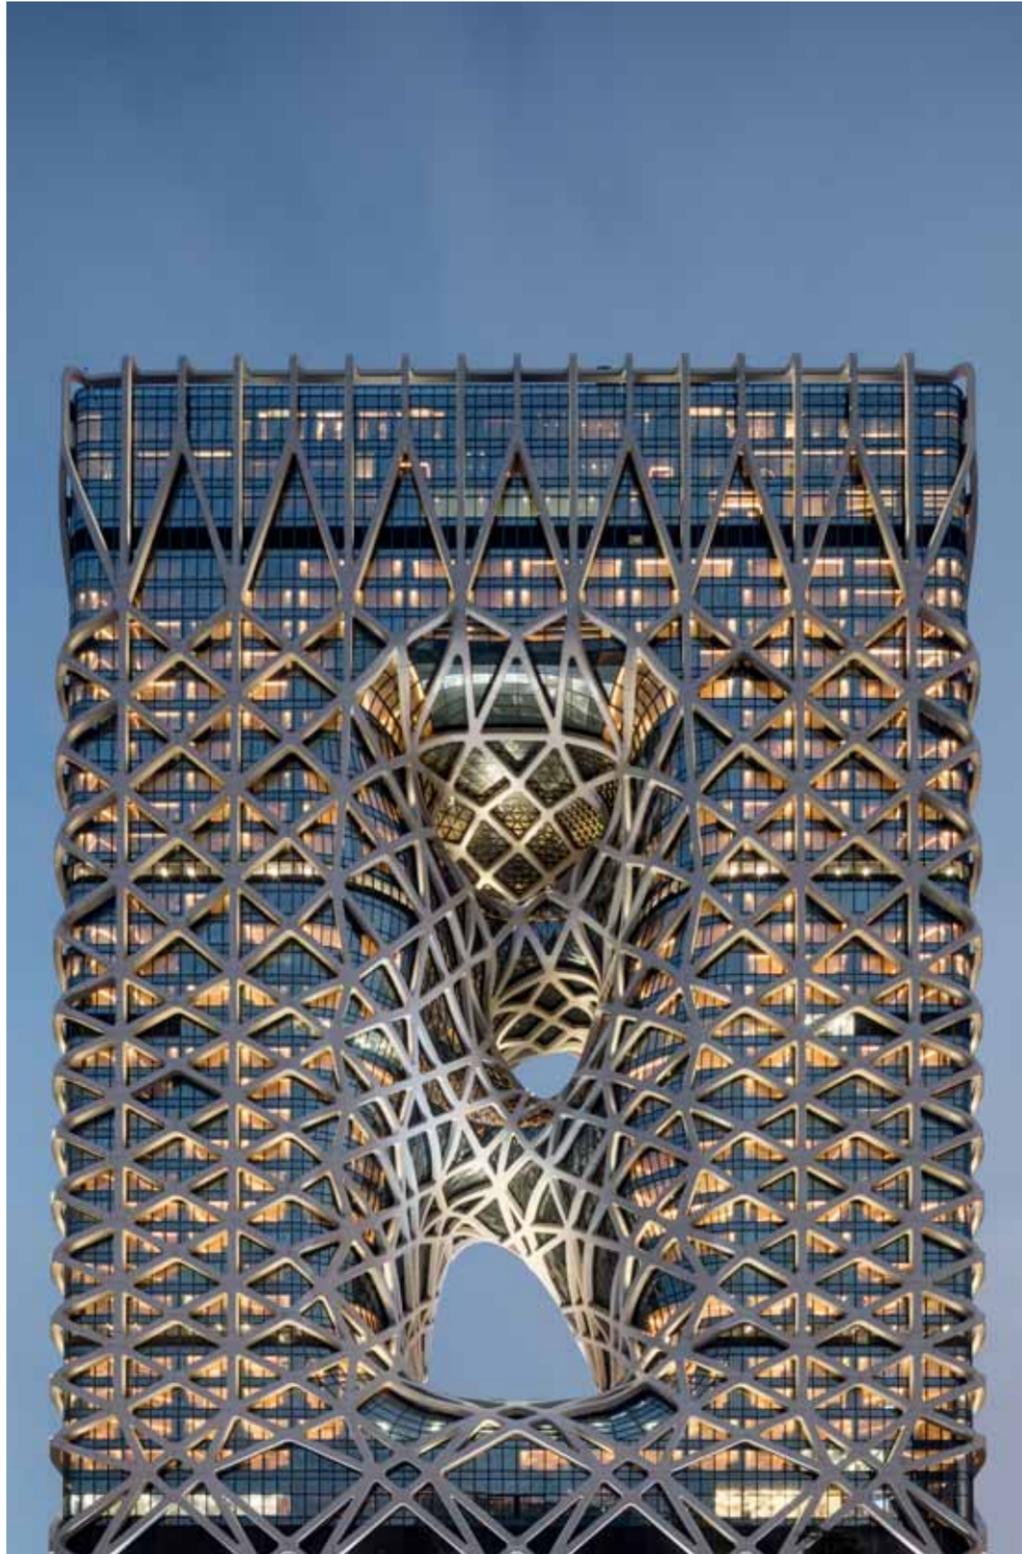

In mythology, Morpheus is the God of Dreams. He steps into Dreamland, where everything is possible. In the eponymous building designed by famous Zaha Hadid Architects you can feel like you are in a dream. But in this dream, there is a restaurant led by Michelin superstar Alain Ducasse. This restaurant is flooded with light created by LASVIT and feels like a true sanctuary. But this time, it's not in your head — it's real.

Lasvit Projects

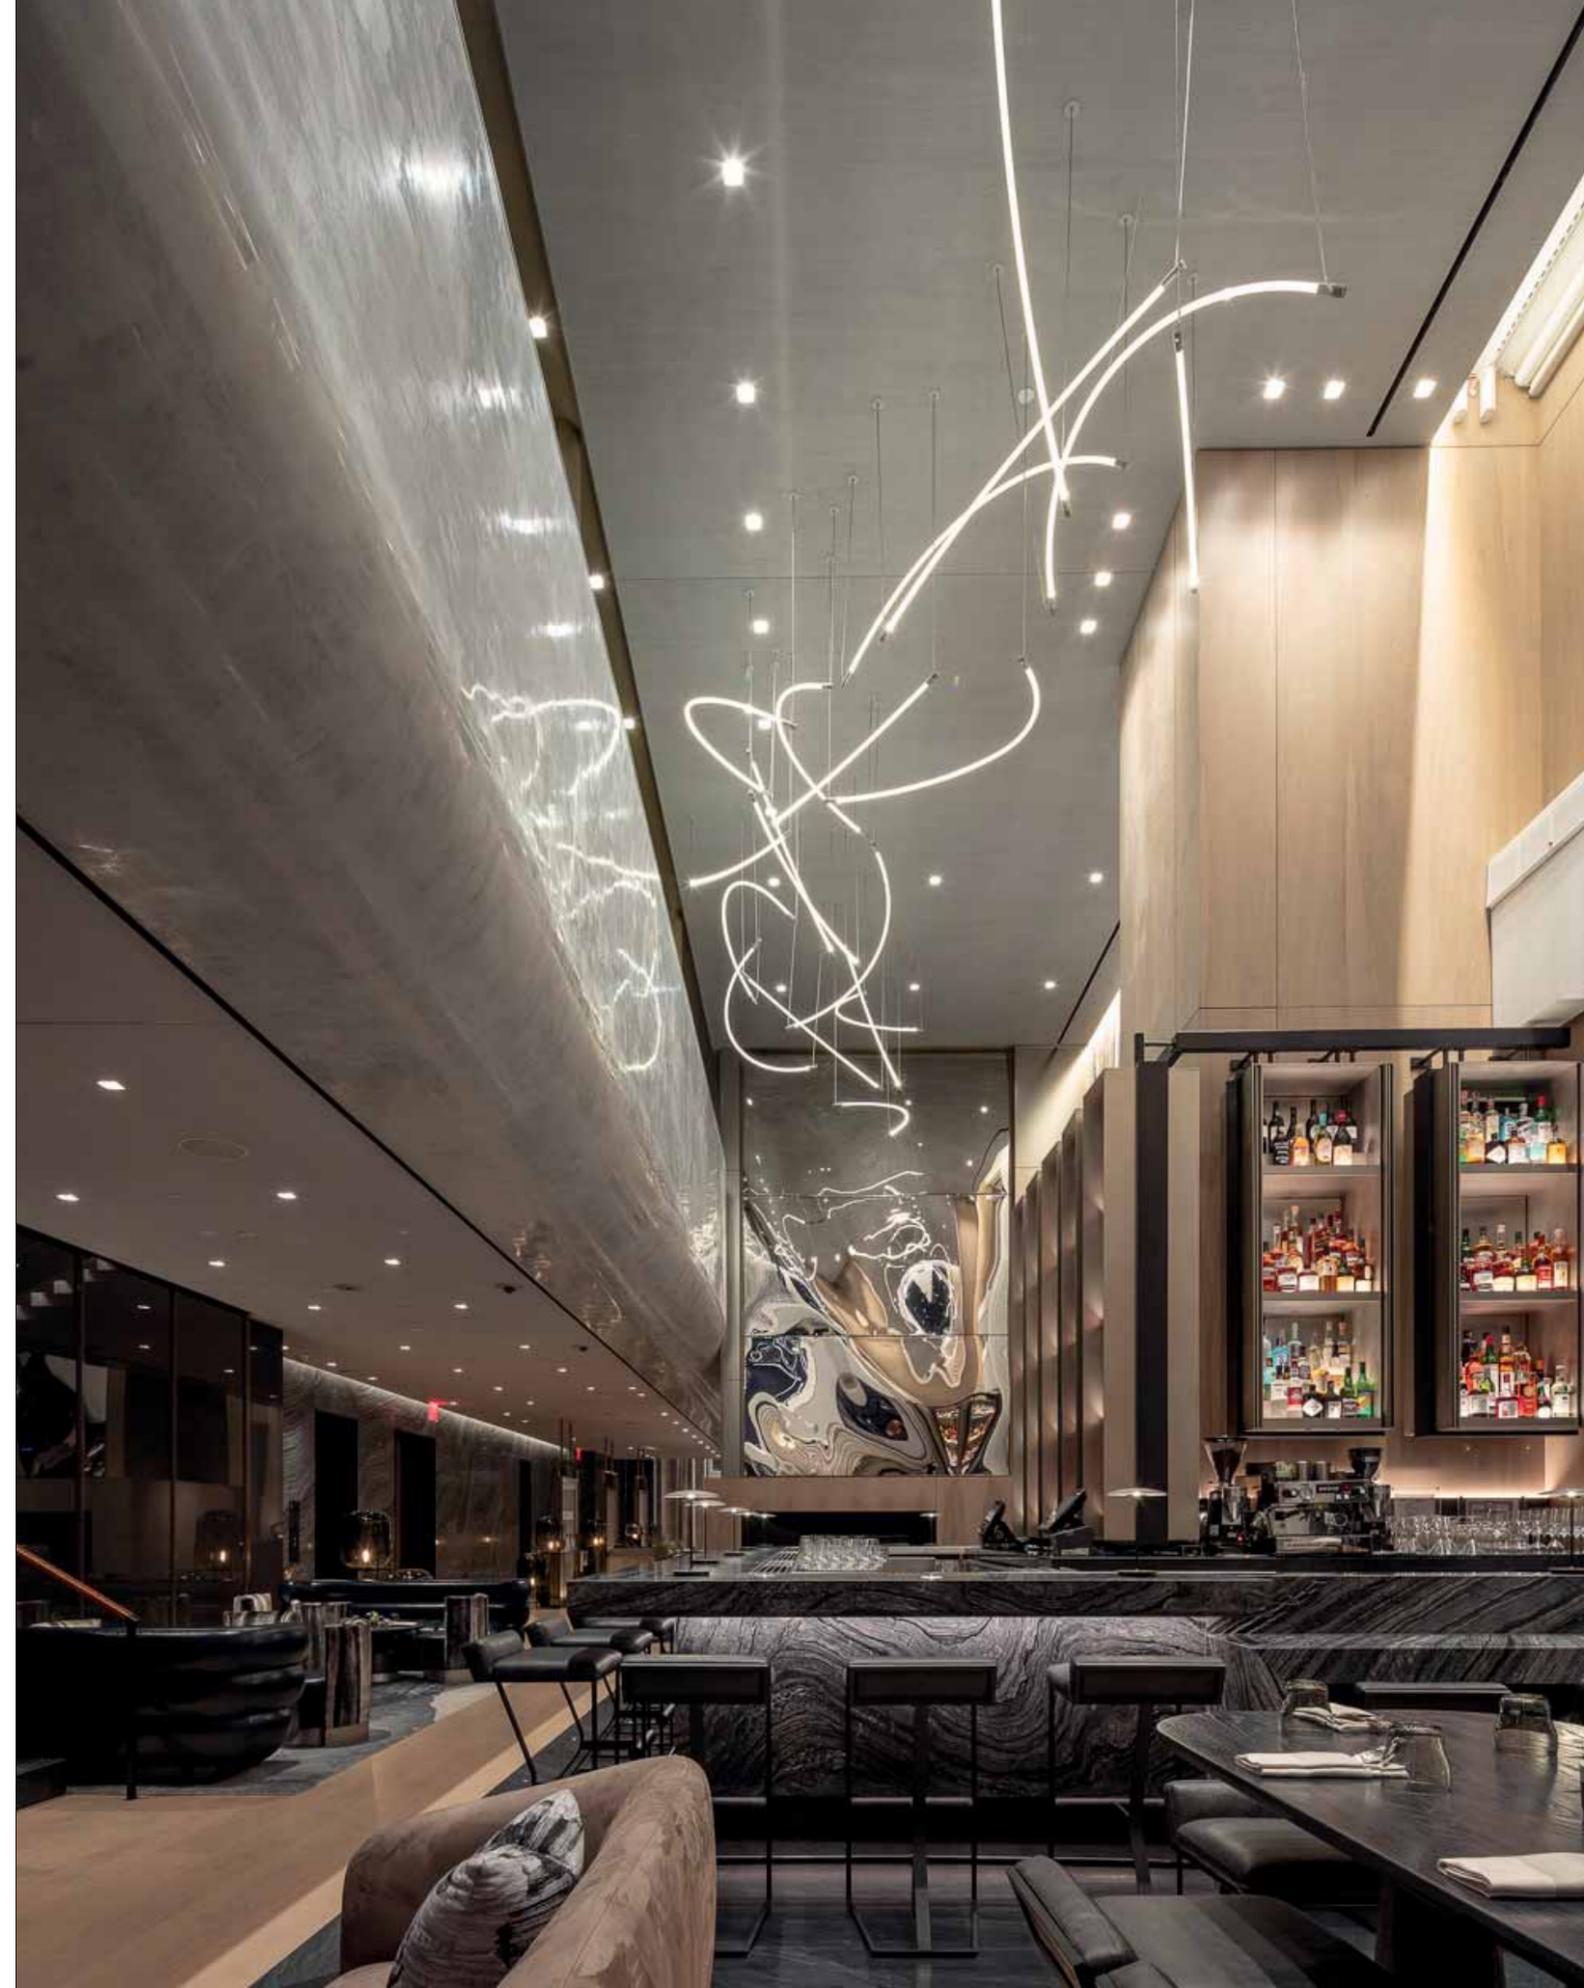

EQUINOX HUDSON YARDS

Follow the lines of light, and step into a place that defines the fitness lifestyle of the future. The Flash in the Equinox hotel lets you feel the moment when lighting strikes, when dazzling lines cut through the sky and ozone can be felt in the air. It is made from specially bent lighting tubes with customized LED chips which can change color, and give the best backlighting for staying energized. The Flash keeps you on your toes.

The Flash

Lasvit Projects

FOUR SEASONS

These palms aren't casting a shadow. On the contrary, these pendants were shaped to resemble the leaves of a Bismarck Palm Tree. Unlike many other palm trees, this one has leaves very similar to hands with outstretched fingers arranged in playful shapes. The installation reflects the same palm trees growing in front of the hotel, and when the night is right you can bask in the light of the glass palms while hearing palm leaves rustle in the wind.

Palm Grove

Lasvit Projects

GRAND PLAZA MÖVENPICK

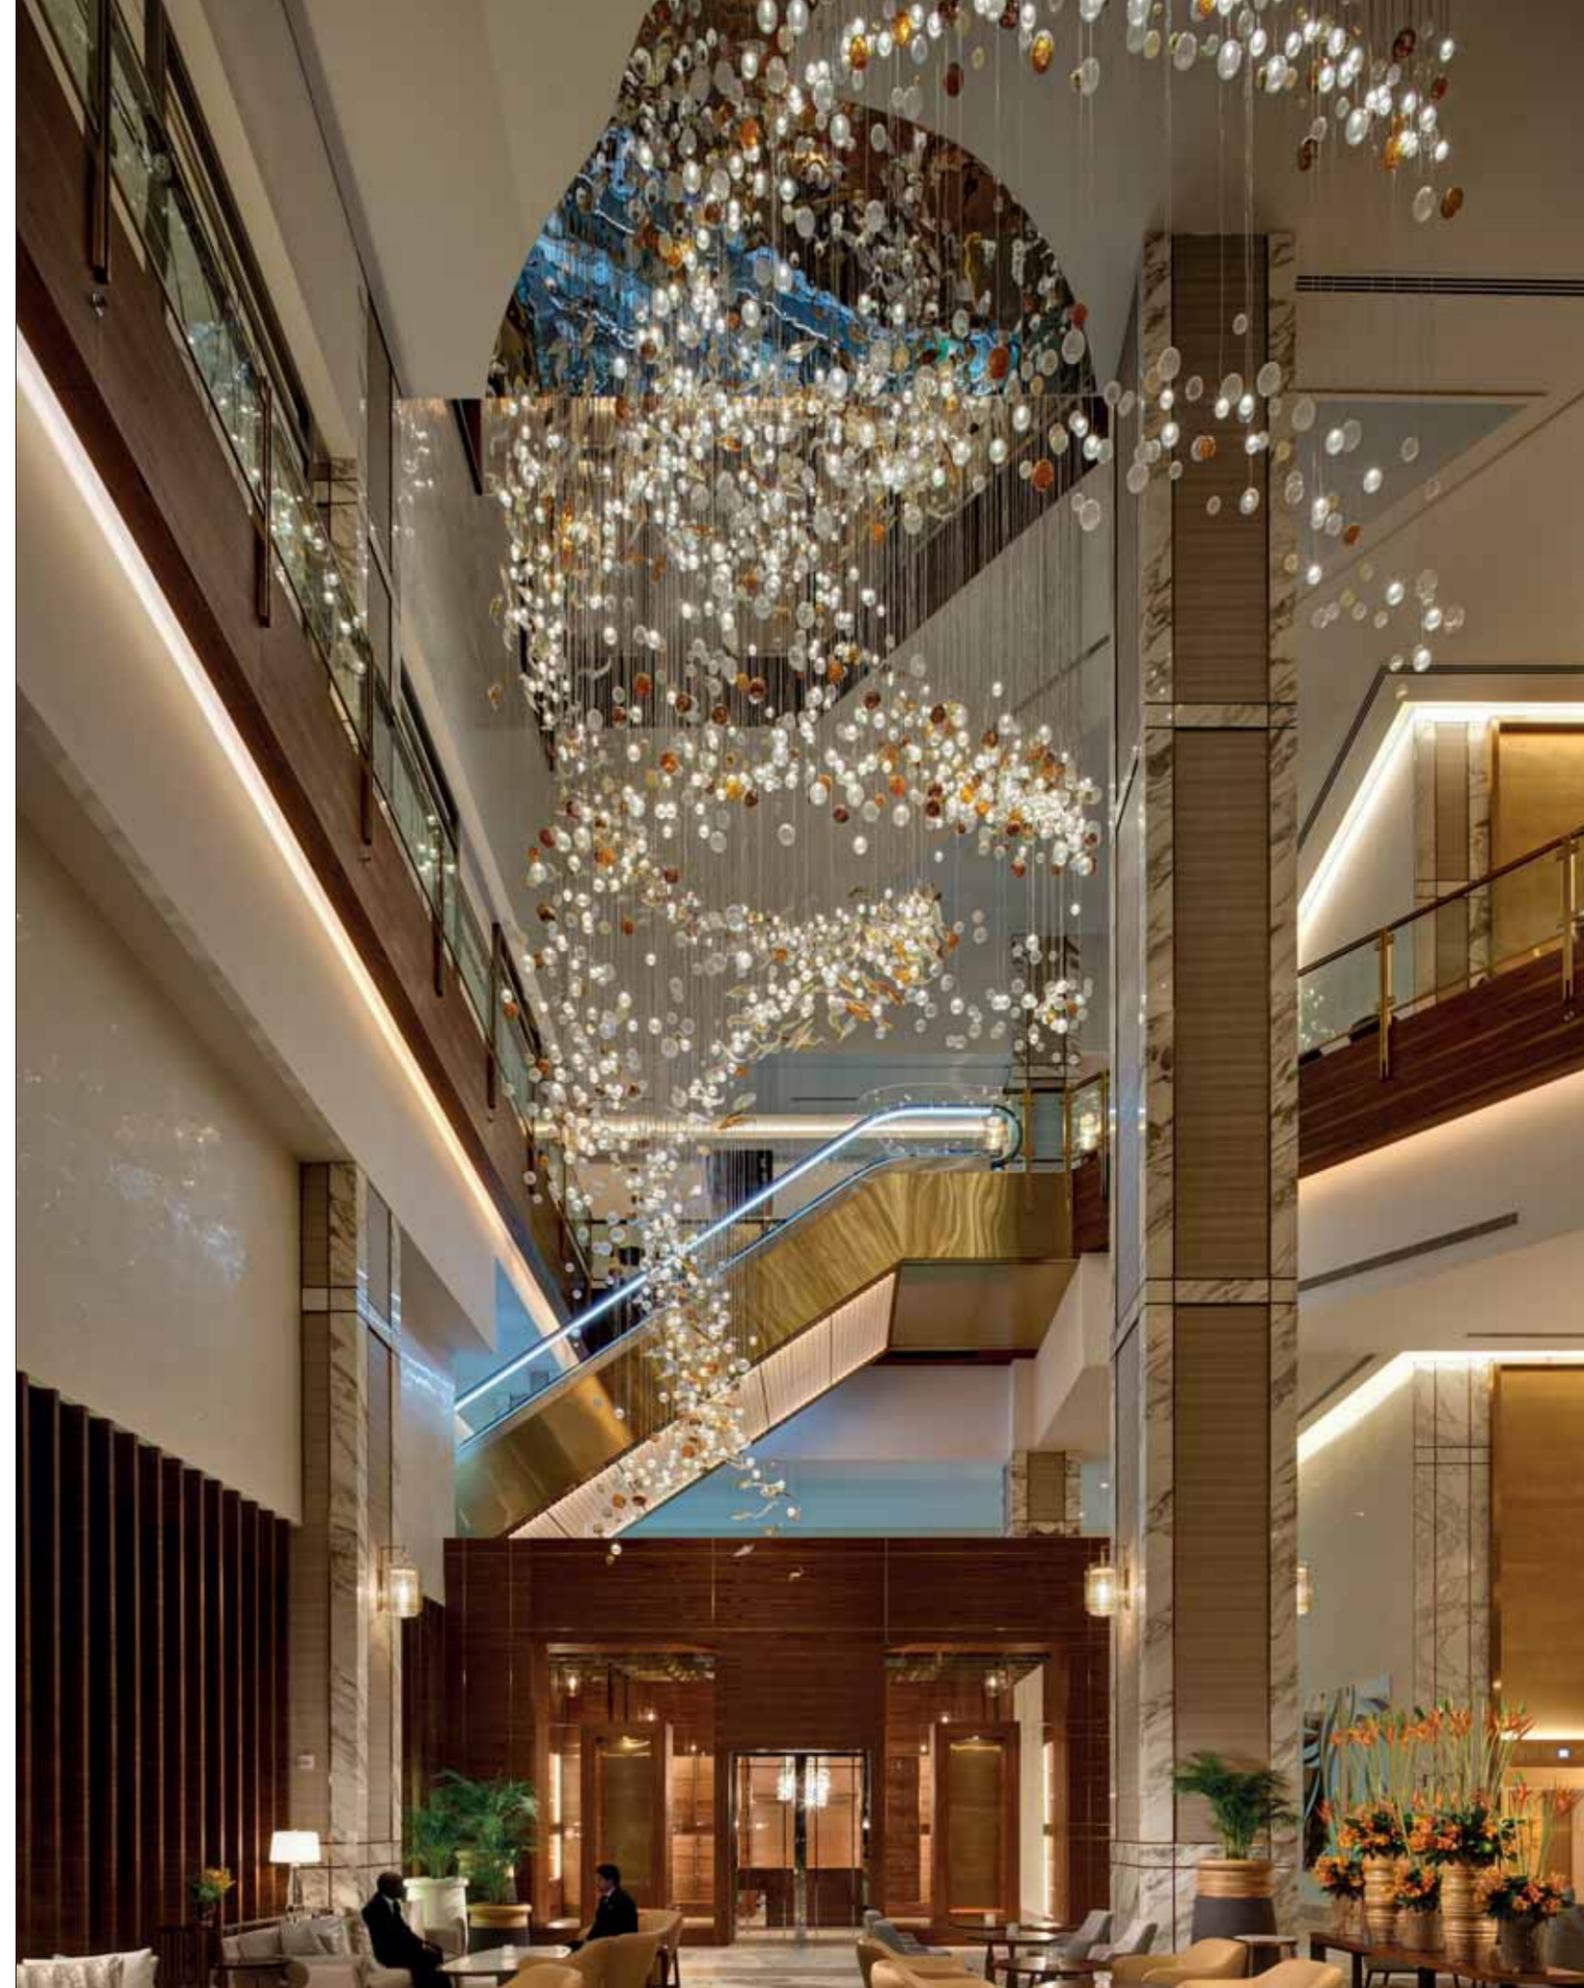

The Swoop is inspired by the fast and focused flight of birds, and by the Mövenpick brand, who have a seagull in their official logo.

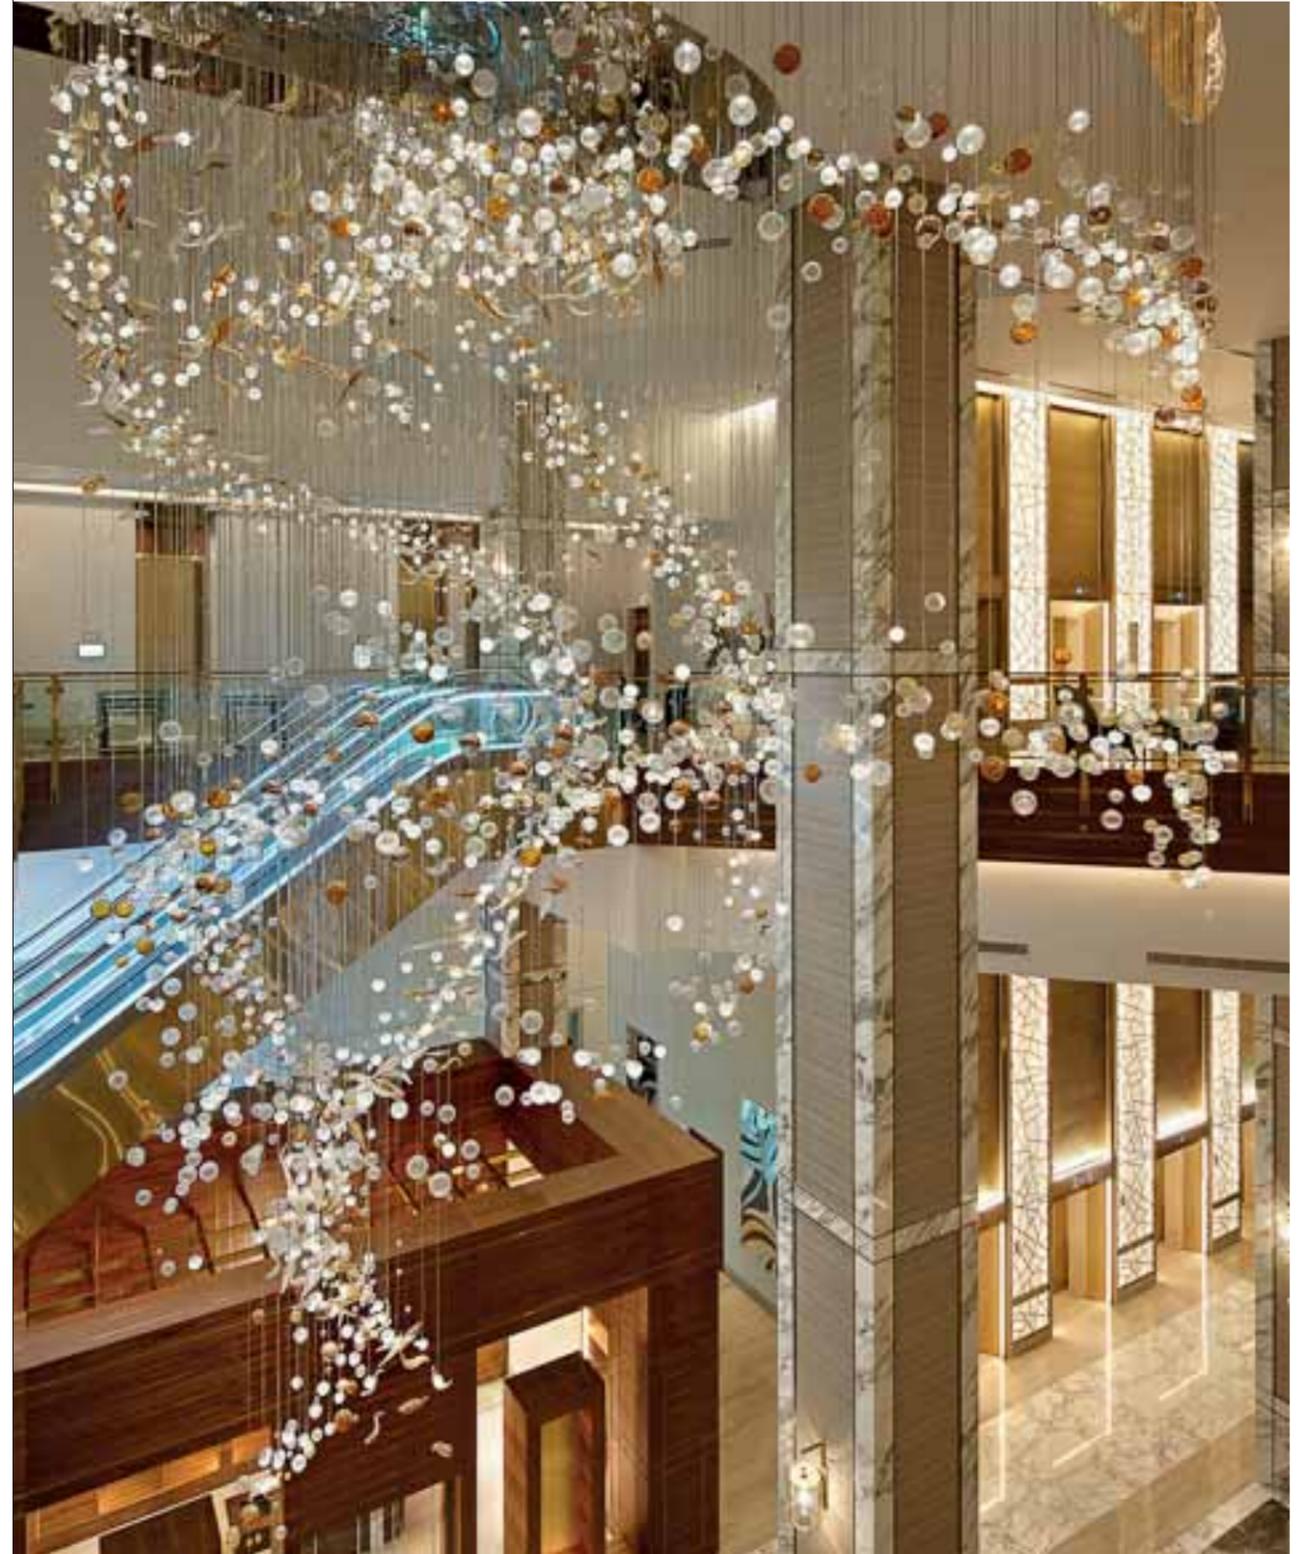

The installation is dynamically lit for added effect, and the installation's 3544 hand-made glass pieces, which weigh in at almost 4,5 tons, swoop down over the patron's heads. LASVIT worked to put the visitors right in the center of a sleek flock of gulls. Can you feel the sudden lift under your wings?

Lasvit Projects

GREAT SCOTLAND YARD

In the late 1800s, a ruthless, all-female gang called The Forty Elephants ran London's biggest shoplifting racket. Diamonds, gold, crystals, and cash, all would be tucked away in the girders and muffs of the ladies' Victorian garments, and LASVIT has commemorated this strange chapter in London's criminal history with the installation Diamond's Hostage, now hanging in the Great Scotland Yard Hotel. Glass is now a girl's best friend.

The 40 Elephants Bar

Lasvit Product Designer / Linda Vránová

Lasvit Projects

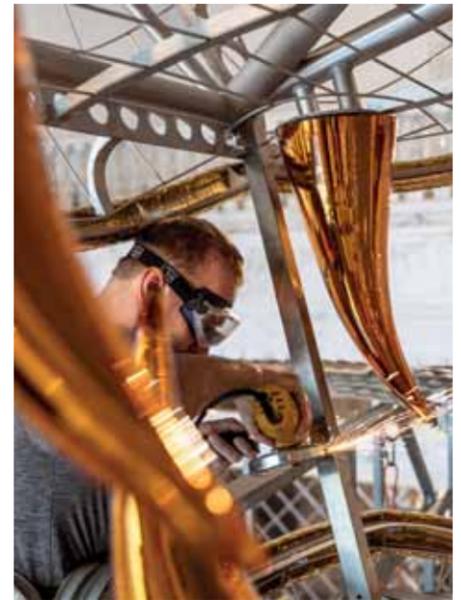

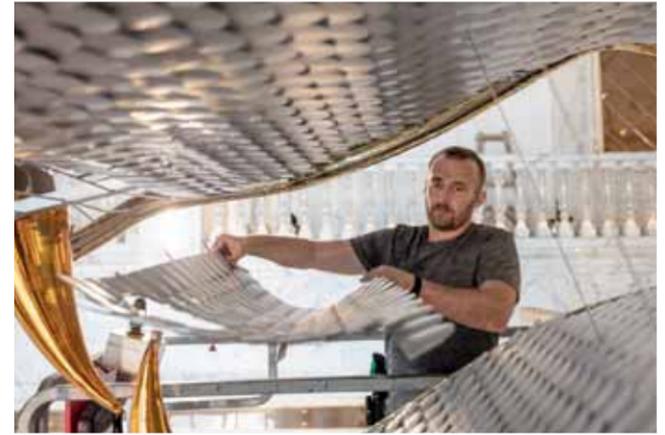

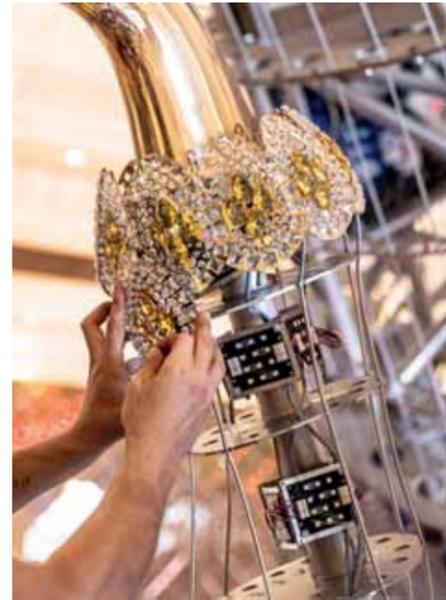

Two dragons fighting over a flaming pearl is an image from ancient Chinese mythology, but myth turned to reality in the biggest project LASVIT has ever undertaken, which took over 3 years to complete. The two dragons' bodies are covered with an astounding 13 thousand stainless steel scales fitted with over 2,5 million Swarovski crystals. LASVIT used the four elements of Fire, Earth, Air, and Water to create magnificent crystal creatures.

The Dragons

INTERCONTINENTAL HOTEL

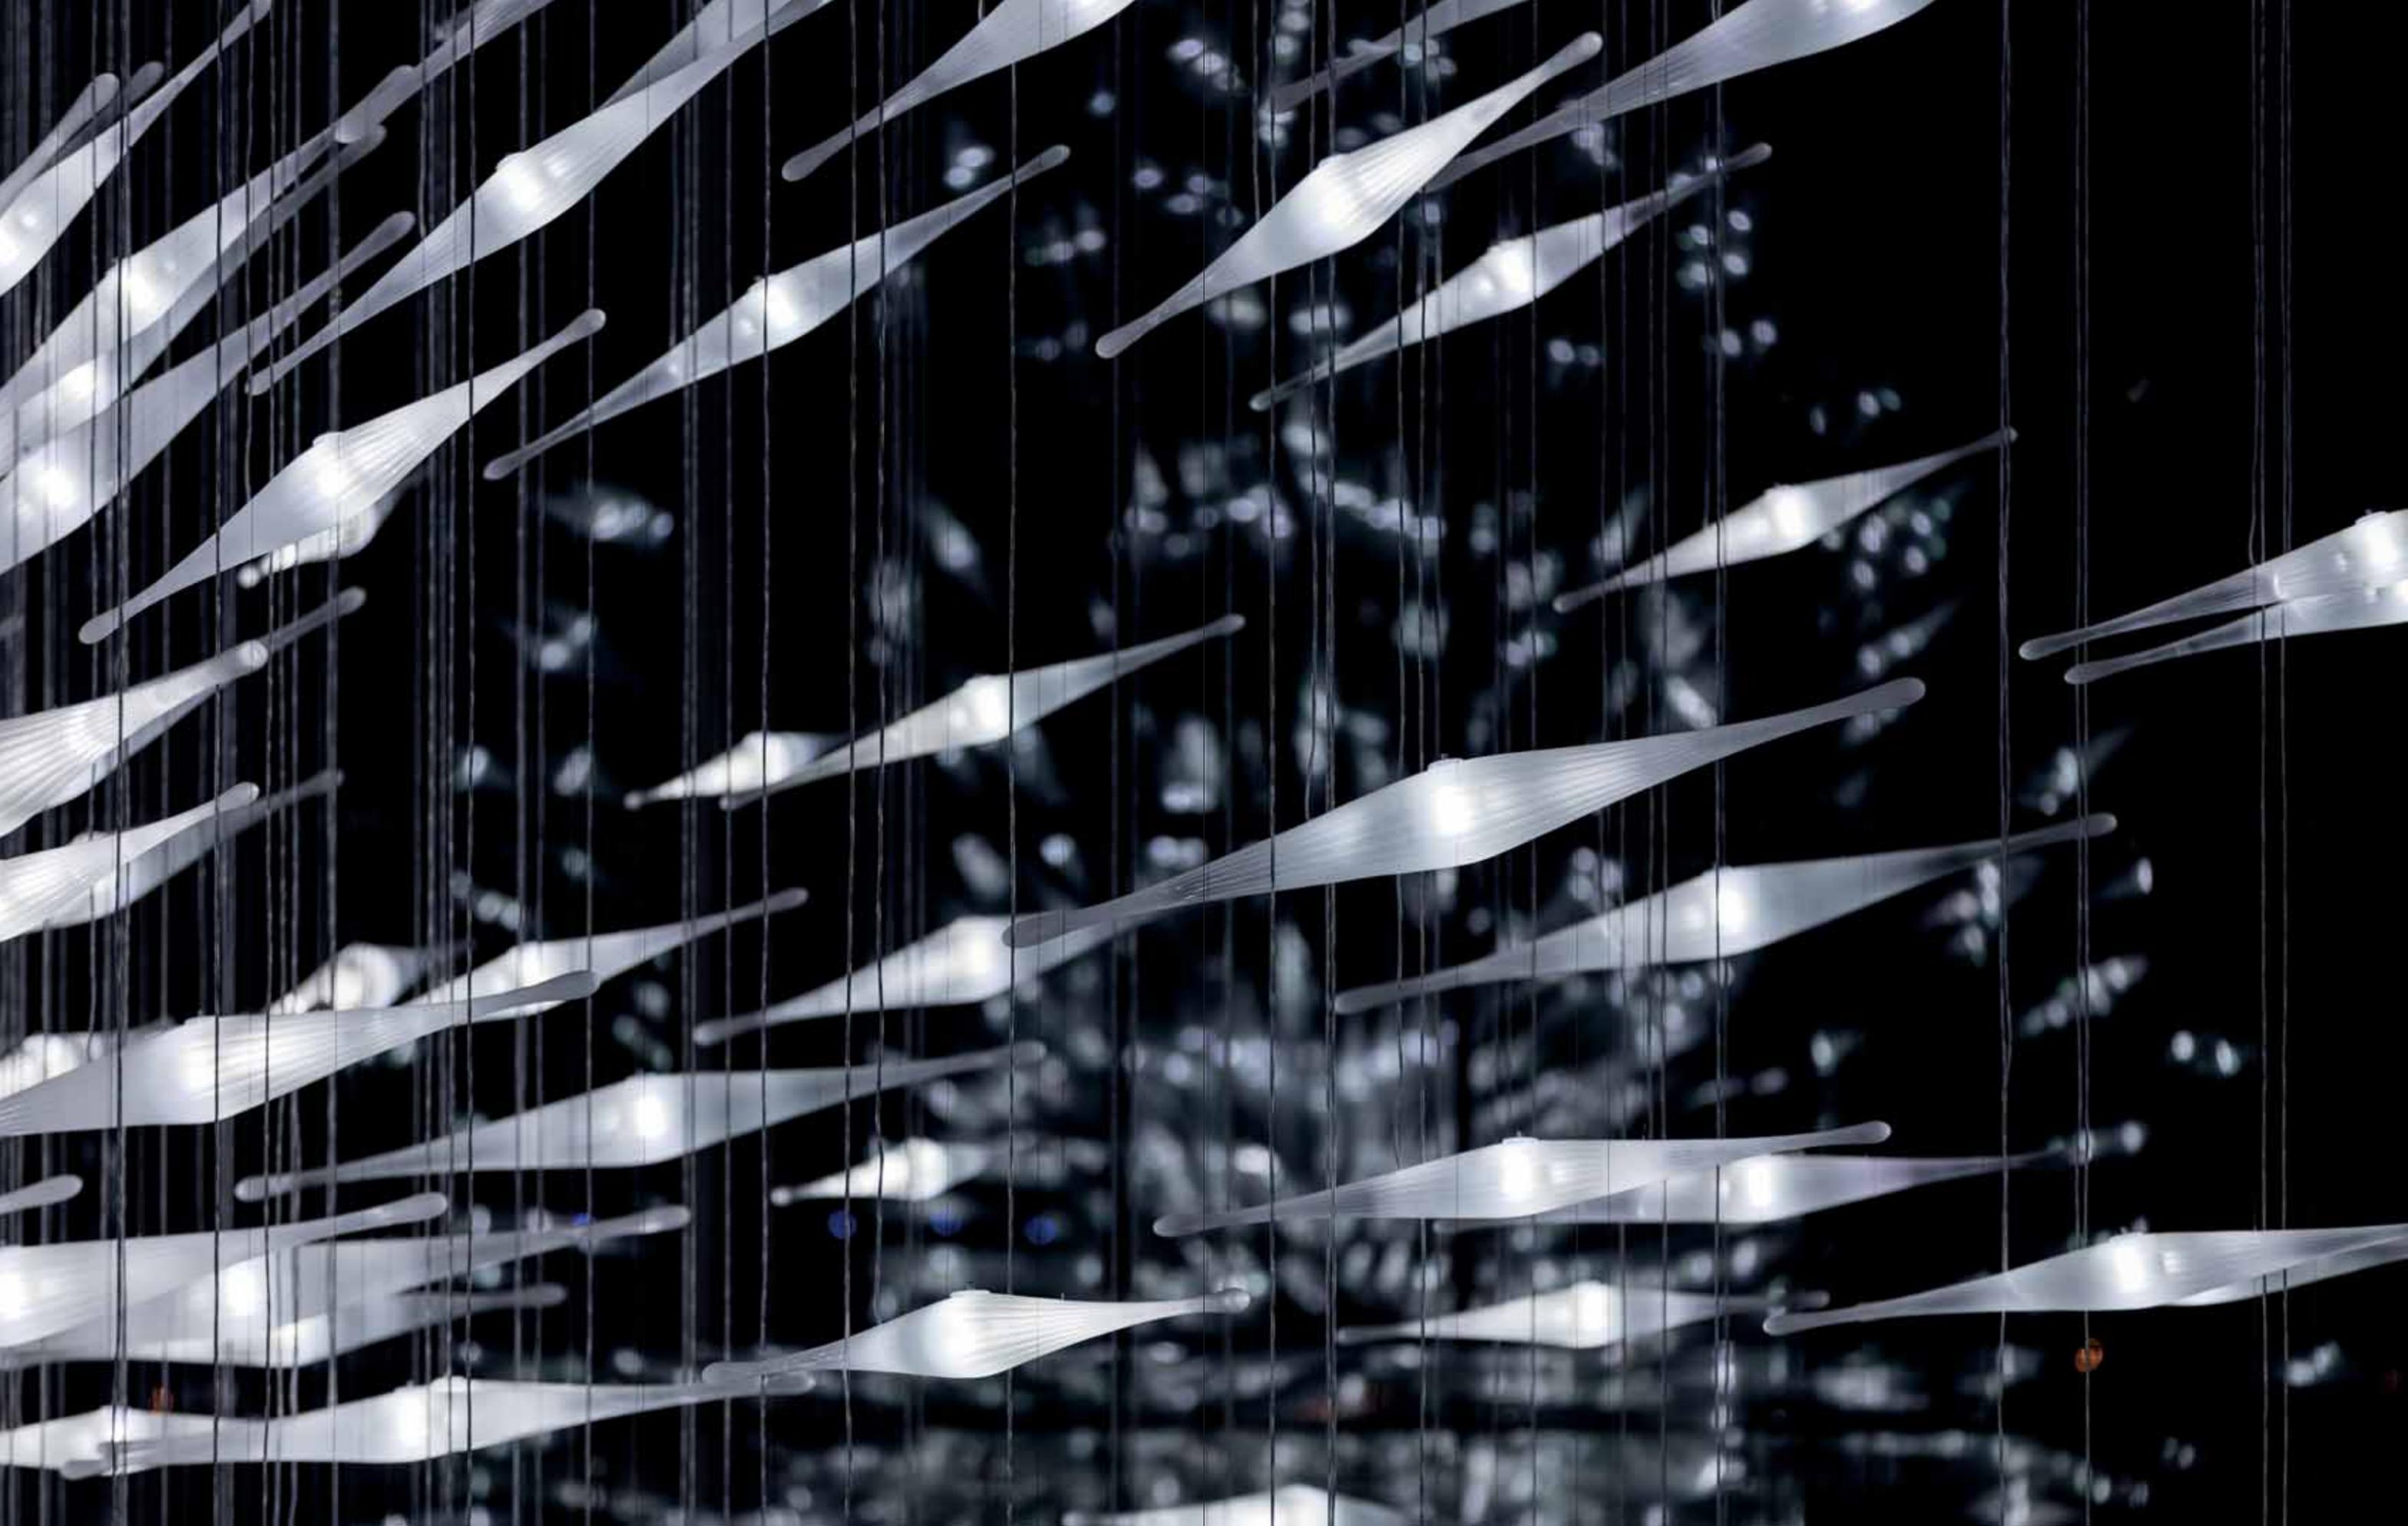

People have stopped looking at the stars above them, but sometimes they are closer than you might think. Come look at the star captured inside the Intercontinental hotel in Tianjin.

The star reaches 27 meters in height and 20 meters in width, creating a dynamically-lit lighting installation as large as a ten-storey building. If you stand there and look at it, you know you are never far away from space and its endless beauty. You are part of it.

Felix Stella

Interior Designer / CCD Shenzhen
Lasvit Product Designer / Jana Růžičková

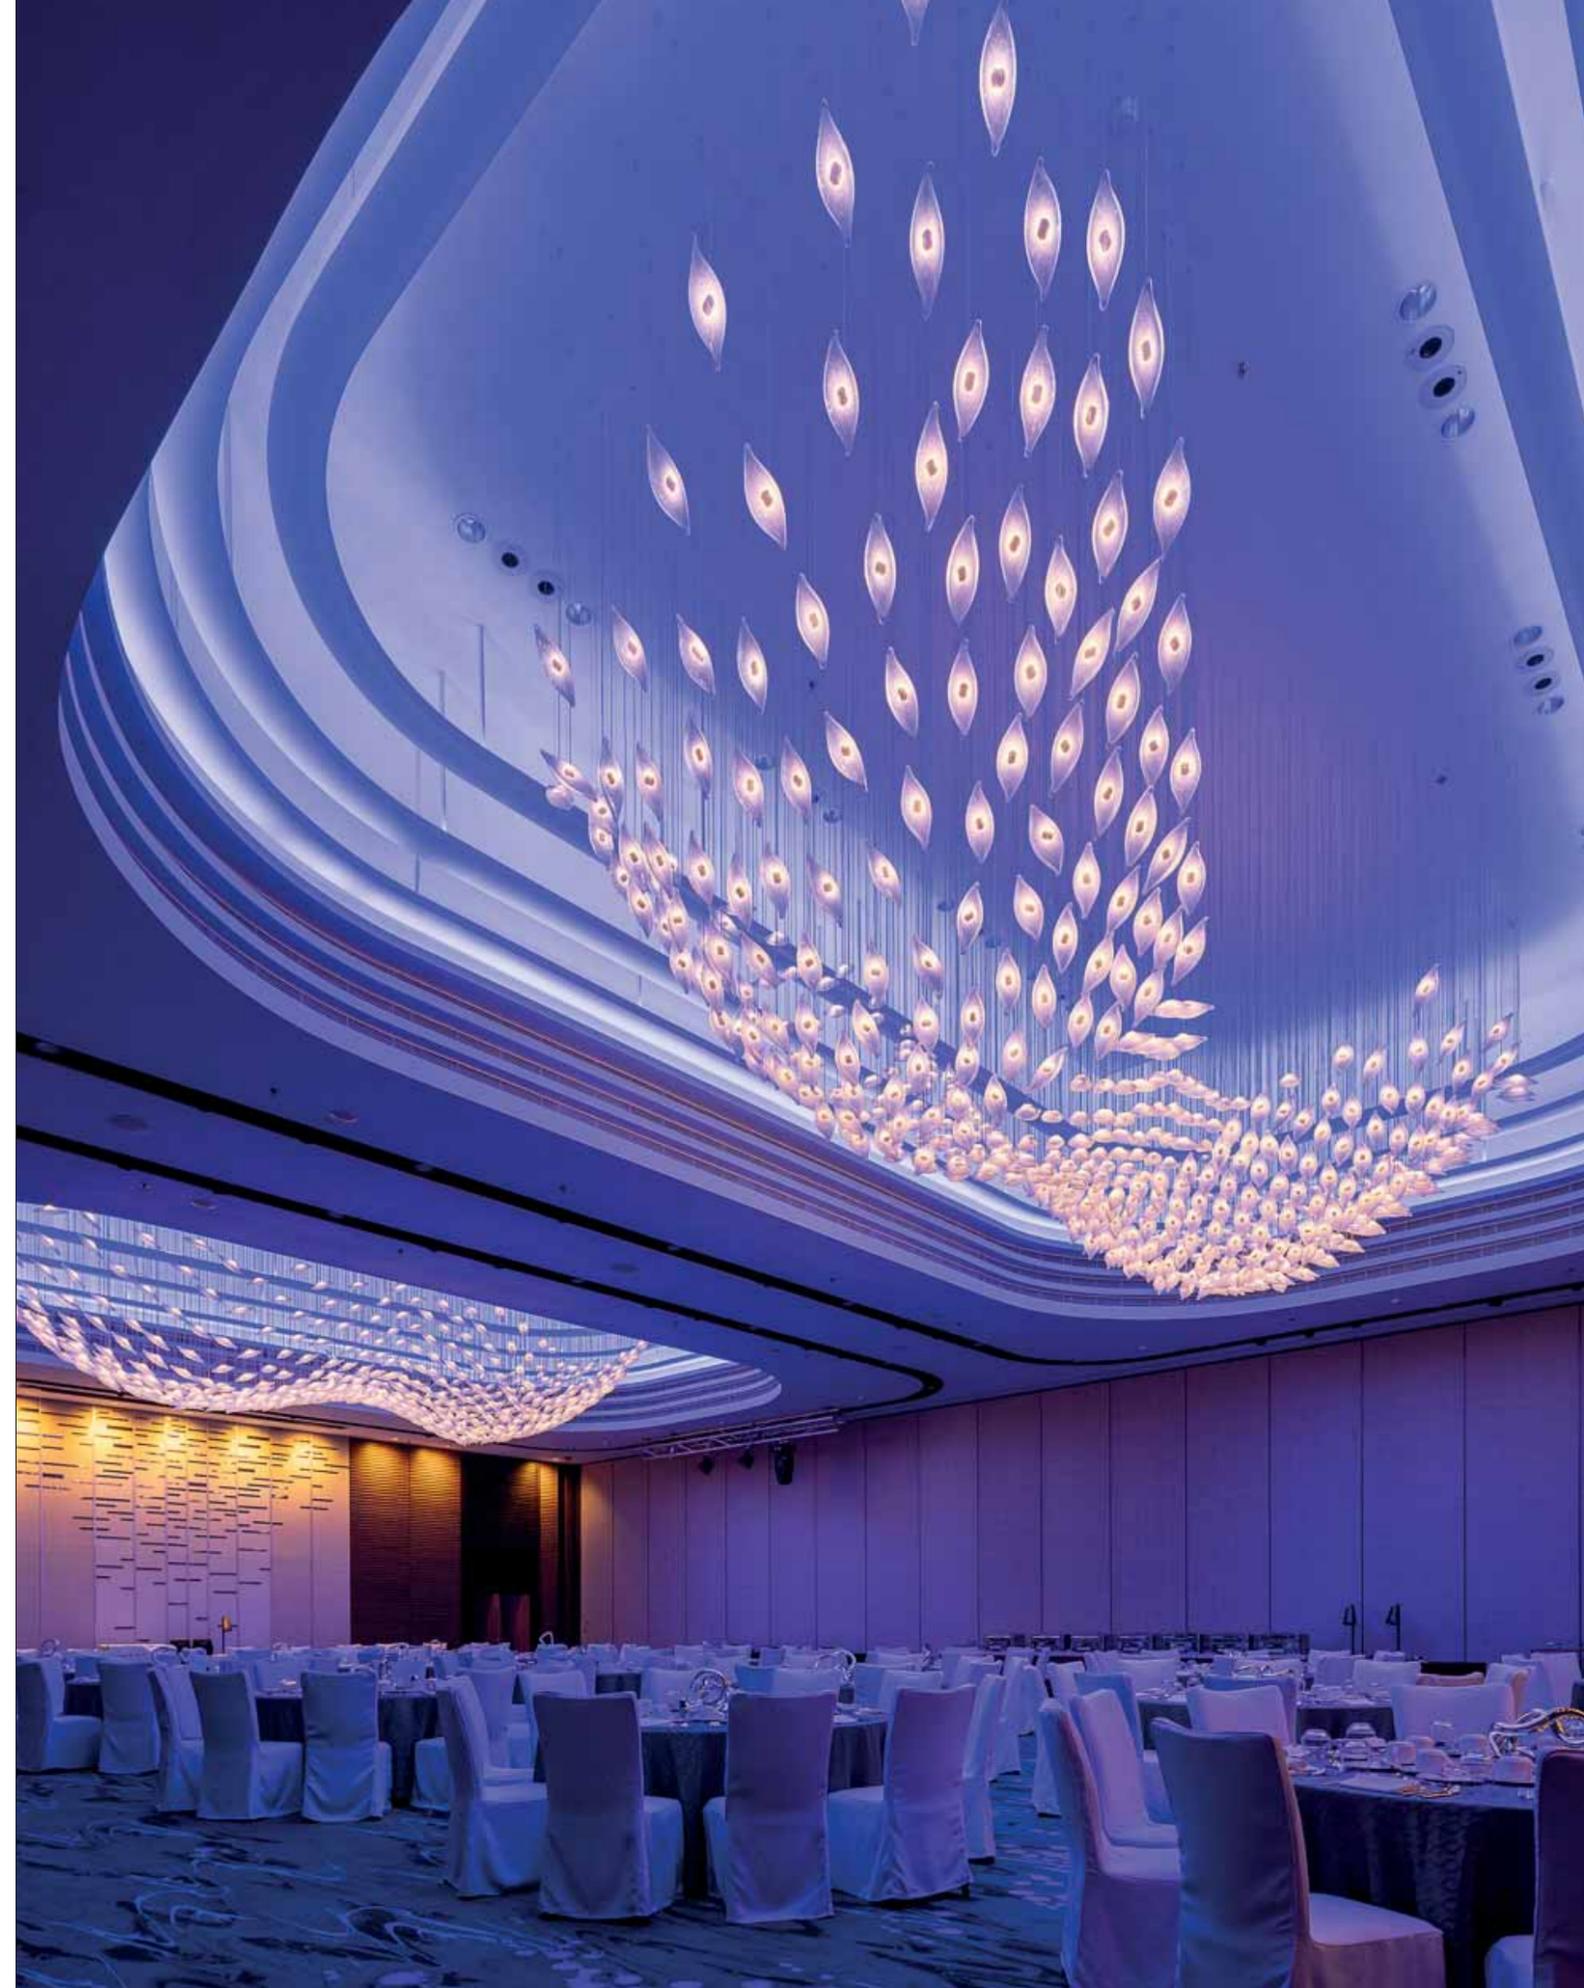

OCEAN PARK MARRIOTT

The Marriot Ocean Park tells the story of a magical underwater world and of the animals which live there. LASVIT adorned the “ocean park” with their playful glass fishes made of hand-blown Bohemian crystal glass with a slight gradient towards the opaque. Each piece has a linear-cut décor, and each component also has an internal LED source which light up the schools of fish. Remember dreaming about underwater worlds? Then dive in!

Prefunction and Ballroom

Lasvit Product Designer / Michaela Mertlová

Lasvit Projects

Why settle for grey and mundane accommodations when the Okada Hotel allows you to experience the exuberant bounty of nature? Walking through its lobby, corridors, and even the main gaming area can feel like walking through an exciting natural world made out of glass and light. Designer Štěpán Gudev wanted to capture the wild beauty of nature and materialize its overflowing abundance in elegant, mathematically-crafted shapes.

Entrance Lobby

Interior Designer / Miurashin Architect and Associates
Lasvit Product Designer / Luděk Hroch

RADISSON BLU ARBORETUM

The hotel works with its natural location. Extraordinary flora grows near the luxury property in Nairobi's Arboretum, which has been operating for more than one hundred years. Tree leaves are a motive which is incorporated also into the hotel itself. In the hotel lobby, the floor is covered in the outlines of leaves which are mirrored in 1219 crystal rods installed on the ceiling.

Arboretum

Lasvit Projects

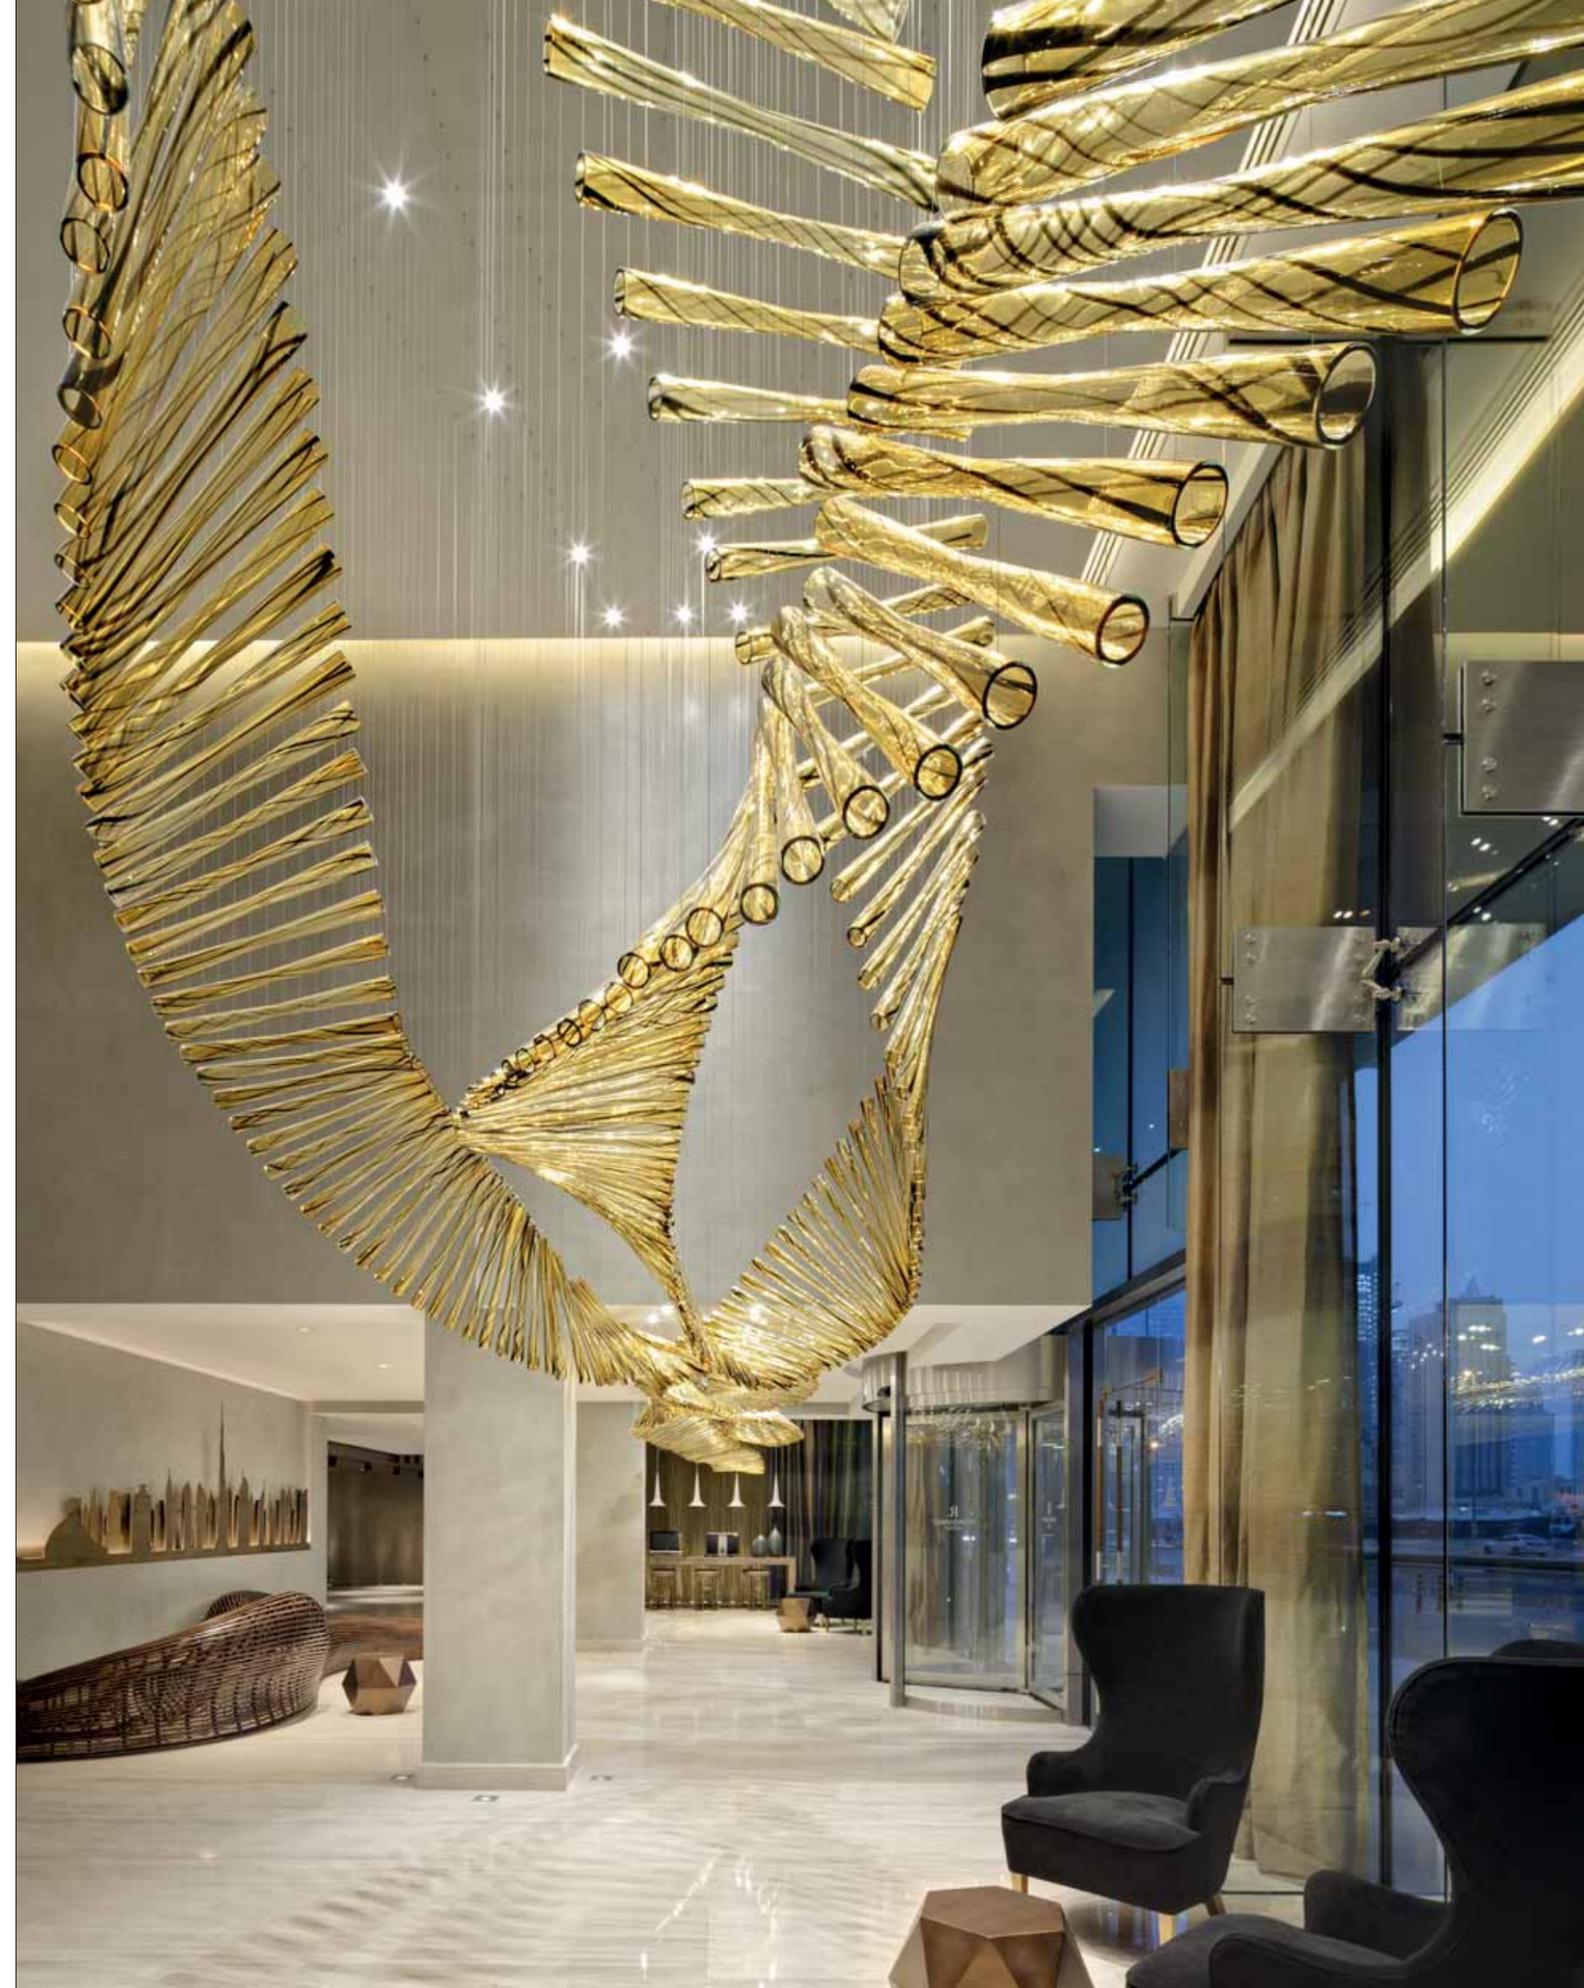

RENAISSANCE DOWNTOWN

The spirit of Dubai is imbued into the design of the new Renaissance Downtown hotel in the city's thriving Business Bay district. The center of the luxurious hotel's lobby also features LASVIT's striking glass installation. In creating her thrilling glass piece, designer Katarína Kudějová-Fulínová was inspired by yellow sand dunes, stretching as far as the eye can see. After all, glass is the best thing that can happen to a grain of sand.

Lasvit Projects

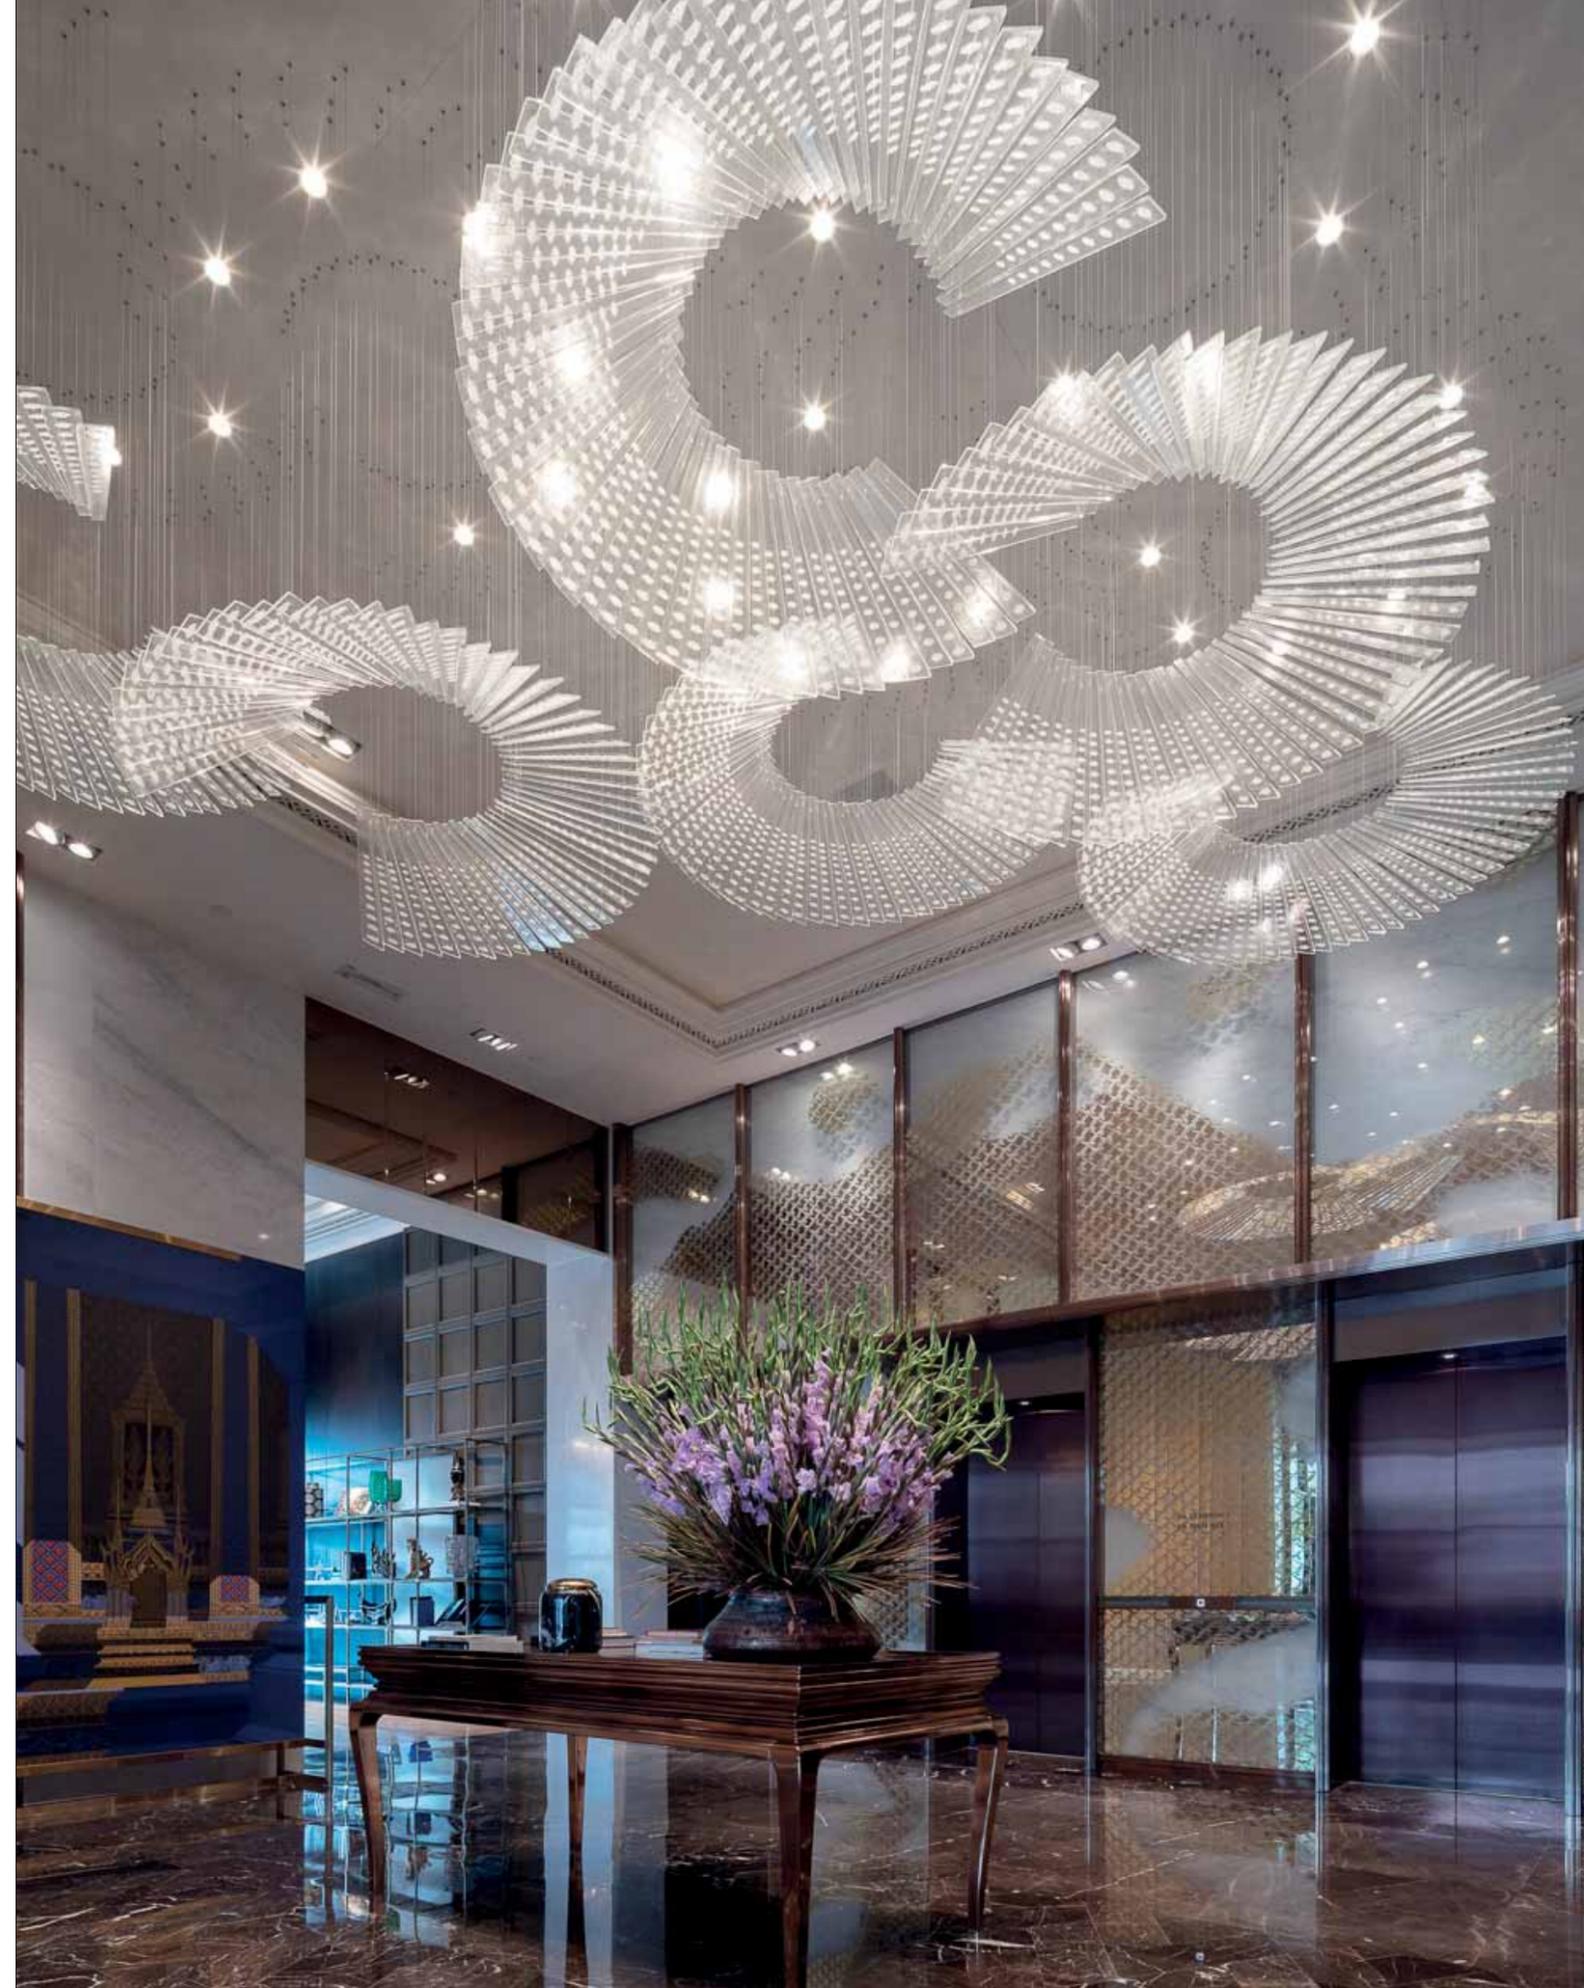

ROSEWOOD HOTEL

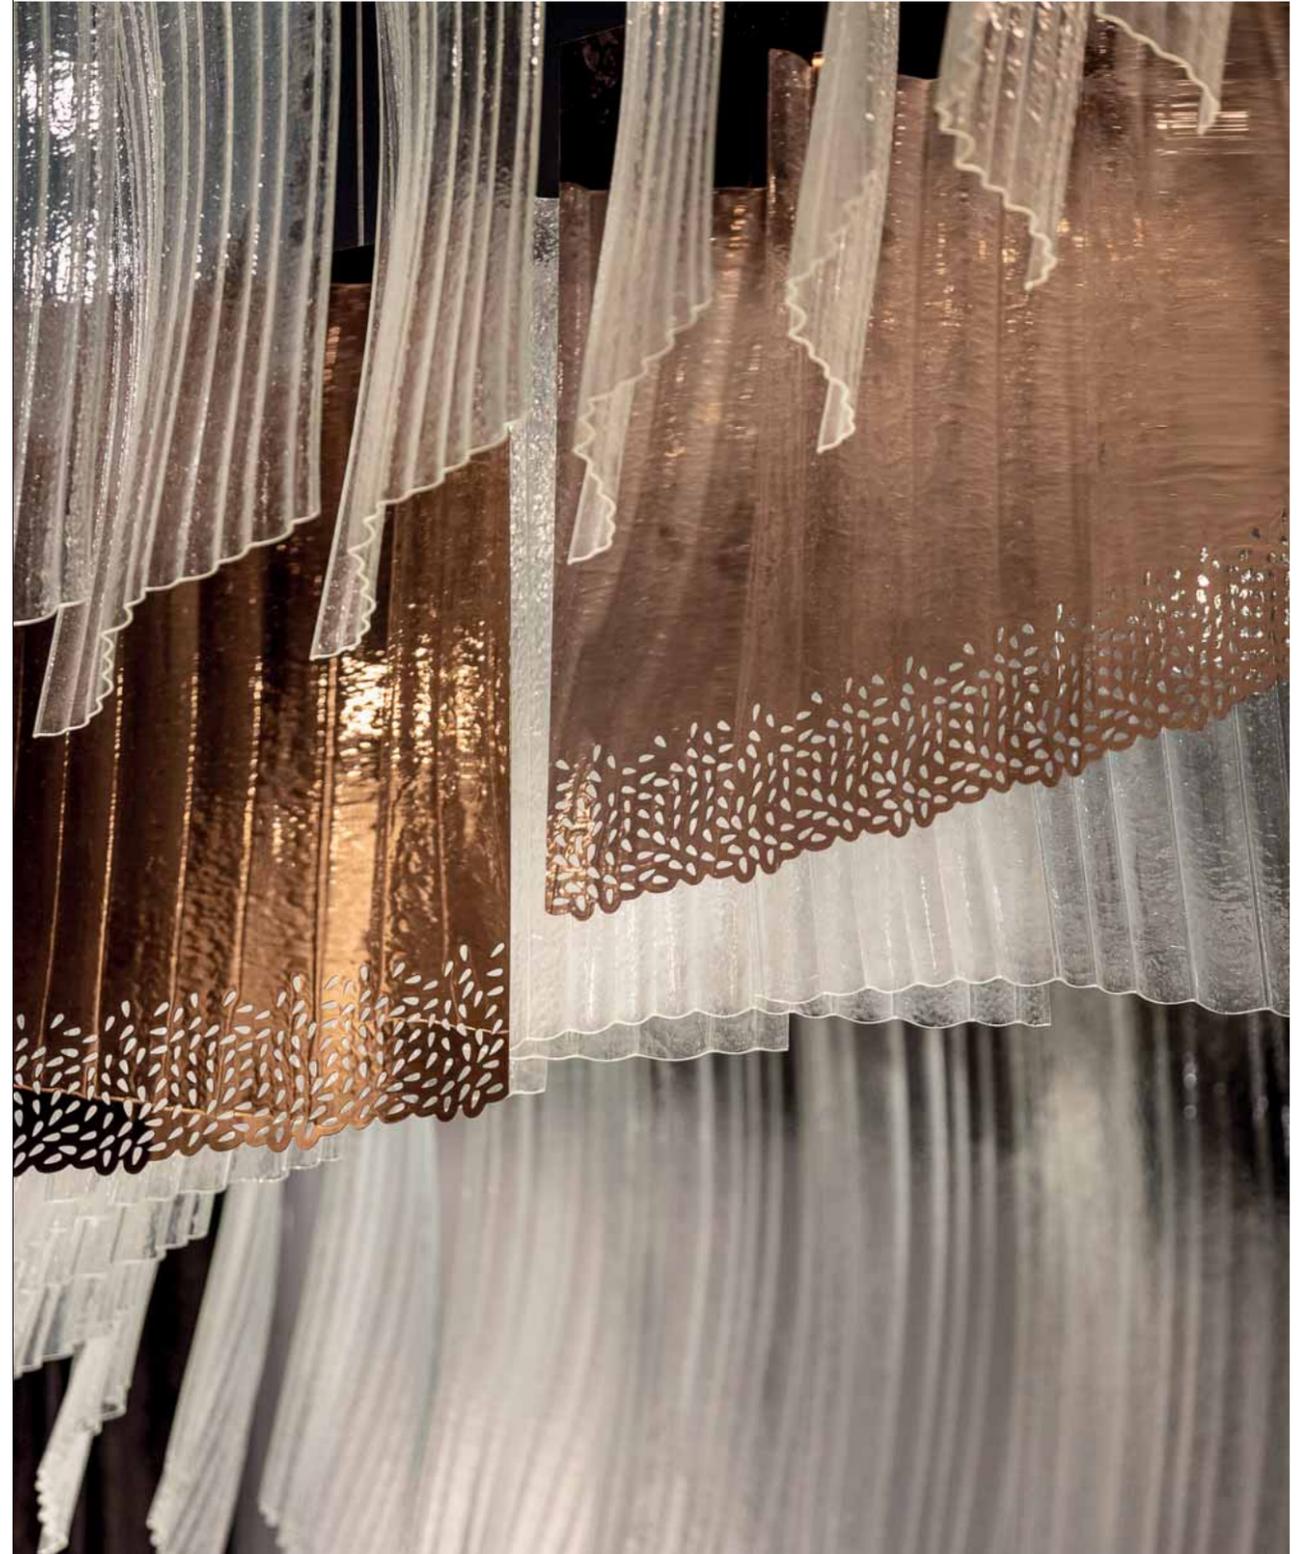

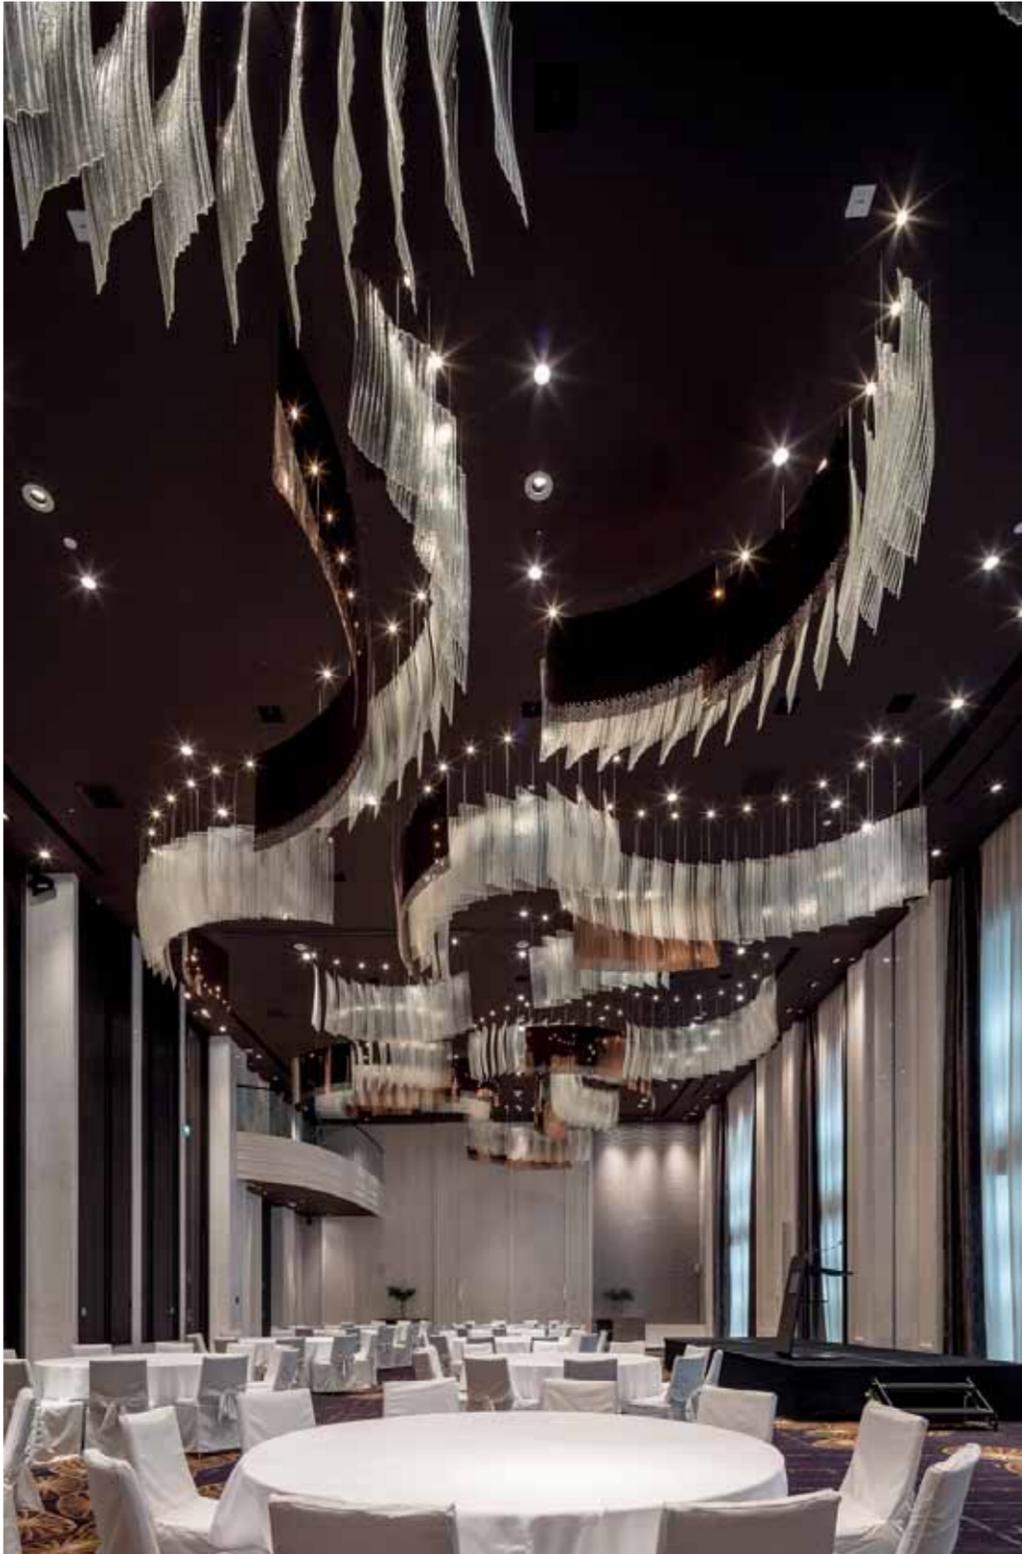

The Rosewood hotel is adorned by water frozen in pristine metal and glass sheets — the materials whose true element is fire, as it allows the molten mass to be dynamically shaped into unique pieces. Štěpán Gudev's glass and metal installation Dance of Fire and Water dances all over the ceiling of the hotel ballroom. Opposites meet when the glass and metal lighting installations show the calming and fragile beauty of flowing water.

Interior Designer / Wrightassociates interior architecture GmbH
Lasvit Product Designer / Jan Plecháč & Henry Wielgus

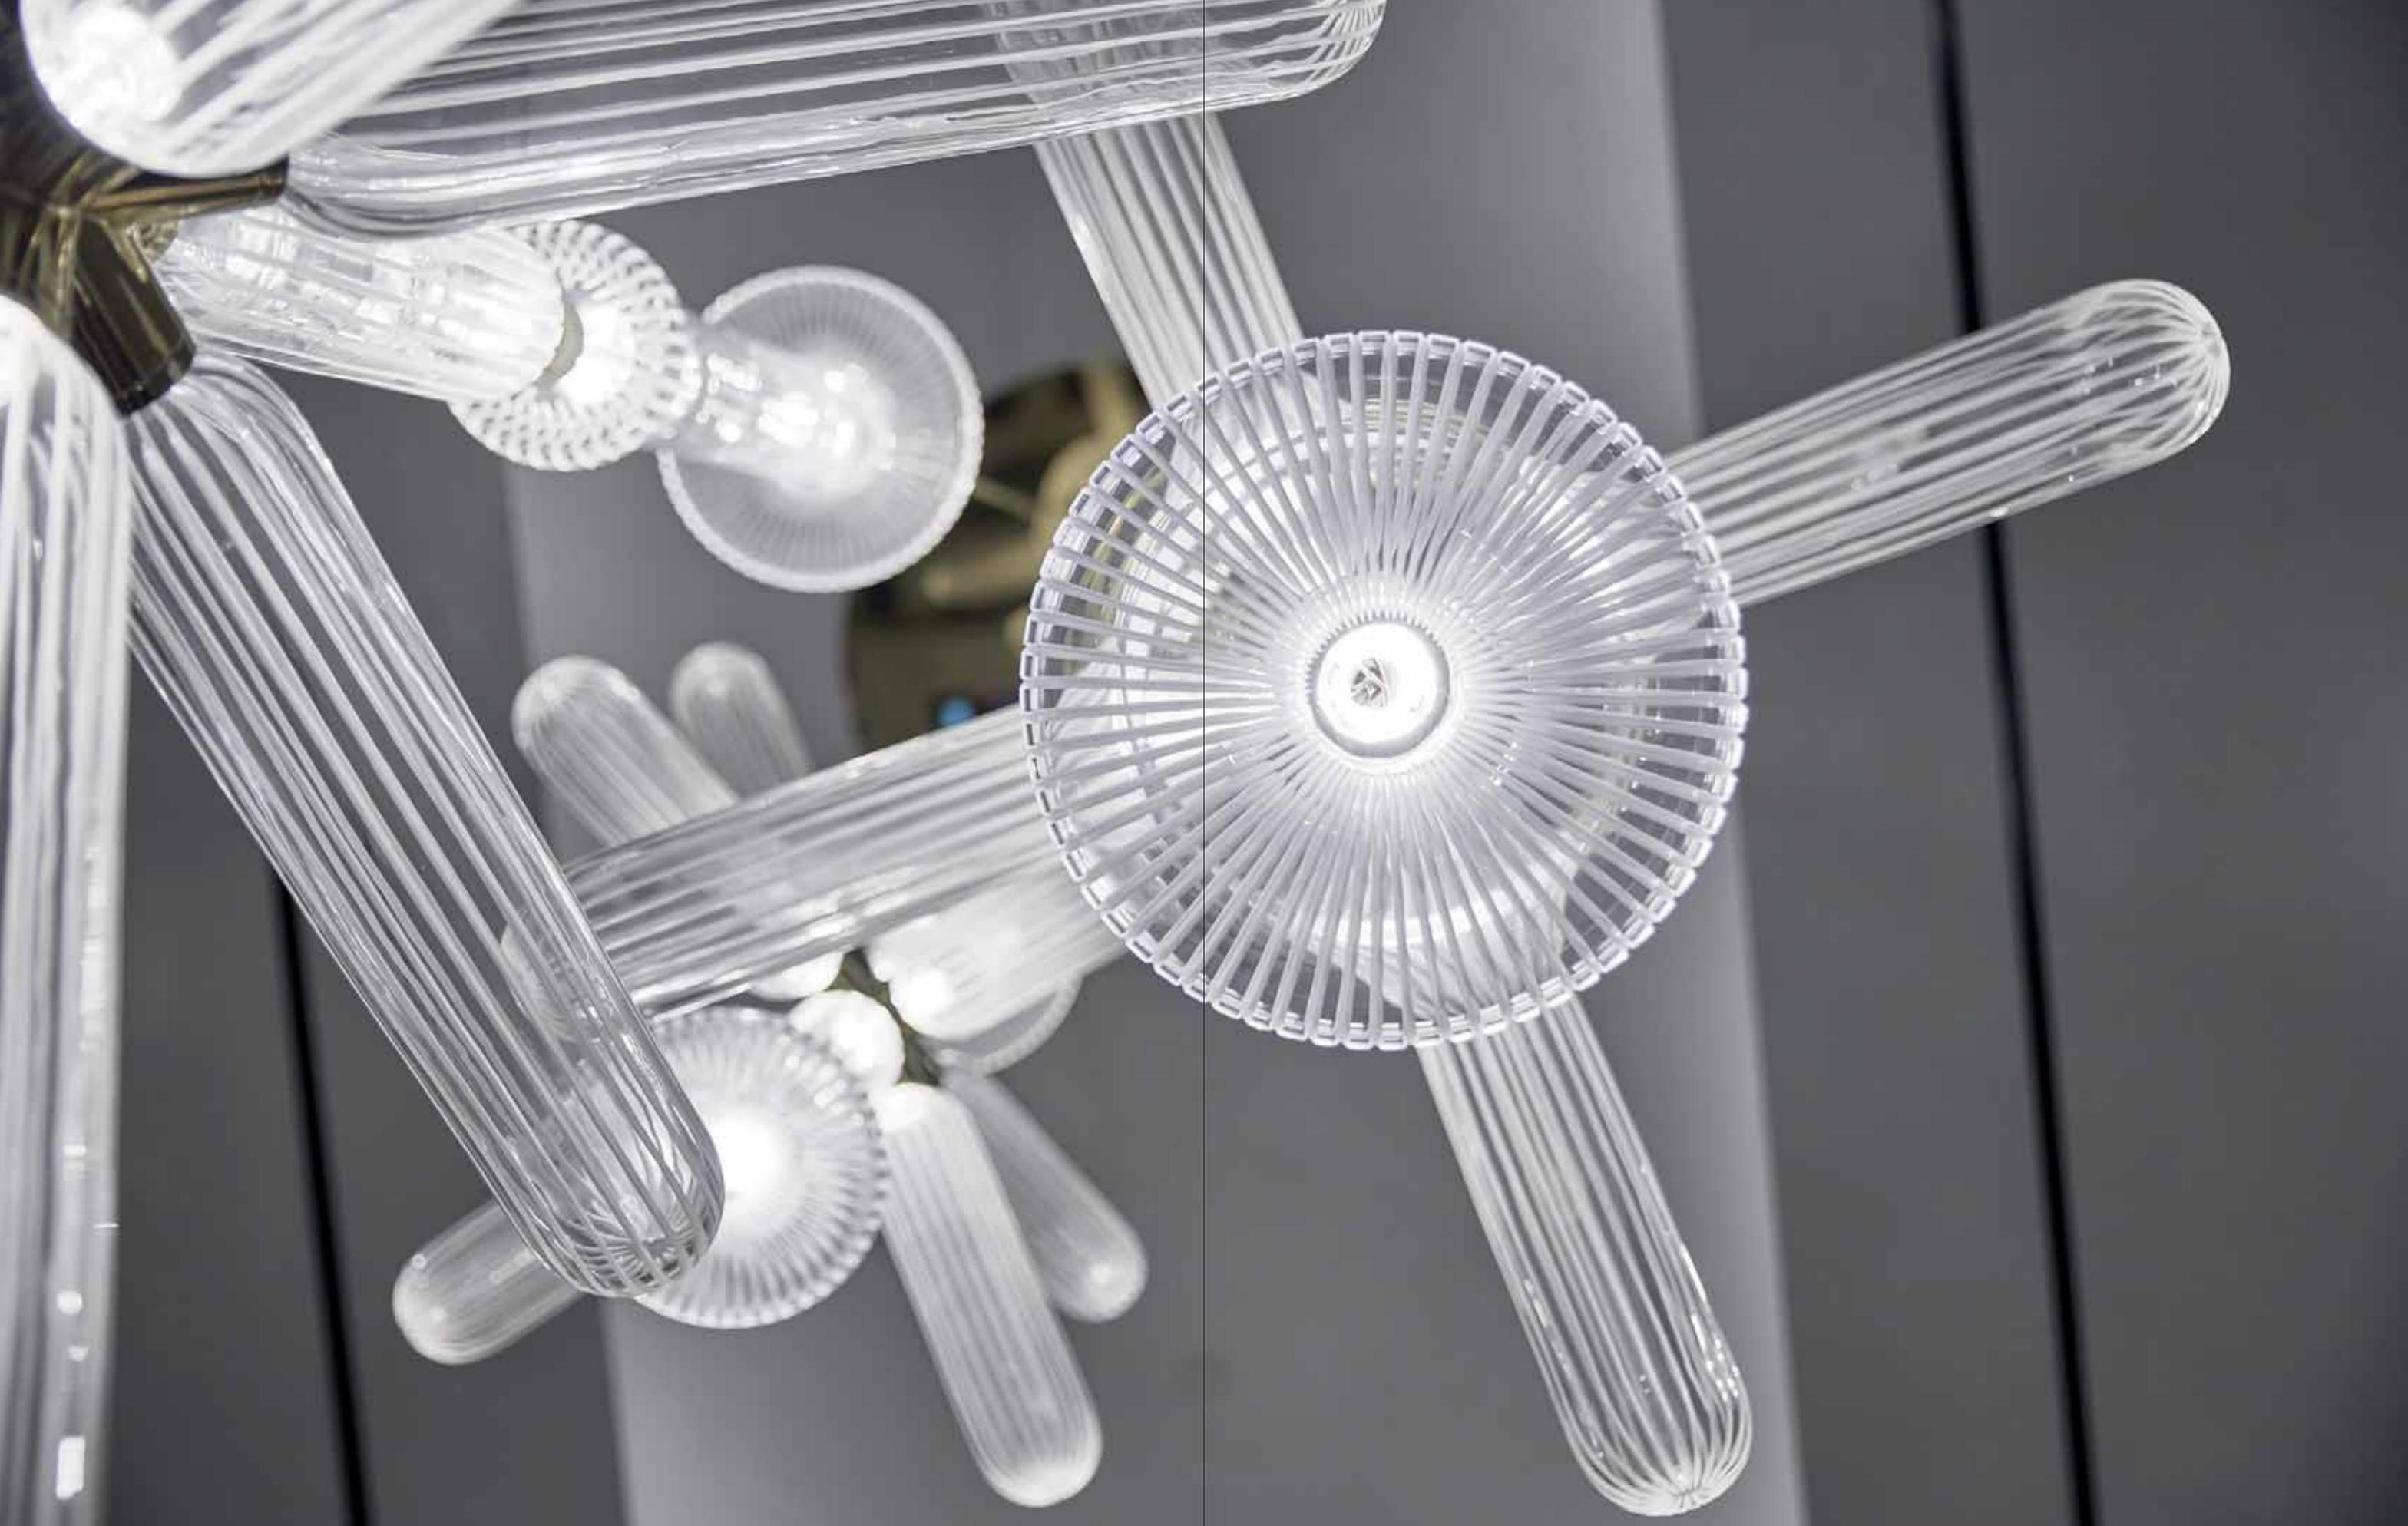

Right over the main reception shines the customized installation of one of LASVIT's most beloved lighting collections — Cipher — designed by Yabu Pushelberg. “The surface decoration was influenced by our fascination and exploration of the way in which etched patterning catches light,” explain the designers. Components are conjoined by polished champagne-gold connections, and Cipher can be customized with limitless possibilities.

Cipher Customizable

Special Thanks to
Interior and Product Designer / Yabu Pushelberg

SOFITEL CITY CENTRE

Inspired by the dance of leaves carried on a gust of wind, Jana Růžičková's installation entitled *Je t'aime* seamlessly blends the concept of the iconic Plane trees of Paris with the Tembusu leaves abundant in Singapore.

It is as if the wind blew fine Czech craftsmanship and French design elegance across the ocean, to the very heart of one of the most vibrant and dynamic cities in the world.

Singapore *Je t'aime*

Interior Designer / Wilson Associates Singapore
Lasvit Product Designer / Jana Růžičková

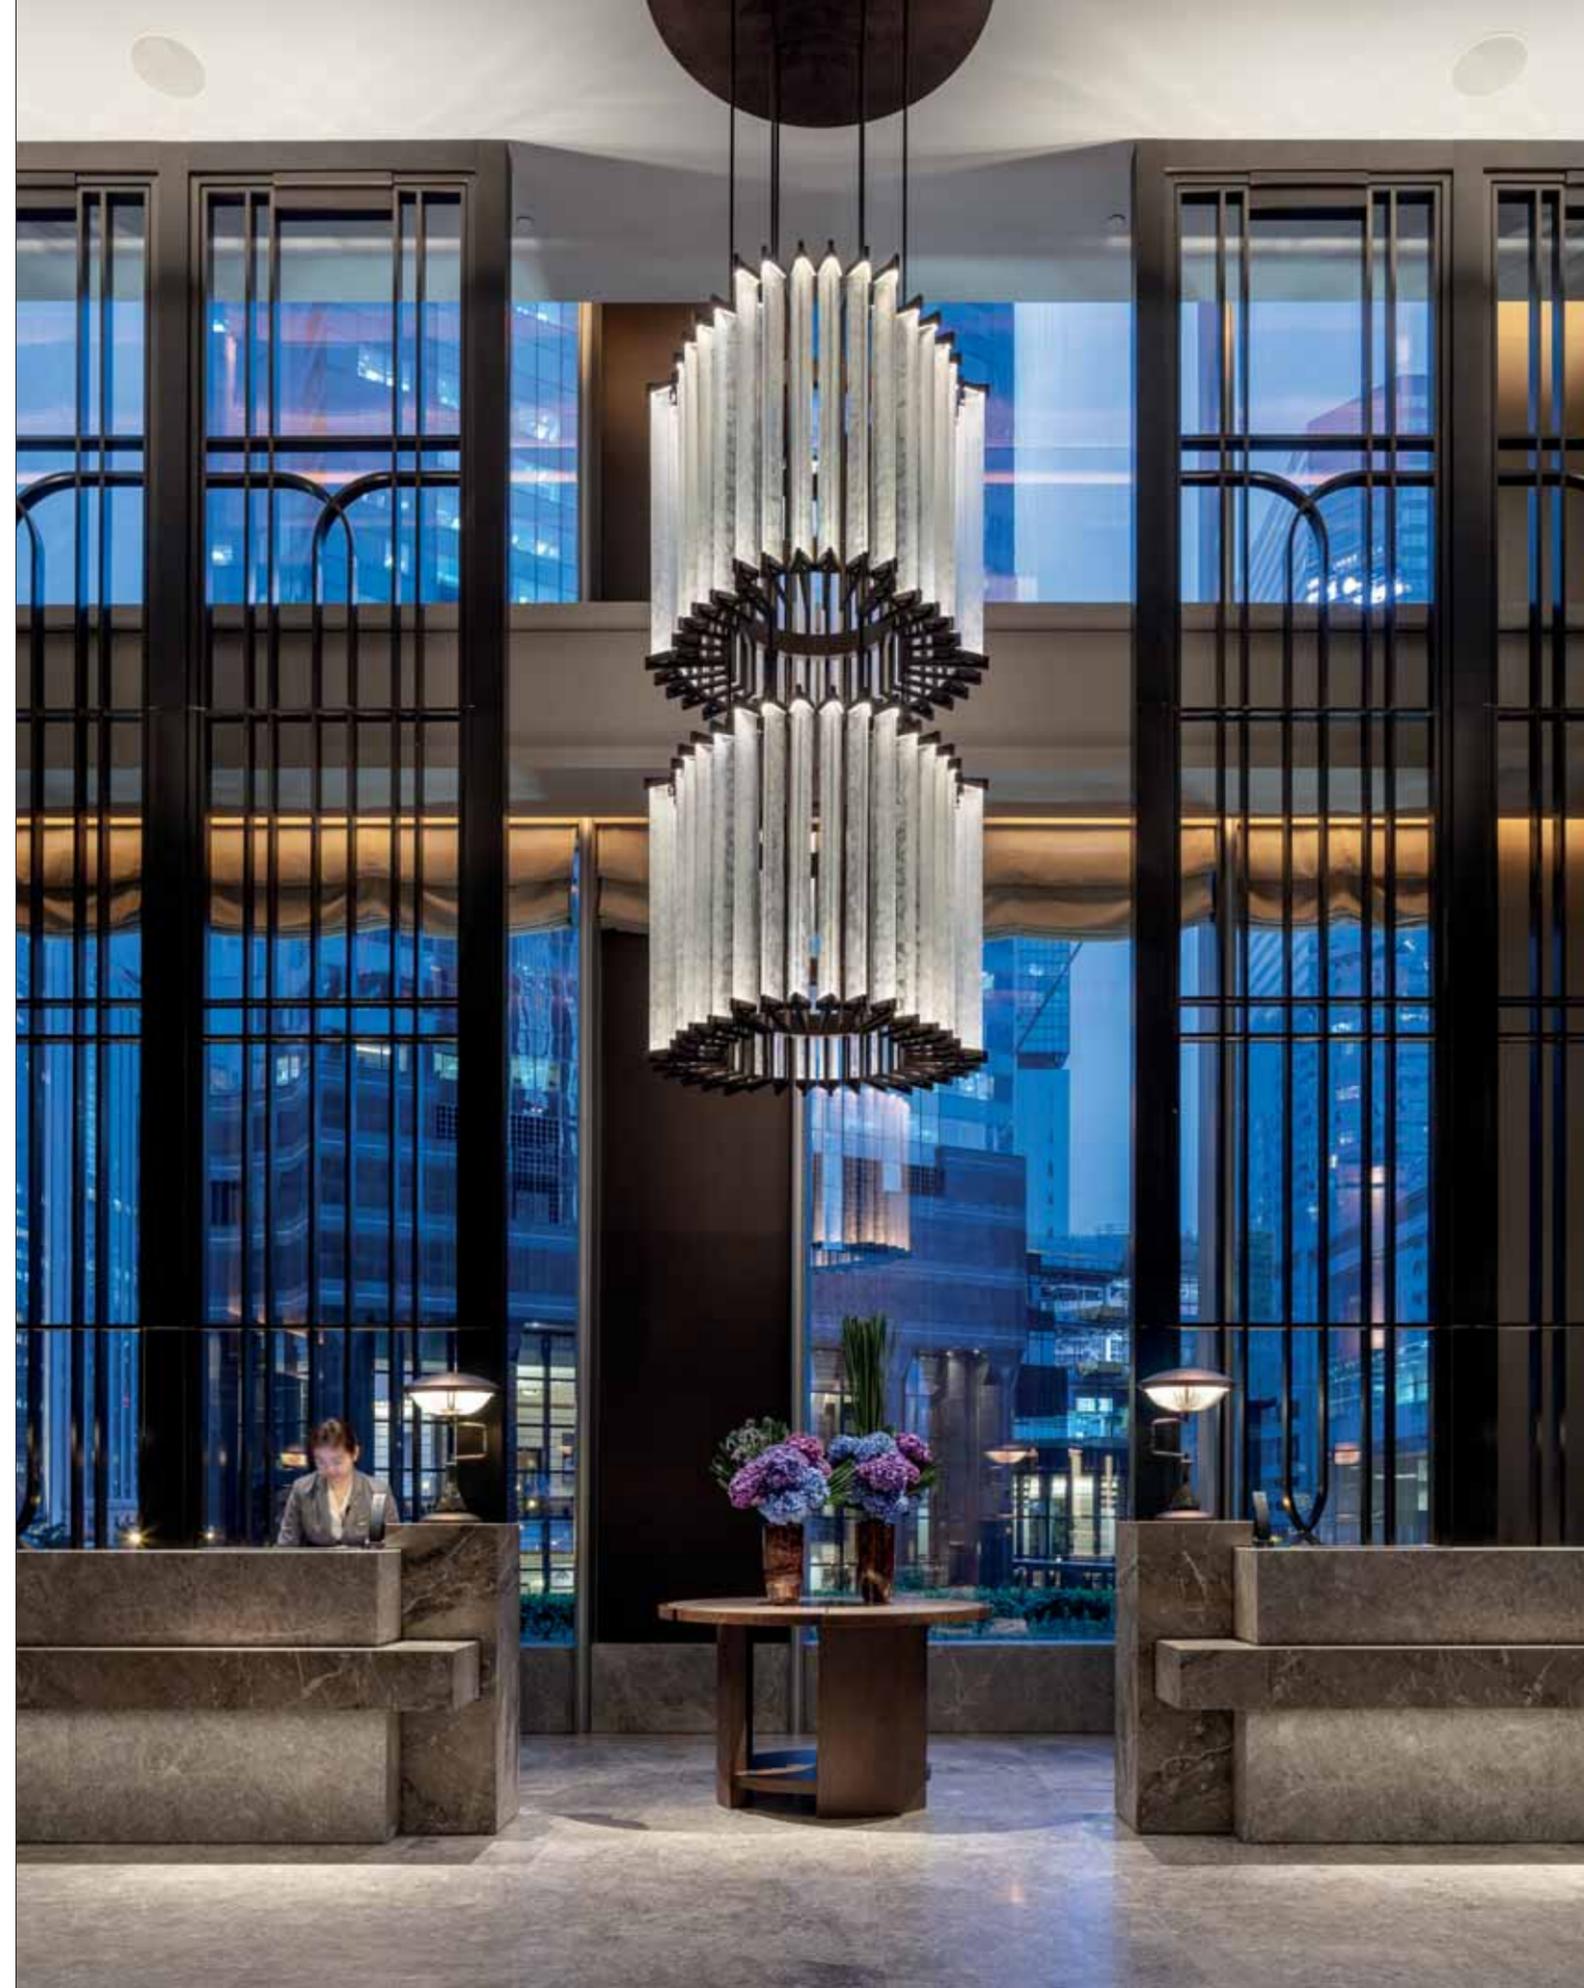

ST. REGIS

LASVIT has brought a piece of the Czech soul to the far East. A few years ago, the company developed the lighting Tac Tile in collaboration with the Hong Kong-based designer Andre Fu. Fu was inspired by Cubist architecture typical for buildings in Czechia and came up with a purist triangular profile. The light was reborn as a bespoke chandelier in the St. Regis Hotel, and hangs in all its majestic glory right above the reception desk.

Lobby

Interior and Product Designer / André Fu

Lasvit Projects

ST. REGIS

In the land of fig-trees and olive oil, flowering fields are rare; but not in the new St. Regis Hotel. The hotel is filled with floral-inspired lightings from the most delicate Bohemian crystal — Calla is a metal and glass blossom that never fades away, two lightings were inspired by the national flower of Jordan, the Black Iris, and in the lounge, visitors can sip coffee under the golden petals of a giant blossom almost 2,5 meters in diameter.

Calla

Lasvit Projects

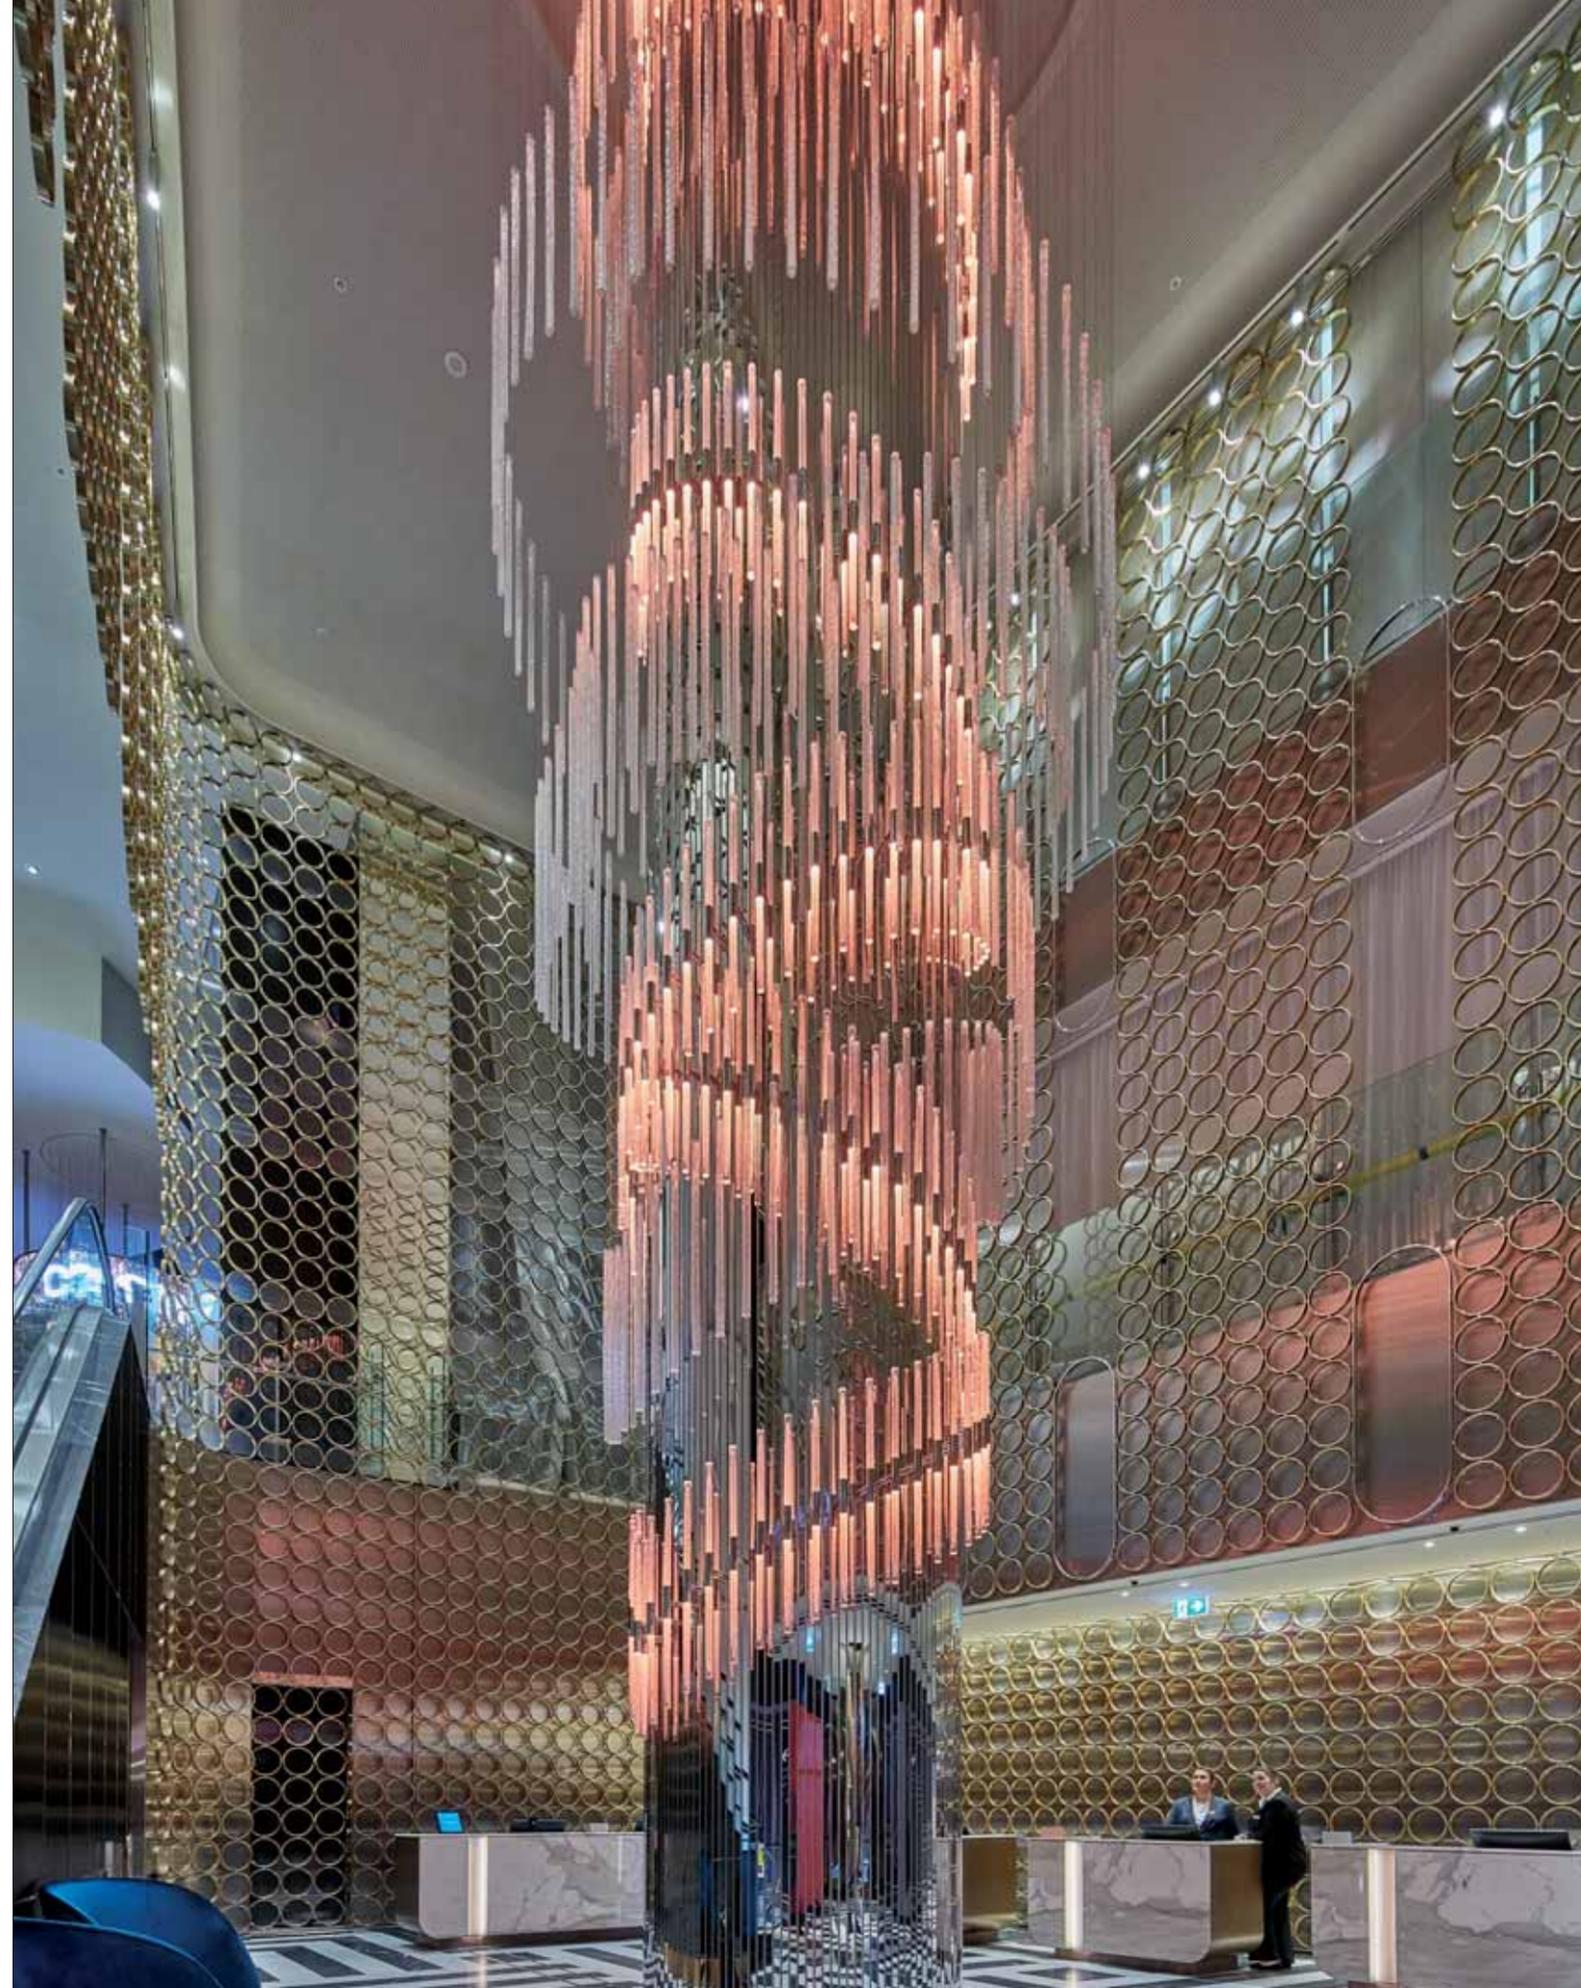

THE STAR

The designer Katarína Kudějová–Fulínová wanted to create something magnificent, something which would dazzle. The whole installation in The Star Casino is dynamically lit with eight pre-programmed lighting schemes — each has its own colour, dynamics, and speed. It is covered in 686 pieces of Czech hand-blown Bohemian Crystal glass rods with fluting and organic bubbles and hangs in the Astral lobby.

She named her installation Stella.

Stella

Interior Designer / Lombard & Jack
Lasvit Product Designer / Katarína Kudějová–Fulínová

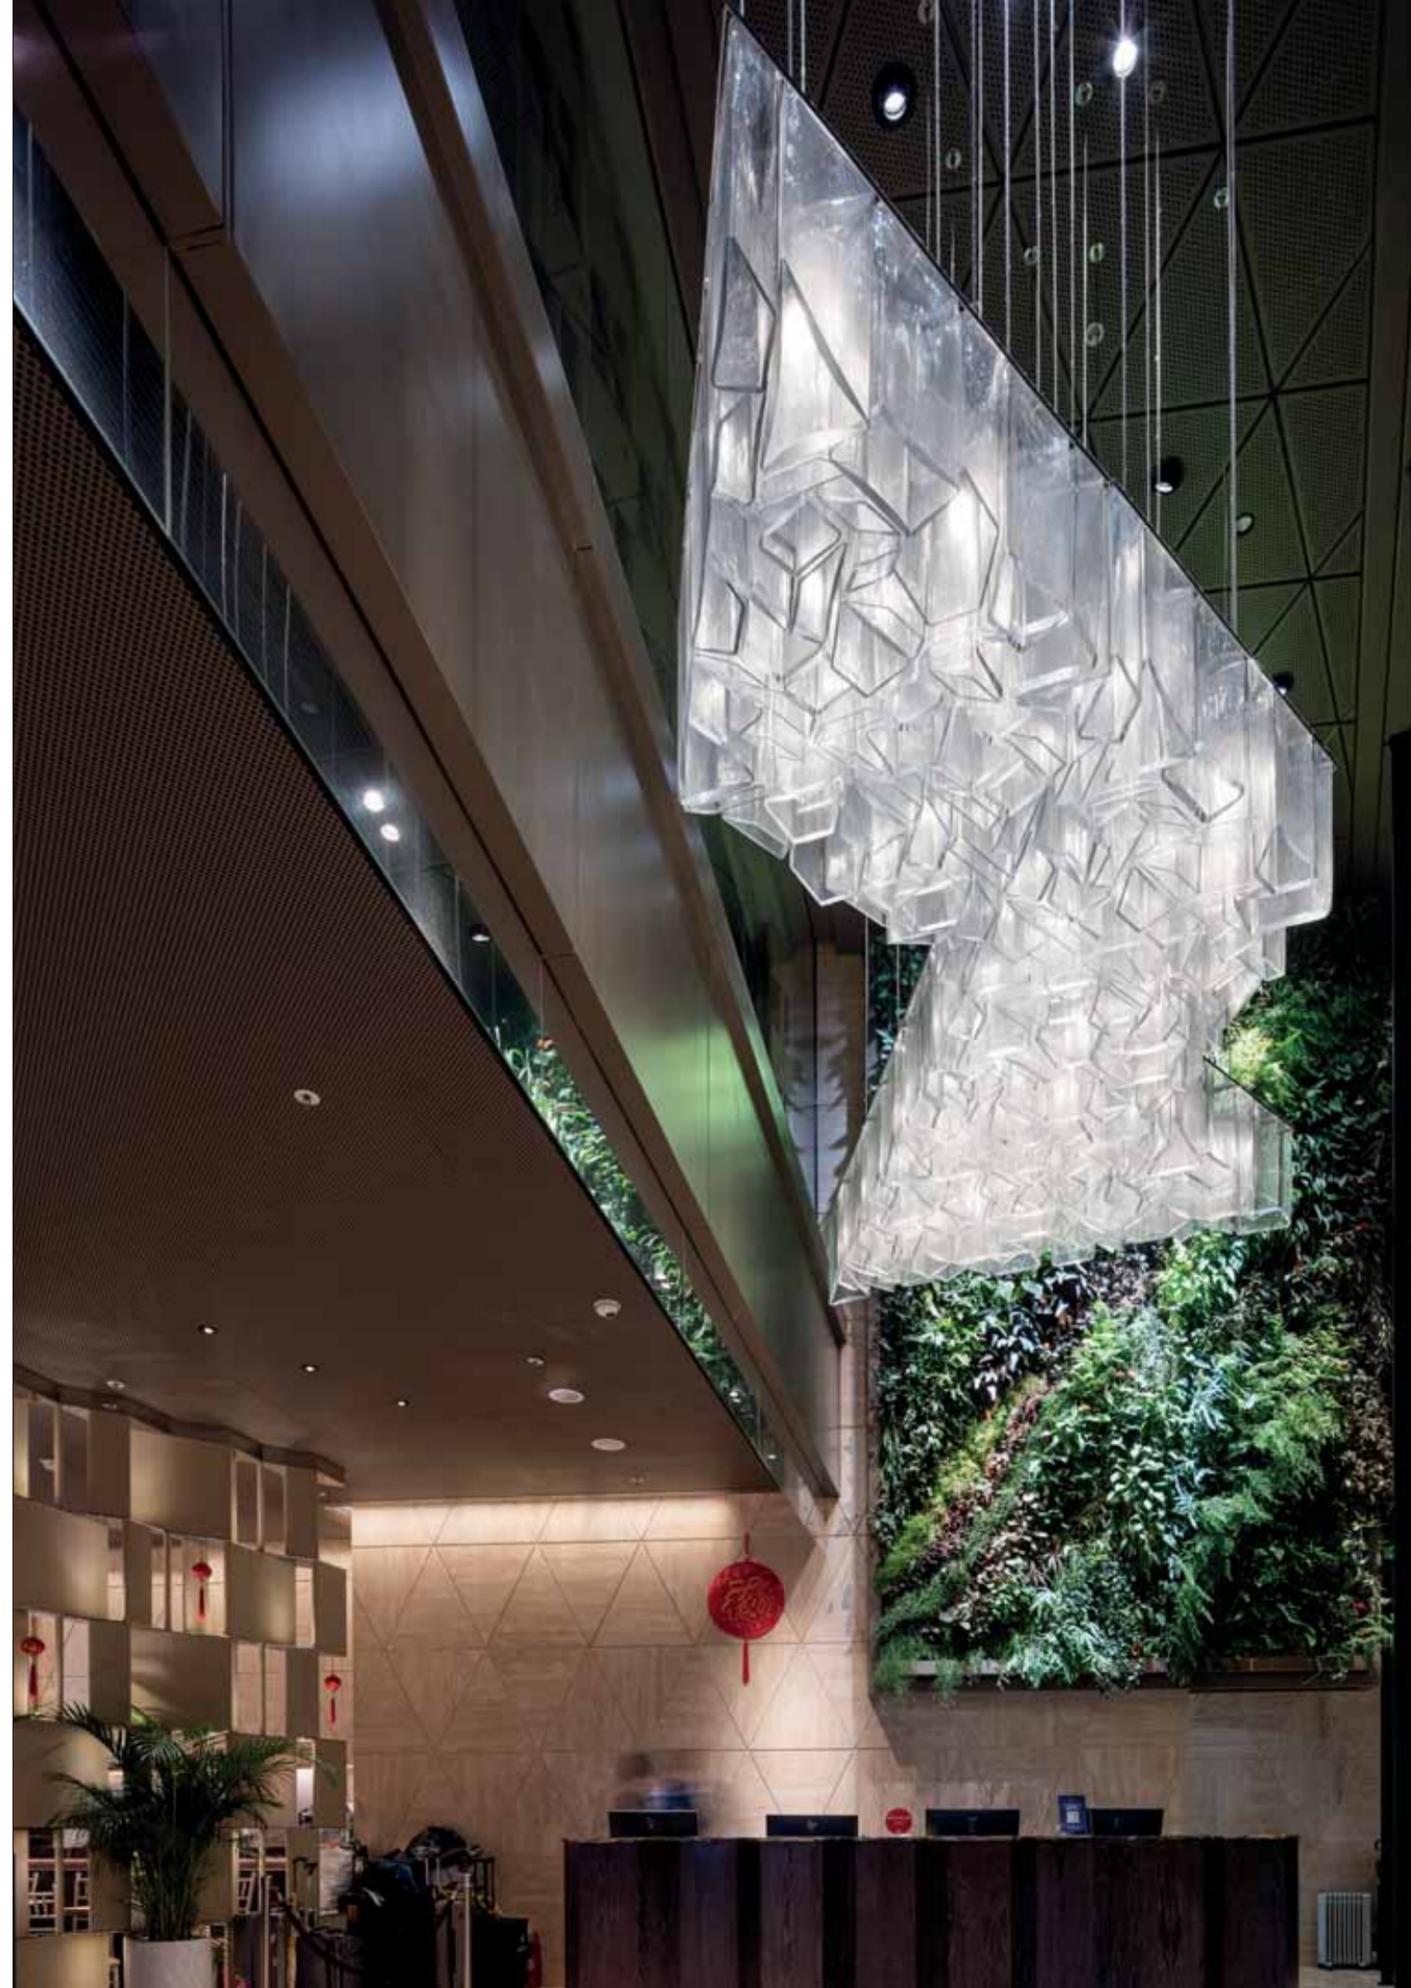

THE EMPEROR

The building's eye-catching exterior is visibly segmented yet smooth, and becomes reflected in the lighting installation inside. The lighting is like a box built out of hand-blown glass. Several triangles are tagged together to create a sharp pattern. The seemingly fragile piece is assembled from 216 massive glass joists.

ICE

Special Thanks to
Daniel Libeskind

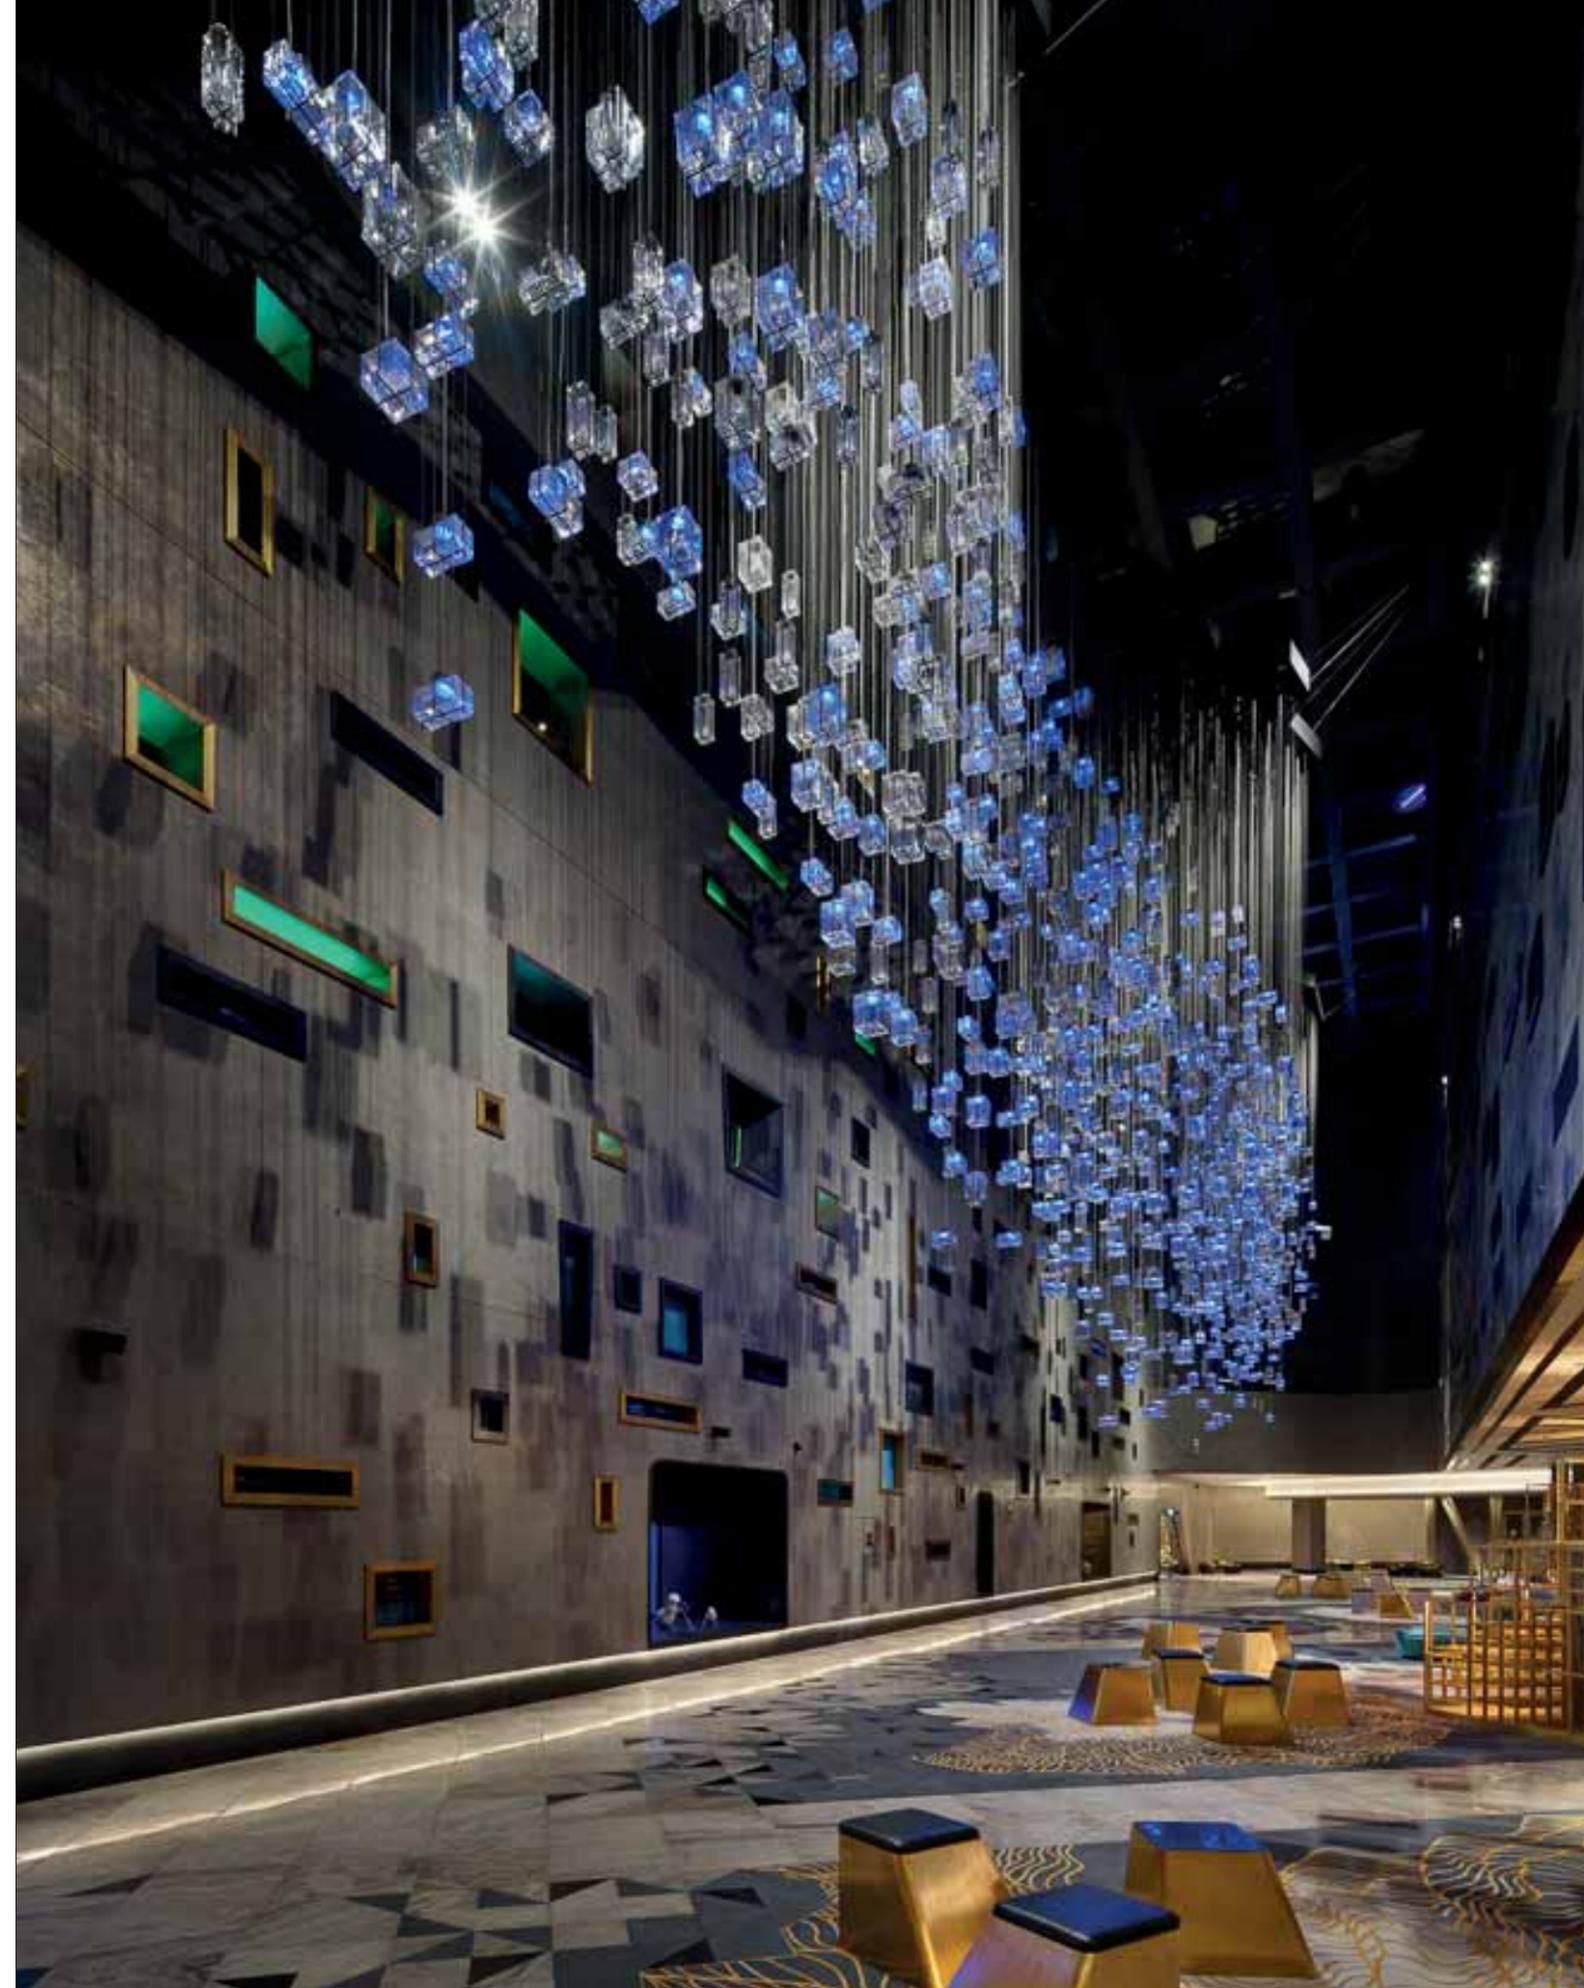

Lasvit Projects

The spirit of W is imbued into The Palm Hotel's very DNA, including the shape of its sound which inspired The Soundwave installation. "The shape is derived from the layout of the graphic record created by pronouncing the consonant W," explains LASVIT in-house designer Ludmila Žilková. The 30-meter long construction consists of 1213 glass pieces and half of the components can shine in myriad colors thanks to their special DMX chips.

This mother of pearl changes color right in front of your eyes. The piece consists of 110 real glass pearls, and our glassmakers carefully breathed air inside every single one of them. This installation in turn breathes life into the unique Pearl which all of us carry within; it fans our wishes and secret desires which rest like a seashell in the depths of our unconscious, waiting to be discovered — is it real, or just a dream?

ESHER RESIDENCE

There are moments in a family's life which you want to keep forever. In the private residence in Esher, London our designers let the family imagine these precious memories and transpose them into three glass sculptures tailor-made just for them and their living spaces. A total of 300 components play in five colors and shades. Each one is hand-blown and hand-shaped, and the five children's names shine in gold lettering like true family jewels.

Entrance

Happy Birthday

PRIVATE RESIDENCE

The private residence filled with LASVIT installations shines with crystal beauty. The luxury site was co-created with the client, who built this residence for his parents. In the informal reception, the crystal ribbon created out of LASVIT's patented "fabric-like" material called 'Twill' flies in the air. Hand-cut beads made of fine crystal are intertwined into a mesh that forms pliable sheets, refracting light in rainbow colors.

Lasvit Projects

PRIVATE RESIDENCE

The Mayfair Residence is an unusual case of a former office building turned into a seven-floor private residence, including a basement and roof terrace, right in the very center of London's Mayfair neighborhood. The Stream light sculpture flows through the entrance hall with delicacy, spanning over eight meters and gently winding around the central stairwell. The stream consists of blue and crystal-clear hand-blown glass elements.

Stream

NABOKOV RESIDENTIAL DEVELOPMENT

Vladimir Nabokov once said, “A writer should have the precision of a poet and the imagination of a scientist.” His life-long passion for butterflies is commemorated by a swarm of these beautiful creatures in a private residence which carries his name. Designer Michaela Mertlová created glass butterflies with special, coloured textures to make each piece unique, and placed them in the lobby area to guide the residents from entrance to elevator.

ONE PARK GUBEI

Consisting of eight apartment blocks, the One Park Gubei project is the most luxurious residential development in Shanghai. LASVIT provided lighting sculptures for each block's Main and Underground lobbies, and some additional sculptures for their luxurious, showcase apartments. The Main Lobby installations feature Katarína Kudějová-Fulínová's Flounces, while another lobby features Daniel Jaček's Glass Maze with its rosy-gold, mirror finish.

REIGNWOOD PINE VALLEY GOLF CLUB

Just a stone's throw away from the resting place of the exalted Ming dynasty, and a mere hour's drive from the Forbidden City, stands the Reignwood Pine Valley Golf Club — a unique club which features Libor Sošt'ák's installation Dougong. The 'dougong' is perhaps the most iconic feature of ancient Chinese architecture, and Sošt'ák transposed it into the wondrous decor of the resort's chic lobby which pays homage to the traditional ancestral style.

RIHAN HEIGHTS

The Rihan Heights towers in Abu Dhabi contain 854 apartments, and LASVIT designer Luděk Hroch came up with the perfect finishing touch to this luxurious apartment complex — his six extraordinary glass art installations entitled Elements. There is one lighting piece in each of the towers, each evoking one of the elements of Earth's wondrous nature. The Rihan Heights Clubhouse also features another piece by this up-and-coming LASVIT designer.

THE LINE

Situated next to the buzzing Chatuchak Market, The Line condominium is a place where the old style meets a modern approach, and where nature becomes entangled with the urban web. The lobby is adorned by LASVIT's lighting installation which shines like the sun. A symbol of connectivity, the sculpture is made of dozens of glass plates, all of them interlinked with one another. The construction was specially made to withstand wind and earthquakes.

THE MONUMENT

Imagine coming home to a dazzling world. The dynamically-lit sculpture Fluidum flows through the lobby spaces, meeting room and main room and welcomes the apartment building's residents with its soft light. There are no two identical components in this installation, and each piece is a hand-made original which breaks light with its special "iced" surface. The private resident spaces are further illuminated with LASVIT's ready-to-shine collections.

Lasvit Projects

The exceptional limestone building stands tall in the largest mixed-use private real estate venture in American history. In the Hudson Yards 35, LASVIT's work shines in the grand dining room. The installation presents "crystal fabric" which hangs like a tapestry from the ceiling.

133 Wai Yip Street opted for an entirely see-through office, aiming at ultimate transparency within the workplace. This includes its functional technical components, such as glass lift shafts and interior furnishings. The Concurrency is our first project in which the intricate ceiling cable system is intentionally left exposed, creating a web-like composition resembling a printed circuit board familiar from electronics.

131 SOUTH DEARBORN

Have you ever imagined what it would be like to hover on clouds? In the high-rise at 131 South Dearborn St., LASVIT worked in collaboration with Gensler Architects to make part of this fantasy real. Instead of walking into an almost thirty-year-old lobby, the visitors will get their head in the clouds. Designer Jana Růžičková placed a total 925 shining glass bubbles made of crystal glass, each fitted with its own light source.

BUTTERFLY KARLÍN

From an abstract cluster of glass bubbles loom the faces of famous people who have formed the unique spirit of Prague's riverside neighborhood of Karlín. The glass murals were assembled based on a formal computer-generated blueprint, so that the viewer's brain could aptly perceive the constellations of glass bubbles as a portrait watching them from the center's sleek walls. They are like glass molecules which get the center's chemistry going.

K11 MUSEA

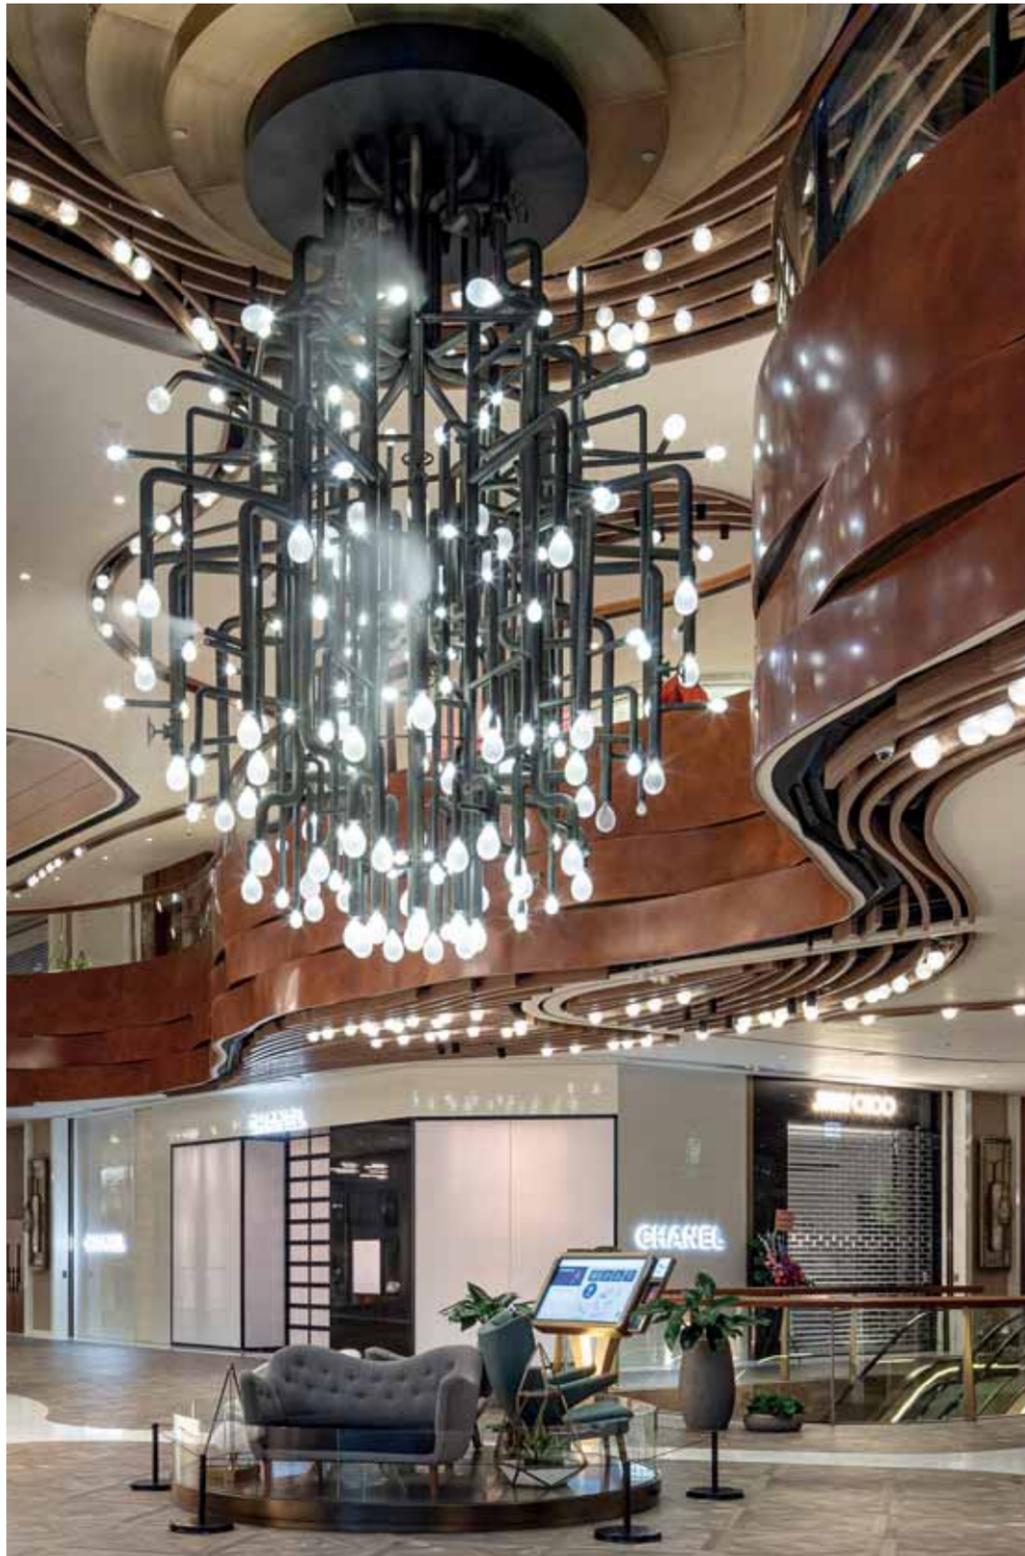

Back in the day, Victoria Docks used to be shrouded in thick smoke. K11 Musea — a green building which was born like a phoenix from the ashes of former times — now has a shining heart which beats with the rhythm of glass. The Lighting Machine reflects all the attributes of the days of old — metal, industry and even steam. The steaming lighting installation was created out of hand-blown glass and three hundred meters of metal tubes.

KERRY CENTRE OFFICE TOWER

The Kerry Centre lies in the very heart of Beijing's Central Business District and puts you right at the doorstep of mainland China's commercial activity. LASVIT's illuminated sculpture embellishes the tower's lobby — the Sunset installation consists of a network of glass sticks, each made of two stems weaving in and out of each other. Their light catches the unique moment of the day, when shadows get longer and sunlight slowly lurches into night.

The colorful lighting installation can be seen from the outside of the Kohler shopping mall through the glass facade. The playful glass components in blue and violet cover the building's three storeys like embroidery. Each component looks like several bubbles interconnected to form molecules.

LOTTE WORLD TOWER DIVER HALL

Lotte World Tower is a 555-meter skyscraper located near Seoul's Han River whose slender, cone-shaped structure contains retail outlets, offices and residences, as well as a luxury hotel and public-access floors with an observation deck. Maxim Velčovský, LASVIT's Creative Director, designed the installation Diver, a 17-meter glass sculpture composed of thousands of hand-blown, opaque glass spheres which float suspended in the Tower's Diver Hall.

LUXURY WATCH STORE

The malls of Dubai are dynamic places where time never stands still. Inspired by the ‘cyclops’ — a tiny piece of sapphire crystal affixed just over the date window on luxury watches — designer Mária Hostinová Čulenová created a magnificent chandelier with a modern twist for a luxury watch store. The myriad gold, green and translucent components rain down from the ceiling through its two floors and remind visitors that one can never make time stand still.

Lasvit Projects

Maxim Velčovský's glass sculptures in the shape of a horse, lion and shoe honor the spirit of the buildings which formerly stood in place of the modern Quadrio center. The houses carried the signs of the Black Horse, the White Lion and the White Shoe. Good Spirits are composed of more than 10 000 black and opaque white balls and the largest piece is over three meters long. The reception is furthermore paneled by LASVIT's modular Hydrogene system.

The interior design of the Tiffany & Co. Bellavita Store is graced with the presence of an impressive lighting sculpture designed by LASVIT's Jitka Kamencová-Skuhravá — Icefalls in Tiffany Teal. Combining hundreds of delicate hand-blown icicles to form one piece of art, this stunning structure boasts many hand-blown stalactites, and its ellipsoid shape is a cluster of melting ice, poised just overhead a display of dazzling Tiffany jewels.

MAJESTIC PRINCESS CRUISE SHIP

This Royal-class cruise ship prowls the seas with style and grace, and her tastefully designed interiors complement its royal status. Inspired by LASVIT's classic 'Twill,' the Table Lumiere lighting sculpture combines metal and crystal beads, bringing to the nautical interior a delicate wonder and charm, while Jana Růžičková's Oceanus glass installations reference the wide expanses of the seven seas which the Majestic Princess ship calls home.

HYDROGENE

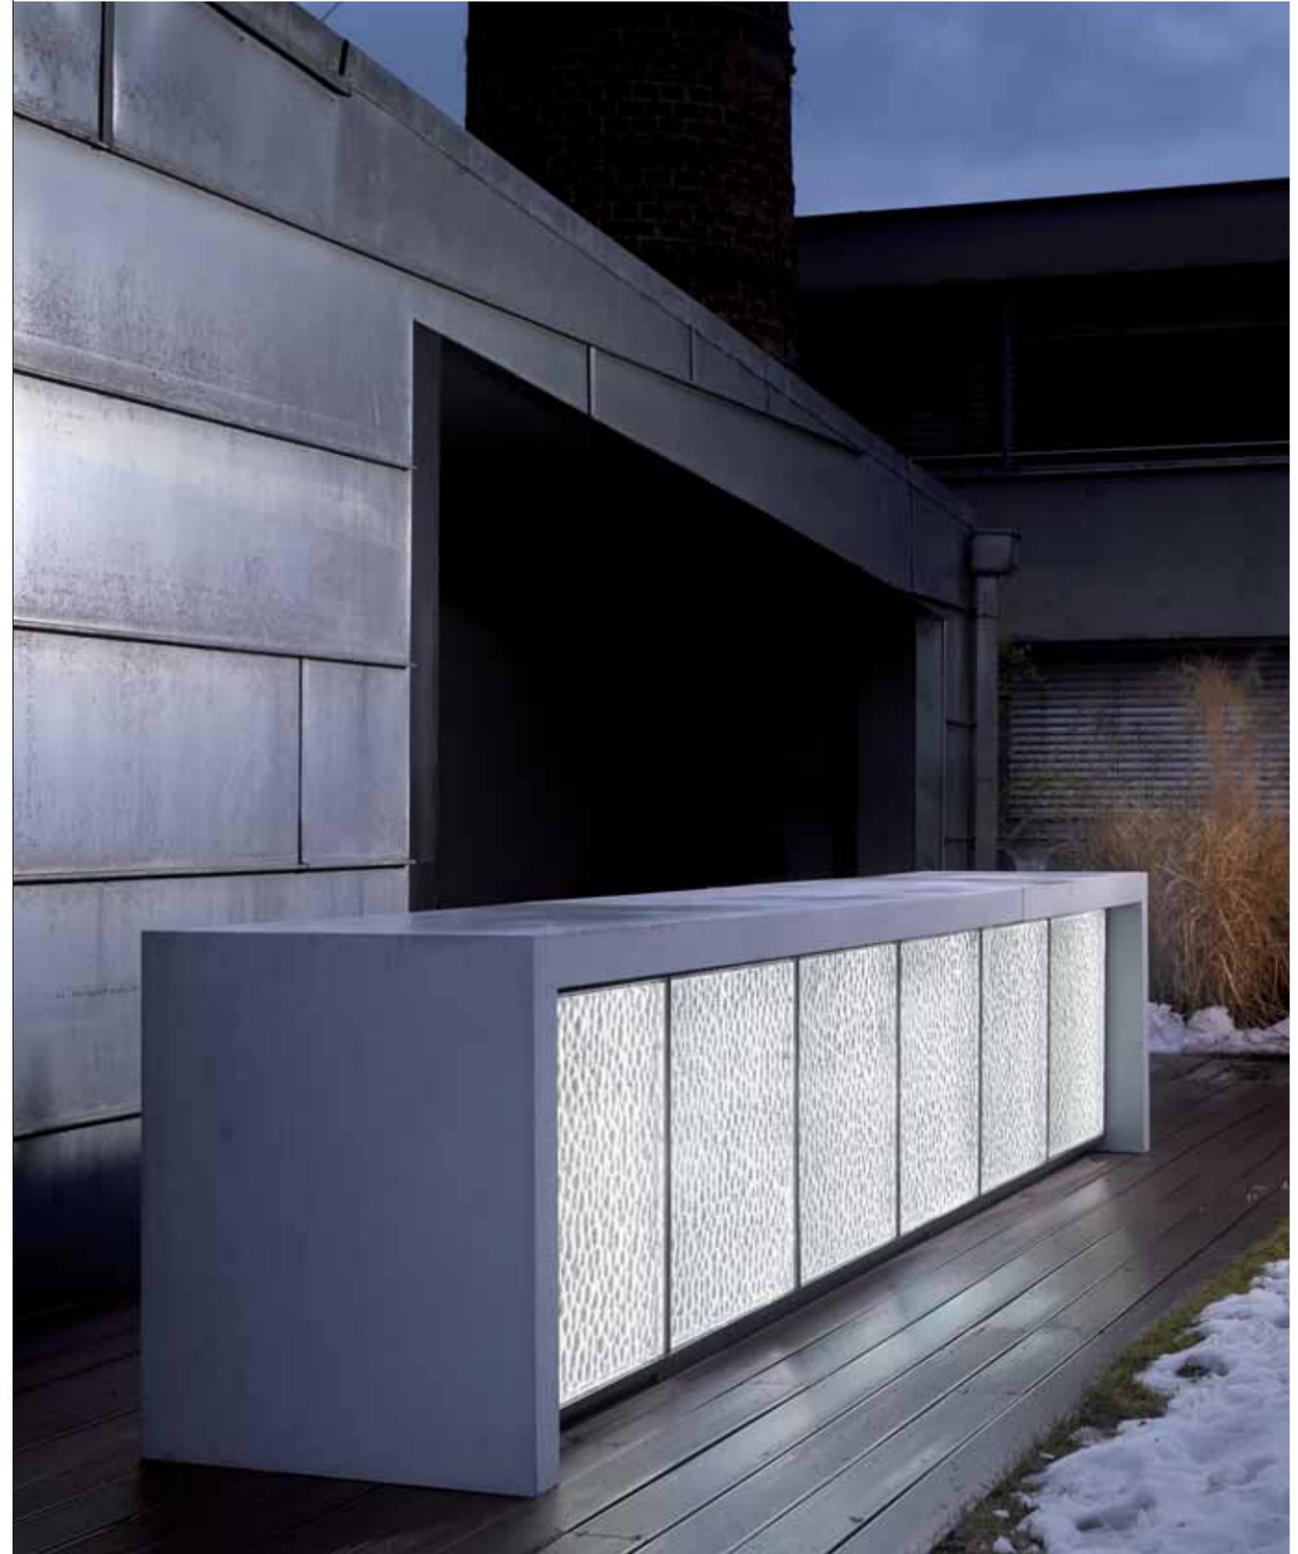

Hydrogen is the lightest and most abundant element in the cosmos, but that does not make it superfluous. The beauty of Kemper & Olah's Hydrogene system is just like that, allowing a simple, versatile chic to be transposed into any setting. The work's various constellations are further accentuated by the integrated LED system which lights the panels in myriad original ways. Complexity always arises from organic simplicity.

LASVIT CRYSTAL WALL

LASVIT's Crystal Wall takes its inspiration from the architecture of the Czechoslovakian 1960s and 70s but updates it for the refined tastes of the 21st century. The versatility of the glass clip-in system means that the Crystal Wall can be used as paneling, decoration or partition, and can furthermore be silver-coated, colored or clear, depending on the requirements of the interior in which it is placed. East meets West in this classic design.

LASVIT LIQUIDKRISTAL

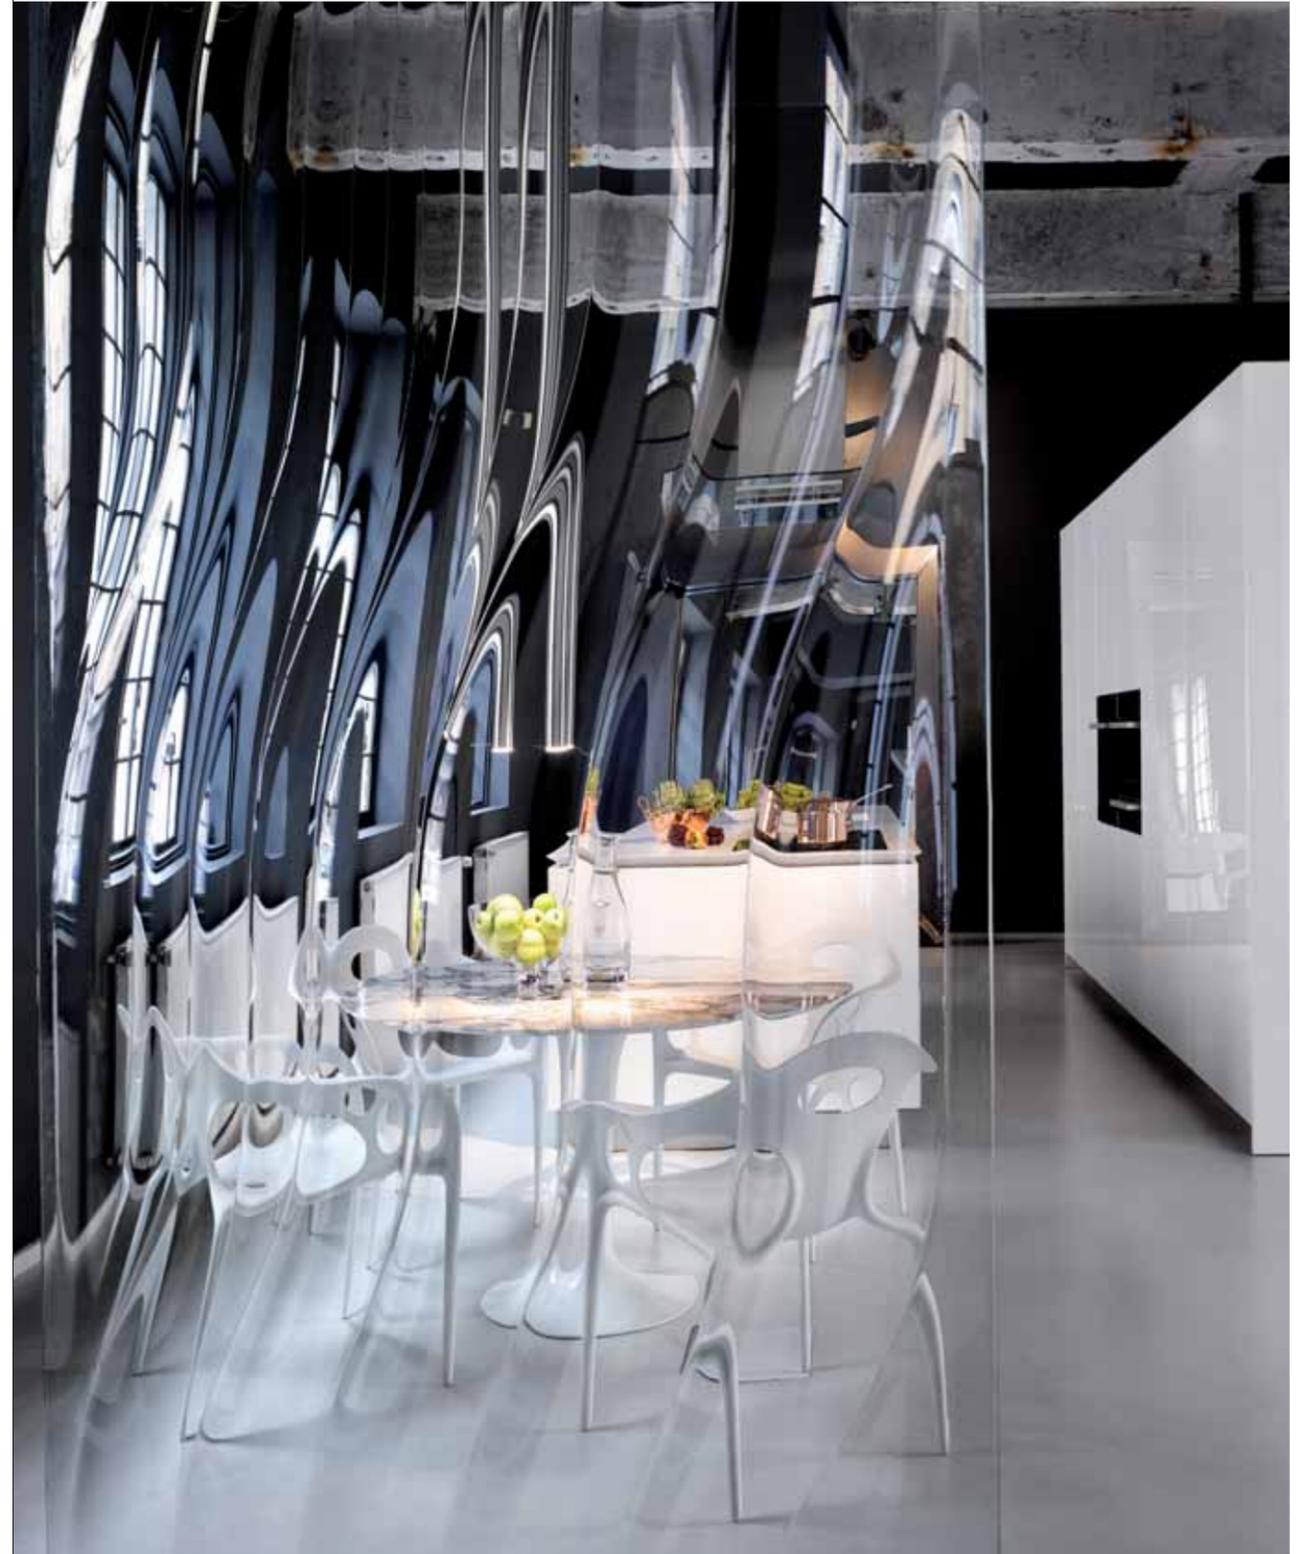

LASVIT's LiquidKristal glass panels were originally created in collaboration with the renowned British designer Ross Lovegrove in a process which the designer defines as "high precision heat transfer." The company deployed its most advanced technology to produce these transparent, undulating crystal panels which transmute their shapes into a futuristic kaleidoscope. The finished product is highly customizable for use in architecture.

GLASS FACADE

Glass is our game but we also sometimes dive into architecture. With our headquarters we dove deep and created a concept for glass facades. We used more than 1400 glass tiles and the complete glass coat weights around 14 tons, yet it is all a self-standing construction which just copies the building's shape. Any house can be covered with these glass tiles and if its facade is cleverly conceived, it can also positively glow when night sets.

BESPOKE GLASS IN ARCHITECTURE FOR PAVILION SUITES

Imagine the afternoon sun reflecting on the metal and glass buildings in the tropical city of Kuala Lumpur. This mood is now captured in the glass wall called Structures adorning the lobby of Bukit Binang tower of the Elite Pavilion Suites. The glass wall covers an area of almost 70 square meters and consists of 495 crafted pieces. The components were made in five different colors and shades and are meant to evoke the image of a tropical sunset.

BESPOKE GLASS IN ARCHITECTURE FOR ROSEWOOD

Offering restaurants, superb shopping and stunning views of the water, the Rosewood hotel complex caters to a sophisticated business and leisure clientele. Jitka Kamencová-Skuhrová's Reed Wall can be found in the lobby and is a stunning installation of hand-blown kiln-glass, inspired by the weave of reed walls. Its horizontal elements are like a horizontal weave of seashore grasses, while the deep red tones toward its base evoke a tropical sunset.

This catalogue is for informational purposes only. This catalogue cannot be considered contractual documentation and does not represent a contract offer. The visualization of the products in this catalogue is solely illustrative. Due to the manufacturing process by hand, the factual appearance of the products and their parameters may significantly differ from the information presented in this catalogue, including the product pictures. The company Lasvit s.r.o. hereby reserves the right to change any parameters presented in this catalogue. The appearance and parameters of the ordered products shall be based on individual agreements and respective contractual documentation.

Ecology

Maximum attention is given to design and manufacturing processes, responsible use of resources, and careful choice of materials and technologies to achieve energy balance.

Heritage

Lasvit represents Czech glassmaking artistry and tradition through breathtaking works of glass designed by internationally renowned designers and crafted by Czech glassmakers.

Quality

Quality is an essential choice for us at all stages of product development, manufacturing, transportation, and after-sales services.
