TRANSMISION PENDANT LAMP  
installation instruction

INSTALLATION MUST BE DONE BY PROFESSIONAL

1 Pull the cable through metal cross and connected it to the electricity - be careful - if you do not know how - ask professionals

Put Reutringers (metal wire holders) through holes and using screw key and nut tighten it to the place

2 attach the metal cross to the ceiling - use strong screw - lamp weight is +- 24 kg

4 Pull the metal wires through Reutringers and adjust the hight of the lamp by pulling the wires. if you need loose the wires you need to put no weight on it and them press the small metal tube on the Reutringer inside
